Fascia Iliaca Block versus Intra-Venous Analgesia for Positioning of Neck Femur Fracture in Patient Undergoing Spinal Anesthesia

Thesis

*Submitted for Partial Fulfilment of MSc Degree in
Anaesthesiology, Intensive Care and Pain Management*

By

Mahmoud Abdelaziz Mohamed

M.B., B.CH Faculty of Medicine, Ain Shams University

Under supervision of

Prof. Mohamed Saeed Abdelaziz

*Professor of Anaesthesia, Intensive Care and Pain Management
Faculty of Medicine-Ain Shams University*

Prof. Karim Youssef Kamal Hakim

*Professor of Anaesthesia, Intensive Care and Pain Management
Faculty of Medicine-Ain Shams University*

Dr. Peter Naiem Abdelmassiah Ibraheem

*Lecturer of Anaesthesia, Intensive Care and Pain Management
Faculty of Medicine-Ain Shams University*

Faculty of Medicine
Ain Shams University

2021

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

وَقُلْ رَبِّ
زِدْنِي عِلْمًا

سورة طه □
(الاية ١١٤)

صَدَقَ اللَّهُ الْعَظِيمُ

Acknowledgment

*First and foremost, I feel always indebted to **ALLAH**,
the Most Kind and Most Merciful.*

*I'd like to express my respectful thanks and profound gratitude to **Prof. Mohamed Saeed Abdelaziz**, Professor of Anaesthesia, Intensive Care and Pain Management - Faculty of Medicine- Ain Shams University for his keen guidance, kind supervision, valuable advice and continuous encouragement, which made possible the completion of this work.*

*I am also delighted to express my deepest gratitude and thanks to **Prof. Karim Youssef Kamal Hakim**, Professor of Anaesthesia, Intensive Care and Pain Management, Faculty of Medicine, Ain Shams University, for his kind care, continuous supervision, valuable instructions, constant help and great assistance throughout this work.*

*I am deeply thankful to **Dr. Peter Maiem Abdelmassiah Ibraheem**, Lecturer of Anaesthesia, Intensive Care and Pain Management, Faculty of Medicine, Ain Shams University, for her great help, active participation and guidance.*

I would like to express my hearty thanks to all my family for their support till this work was completed.

Last but not least my sincere thanks and appreciation to all patients participated in this study.

Mahmoud Abdelaziz Mohamed

List of Contents

Title	Page No.
List of Tables	i
List of Figures	ii
List of Abbreviations.....	iv
Introduction	1
Aim of the Work	3
Review of Literature	
Anatomy of Nerves of Lower Limb.....	4
Pharmacology of Local Anesthetics.....	17
Pharmacology of Opioid	29
Patients and Methods.....	44
Results	50
Discussion	67
Summary	71
Conclusion	73
References	74
Arabic Summary	

List of Tables

Table No.	Title	Page No.
Table (1):	Classification of opioid receptors.....	30
Table (2):	Physical characteristics of opioids that determine.....	35
Table (3):	Uses and doses of common opioids.....	40
Table (4):	Comparison between the two studied groups regarding demographic and characteristics of the studied patients.....	50
Table (5):	Comparison between the two studied groups regarding number of days since fracture, VAS score during positioning and time to perform SAB among the studied patients.....	53
Table (6):	Comparison between the two studied groups regarding quality of positioning and patient satisfaction	56
Table (7):	Comparison between the two studied groups regarding heart rate of the studied patients	58
Table (8):	Comparison between the two studied groups regarding mean arterial blood pressure of the studied patients.....	60
Table (9):	Comparison between the two studied groups regarding Spo2 of the studied patients.....	62
Table (10):	Comparison between the two studied groups regarding respiratory rate of the studied patients	64
Table (11):	Comparison between the two studied groups regarding first rescue analgesic postoperative of the studied patients	66

List of Figures

Fig. No.	Title	Page No.
Figure (1):	Lumbar plexus formation	4
Figure (2):	Femoral Nerve course.....	6
Figure (3):	Lateral femoral cutaneous nerve course	7
Figure (4):	Obturator nerve course	9
Figure (5):	Sciatic nerve course.....	10
Figure (6):	Anatomy of Fascia Iliaca	12
Figure (7):	Fascia iliaca compartment	13
Figure (8):	Fascia Iliaca Compartment block-Landmark technique	14
Figure (9):	Fascia Iliaca Compartment block under US guidance.....	15
Figure (10):	Fascia Iliaca Compartment block under US guidance Needle direction	16
Figure (11):	Local anesthetic structure.....	17
Figure (12):	Opioid agonists and antagonists share part of their chemical structure, which is outlined in cyan.....	32
Figure (13):	Comparison between the two studied groups regarding age of the studied patients	51
Figure (13):	Comparison between the two studied groups regarding sex of the studied patients	51
Figure (14):	Comparison between the two studied groups regarding fracture site among the studied patients	52
Figure (15):	Comparison between the two studied groups regarding weight of the studied patients	52
Figure (16):	Comparison between the two studied groups regarding number of days since fracture among the studied patients.....	54

List of Figures *(Cont...)*

Fig. No.	Title	Page No.
Figure (17):	Comparison between the two studied groups regarding VAS score during positioning among the studied patients.....	54
Figure (18):	Comparison between the two studied groups regarding time to perform SAB among the studied patients	55
Figure (19):	Comparison between the two studied groups regarding quality of positioning.....	57
Figure (20):	Comparison between the two studied groups regarding patient's satisfaction.....	57
Figure (21):	Comparison between the two studied groups regarding heart rate of the studied patients.....	59
Figure (22):	Comparison between the two studied groups regarding mean arterial blood pressure of the studied patients	61
Figure (23):	Comparison between the two studied groups regarding Spo2 of the studied patients	63
Figure (24):	Comparison between the two studied groups regarding respiratory rate of the studied patients	65
