### Author

The author graduated with B.Sc. degree in chemical Engineering from the Chemical Engineering Department of the Faculty of Engineering of Cairo University in May, 1984.

She graduated with Diploma in Nuclear Engineering, Cairo University in 1988.

She registered for M.Sc. degree at the Chemical Engineering Department of Cairo University in 1989.

She works as a Chemical Engineer in Soil Mechanics and Foundation Engineering Department of the General Organization for Housing, Building and Planning Research Center.

## ACKNOWLEDGMENT

The author wishes to express her heartfelt and great appreciation for Prof. Dr. M.F. Shalabi, Professor of Chemical Engineering at Cairo University, and Prof. Dr. M.E. Abu El-Hasan, Professor of Chemical Engineering at the same university and also Prof. Dr. M.A. Shater, Professor of Building Materials at General Organization for Housing, Building and Planning Research Center, for their help and valuable advice and critical discussion during the course of this study.

I would like to express my greatest deepest gratitude to Dr. Rawia Ragab El-Sakhawy, lecturer of Soil Mechanics and Foundation Engineering and greatly indebted to Dr. Osama Mazen, Dr. of Soil Mechanics and Foundation Engineering at General Organization for Housing, Building and Planning Research Center, for providing the facilities and helpful advice.

I wish also to thank the staff and all members of Soil Mech. and Found. Department in (GOHBPR) for their help during this work. The author likes to express her deepest gratitude to Prof. Dr. M. Ramez, chairman of General Organization for Housing, Building and Planning Research Center for all facilities offered during this work.
