METHODS OF ESTIMATION OF SIMULTANEOUS EQUATIONS SYSTEM WITH APPLICATION

By

Saher Adel Mohamed Raafat

B.Sc. in Statistics, Cairo University

SUPERVISED By :

Dr. Medany Desoky Mostafa
Prof. of Statistics
Faculty of Economics and Political Science
Cairo University

Dr. Farid El-Hoseiny
Prof. of Statistics
Dean of Faculty of Commerce–
Benha-Zagazig University

A THESIS

SUBMITTED IN PARTIAL FULFILLMENT
FOR THE (M.Sc.) DEGREE
In Statistics

CAIRO UNIVERSITY

1984

B
17-01

بسم الله الرحمن الرحيم

ACKNOWLEDGEMENT

I wish to express my gratitude to Dr. MEDANY DESOKY. Professor of statistics. Faculty of Economic and Political Sciences-Cairo University for his sincere guidance in the course of this thesis. My sincere appreciation is for Dr. FARID EL HOSEINY Professor of statistics Dean of Faculty of Commerce-Benha, Zagazig University for his valuable suggestions, continous encouragement and kind assistance.

Thanks to Dr. NADIA MAKARY, Professor Head of Statistics Department, Faculty of Economic and Political sciences — Cairo University, and Dr. SOLIMAN HASAN ABDEL AATY, Professor of Statistics, for their kind consent to discuss this thesis.

I am sincerely grateful to Dr. BAHGAT THABET, Dr. GHAZAL ABDEL AZIZ and Dr. RABIE ZAKI AMER, they have been kind enough to guide me in the thesis.

"CONTENTS"

	Page
INTRODUCTION----------	1
Chapter (I): REVIEW OF LITERATURE	10
I.1 Simultaneous equations system----------	11
I.2 Identification problem----------	15
I.3 Methods of estimation----------	22
I.3a Single equation methods (2SLS-LIML)----------	23
I.3b System methods (3SLS-FILM)----------	31
I.4 Choice of K class estimator ----------	36
I.5 Tests of goodness of fit----------	39
I.5a Test of Multicollinearity----------	39
I.5b Test of serial correlation in simultaneous equations model----------	44
Chapter (II): ECONOMETRIC MODELS OF DEMAND SUPPLY FUNCTIONS OF PRINTING AND WRITING PAPERS	50
II.1 Assumptions of the econometric model principles of analysis econometric problems and problems of estimation----------	52
II.2 The econometric model of demand supply functions----------	60
II.2a Priori restrictions on structural coefficients	68
II.2b Identification of the structural equations---	70
II.2c Results of the statistical estimation--------	76
Chapter (III): STATISTICAL ESTIMATION OF DEMAND SUPPLY FUNCTIONS USING SINGLE EQUATION SYSTEM	107
III.1 Stepwise multiple linear regression estimation	108
III.2 Results of statistical estimation----------	116
Chapter (IV): ANALYSIS OF STATISTICAL ESTIMATION RESULTS	
IV.1 General characteristics of the estimated models	136
IV.2 Analytical study on variables of the econometric model.----------	138
IV.3 Summary and Conclusion----------	151
References ----------	162

List of Tables

		Page
A	Major companies in paper industry in 1975--	3
IV.2.a	Signs and elasticities of the coefficients of an estimated explanatory variables------	150
IV.3.1	Prediction the future values of dependent variables of the econometric model----	156
IV.3.2	Prediction the future values of independent variables of the econometric model--	157
1-5	Appendix, Used Data ----------	i

ABBREVIATIONS

Page	abbreviations	meaning
5	2SLS	Two Stage Least Squares
	LIML	Limited Information Maximum Likelihood.
	3SLS	Three Stage Least Squares
	FIML	Full Information Maximum Likelihood.
8	OLS	Ordinary Least Squares.
16	LF	Likelihood Function.
28	SSE	Sum of the Squared residuals
33	GLS	Generalized Least Squares.
55	MAPE	Mean Absolute Percentage Error
56	GRY	Annual Growth Rate of Y
	GR$\hat{Y}$	Annual Growth Rate of $\hat{Y}$

INTRODUCTION

Paper was known to ancient Egyptians, they used it for recording their sciences and different branches of knowledge, as far as 4300 B.C. Ancient Egyptians made their paper from papyrus. It was in the recent revolutioary epoch, however, that a new idustry for making writing and printing papers was started. Being poor in forestry-Egypt had to use the residuary farm plants in paper industry.

The importance of initiations of this industry appears in saving the hard currency which the country had to pay for paper import from the foreign markets. From the very first years of the recent revolutionary era the state gave due consideration to the manufacture of writing and printing papers. After an extensive study and research of the technical and economic aspects of the scheme, it was decided to establish the general Co. For the manufacture of paper " Rakta " with the object of producing writing and printing papers from local raw materials.

Rekta is able to meet the full requirements of local consumption.

The mills are making special efforts and conducting extensive researches and studies to cover local requirements of some particular qualities which are now imported and for which hard currency is paid; thus realizing an annual saving of £4 million that had to be paid for the import of this commodity.

Structure of Capacity(*):

In Egypt, there are at present 11 companies in the paper industry who own 13 mills.

The industry is dominated by three state-owned companies (National paper company, Rekta and Simo) who account for 82 per cent of the total capacity.(Table A-1)

Four of the mills which account for 78 per cent of the total capacity are located in Alexandria,while the rest are distributed in the Cairo area (Bahtim,Mostorod, Khanka, Tourah Asmant , and El-Giza).
