

AIN SHAMS UNIVERSITY
FACULTY OF ENGINEERING
STRUCTURAL ENGINEERING DEPARTMENT

EFFECT OF CHANGE CONCRETE GRADE ON THE BEHAVIOR OF BEAM-COLUMN JOINTS

A Thesis
Submitted in partial fulfillment for the
requirements of the Degree of
DOCTOR OF PHILOSOPHY

In

CIVIL ENGINEERING (STRUCTURES)

BY

AHMED SAID MOSTAFA EID

Assistant lecturer, Structural Engineering Department,
Faculty of Engineering-October 6 University

Supervised by

Prof. Dr. AMR ALI ABD-ELRAHMAN

Professor of R.C. Structures
Faculty of Engineering - Ain Shams University

Prof.Dr. AMR HUSSEIN ZAHER

Professor of R.C. Structures
Faculty of Engineering - Ain Shams University

Dr. MARWAN TAREK SHEDID

Associate Professor, Structural Engineering Department,
Faculty of Engineering - Ain Shams University

Dr. EZZ EL-DEEN MOSTAFA

Assistant Professor, Structural Engineering Department,
Faculty of Engineering - Ain Shams University

Faculty of Engineering
Ain Shams University
Cairo-2020

STATEMENT

This thesis is submitted to Ain Shams University, Cairo, Egypt, on February 2020 for the Degree of Doctor of Philosophy in Civil Engineering (Structural).

The work included in this thesis was carried out by the author at reinforced concrete unit lab in the faculty of engineering in the Department of Civil Engineering (Structural Division), Ain Shams University.

No part of this thesis has been submitted for a degree or qualification at any other University or Institute.

Date : / / 2020

Name : Ahmed Said Mostafa Eid

INFORMATION ABOUT THE RESEARCHER

Name: Ahmed Said Mostafa Eid

Date of Birth: November 25th, 1983

Place of Birth: qualyb, Egypt

Qualifications: - B.Sc. Degree in civil Engineering (Structural Eng.) Faculty of Engineering, October 6 University (2006).
- M.Sc. Degree in civil Engineering (Structural Eng.) Faculty of Engineering, Ain Shams University (2014).

Present Job: Teaching Assistant October 6 University

Signature:

ACKNOWLEDGMENTS

First of all, I would like to thank God for every gift bestowed on me...

Next, I would like to extend my warmest heartfelt gratitude to all my family who stood by me and supported me in every step of my life. I would like to deeply thank them and convey my sincere appreciation for their assistance, encouragement, support, understanding, and patience.

*Moreover, I would like to express my sincerest appreciation to my advisors, **Prof. Dr. Amr Ali Abdelrahman** and **Prof. Dr. Amr Hussien Zaher** and for their guidance, continuous, valuable guidance, and the investments, giving me the opportunity to be involved in such interesting research.*

*I would like to extend sincere thanks to my advisor, **Dr. Marwan Sedid** and **Dr. Ezz Eldeen** for providing the guidance necessary to complete this research and also for their constant encouragement, support, and friendship which was the motivating force that kept work on my thesis in force until completion. I would like to express my admiration and thanks for his loyalty and trustfulness.*

I would like to thank the Concrete Research Laboratory, Ain Shams University for supporting me during my research. I would like to thank those who helped and improved the means of casting and testing the samples. I am also grateful to those unmentioned others for contributing in countless ways to my writing and being interested in my research. To all of those contributors, I am most grateful..

I believe that I have given my utmost effort in developing this research as accurately and truthfully as possible. Moreover, I am surely personally responsible for the conclusions and opinions expressed here.

*Finally, I'd like to dedicate this work to my beloved **my Father, Mother, Brothers, my wife and my son** as a token of appreciation... I would like to extend my warmest heartfelt gratitude to such an honored... I was really fortunate to receive the benefit of his spirit and intelligence.*

Ahmed Said Mostafa Eid

LIST OF CONTENTS

1. ABSTRACT	xvii
2. CHAPTER ONE	1
2.1 General.....	1
2.2 Statement of the problem	2
2.3 Objectives	3
2.4 Scope of the work	4
2.5 Thesis Arrangement.....	5
3. CHAPTER TWO	7
3.1 Introduction.....	7
3.2 Materials used in producing ultra-high strength concrete	11
3.2.1 Aggregates	12
3.2.2 Cement	15
3.2.3 Fly-Ash	16
3.2.4 Slag	17
3.2.5 Silica-Fume	18
3.2.6 Superplasticizers	19
3.3 Mechanical Properties of Ultra-High Strength Concrete	19
3.3.1 Axial stress-strain.....	19
3.3.2 Modulus of elasticity.....	20
3.3.3 Poisson's ratio	23
3.3.4 Strength.....	24
