Surface Enhanced Spectroscopy of Molecules on Plasmonic Nanostructures

A Thesis

Submitted to the Faculty of Science

Ain Shams University

For the Degree of Doctor of Philosophy in Physics

By

Hend Awad Abdelhamid Youssef

M. Sc. Ain Shams University (2009)

Supervised by

Prof. Dr. Mohamed Hassan Talaat

Prof. of Experimental Physics

Faculty of Science-Ain Shams University

Dr. Tamer Abdallah Fathy

Assoc. Prof. of Experimental Physics

Faculty of Science-Ain Shams University

Dr. Khalid Hassan Easawi

Assoc. Prof. of Experimental Physics

Department of Mathematical and Physical Engineering

Faculty of Engineering Benha University

2020

Approval Sheet

Student Name: Hend Awad Abdelhamid Youssef

Thesis Title: Surface Enhanced Spectroscopy of Molecules on Plasmonic Nanostructures

Degree: Doctor of Philosophy in Science in Physics

Supervision committee

Prof. Dr. Mohamed Hassan Talaat - Faculty of Science-Ain Shams University

Dr. Tamer Abdallah Fathy - Faculty of Science-Ain Shams University

Dr. Khalid Hassan Easawi – Faculty of Engineering – Benha University

Examiners Committee

Prof. Dr. Tharwat Mahmoud Ahmed Elsherbini - Faculty of Science – Cairo University

Prof. Dr. Filbert Bartoli – Lehigh University – United States of America

Prof. Dr. Mohamed Hassan Talaat - Faculty of Science -Ain Shams University

Higher Students

Thesis Approval Date:

Faculty Council Approval:

University Council Approval:

Student Name: Hend Awad Abdelhamid Youssef

Degree: Doctor of Philosophy in Science in Physics

Department: Physics

Faculty: Science

University: Ain Shams

Graduation Year: 2003

Master Approval Year: 2009

Ph D Approval Year: 2020

Acknowledgment

All the thanks are first and last to Allah

I would like to express my gratitude and admiration to my Professor Dr. **Hassan Talaat** for suggesting this point of research and kindly supplied me with all necessities of this research. I would like also to thank him for the patient guidance, encouragement, and advice he has provided throughout all my time as his student. I have been extremely lucky to have a supervisor who cared so much about my work, and who responded to my questions and queries so promptly.

I would also like to thank Dr. **Tamer Abdallah** for his support and meticulous supervision of every item in this work and valuable discussions together with objective criticism are gratefully appreciated.

I would like to thank Professor Dr. **Tarek Ahmed** for his kindly help and discussion of everything I asked for.

I would like to thank also my colleagues in the laser technology unit for kind help, encouragement, and useful discussions.

I would like to express my deep thanks to Prof. Dr. **Sohair Negm** for her kindly help and for her continuous encouragement. I would also like to thank all her group, especially Dr. **Khalid Easawi**, in Faculty of Engineering-Banha University for their encouragement and support.

Many thanks to Dr. **Reham Hassan** –Zoology Department, for her generous help and useful discussions.

The help with sample preparation of biosensors and sensitivity measurement of biosensors of Dr. Haci, and Dr. Noha Waly at Prof. Dr. **R. Dahint** group at Heidelberg University, Germany, are appreciated.

Also, the help with Raman spectroscopy, of S. R. Panikkanvalappil, and TEM measurements of Moustafa Ali, useful discussions with Dr. Mahmoud Abdelwahed of Prof. Dr. **M. El-Sayed** group at Georgia Institute of Technology, USA, are greatly appreciated.

I greatly appreciate Prof. Dr. **Stanislav Emelianov**, Georgia Institute of Technology for hosting me at his laboratory. Also I would like to thank his group for their generous help.

Most importantly, I want to thank all my family, especially my parents, my brother, my sister, my husband, and my husband's family who offered willingly all the time and care and continuous support. Without their help this work wouldn't be finished.

To my lovely Kids, Ali, Nadia, and Mervat, your love and continuous support are what keeps me going.

Table of Contents

List of Figures.....	i
List of Tables.....	v
Abstract.....	vi
Chapter 1:Introduction	1
Chapter 2:Plasmonic Nanoparticles	6
2.1 Introduction	6
2.2 Bulk Plasmons	6
2.3 Surface plasmons.....	7
2.4 Localized Surface Plasmons.....	9
2.4.1 Surface plasmon resonance (SPR).....	9
2.4.2 Normal modes of small metal nanoparticles.....	11
2.4.2.1 Mie theory for nanospheres	11
2.4.2.2 Gans theory for Nanorods.....	15
2.4.3 Polarizability for larger nanoparticles	16
2.4.4 Coupling between localized plasmons.....	17
Chapter 3:Gold Nanoparticles as Contrast Agent for Photoacoustic Imaging	20
3.1 History and background of Photoacoustic Imaging	20
3.2 Photoacoustic contrast agents.....	24
3.3 Combined Ultrasound and Photoacoustic (US-PA) imaging.....	27
3.4 Size effect of Gold Nanospheres on PA signal	28

3.4.1	Synthesis and characterization of gold nanospheres with different sizes.....	28
3.4.1.1	UV-Vis Absorption Spectroscopy	29
3.4.1.2	Dynamic Light scattering	31
3.4.1.3	Transmission electron microscope (TEM)	34
3.4.2	Cell culture	35
3.4.3	Quantitative PA measurements.....	37
3.5	Combined US-PA imaging to compare between Bare and PEGylated gold nanospheres	41
3.5.1	AuNSs PEGylation process	42
3.5.2	US-PA Measurements.....	47
3.6	Photoacoustic imaging for Gold Nanorods with different sizes.....	53
3.6.1	Synthesis and characterization of AuNRs with different aspect ratios.....	53
3.6.1.1	UV-Vis absorption spectra	54
3.6.1.2	TEM images.....	55
3.6.2	US-PA imaging for AuNRs with different aspect ratios in gelatin.....	56
3.7	US-PA imaging for cells loaded with PEGylated and Silica coated AuNRs.....	59
3.7.1	Functionalization Process	59
3.7.2	UV-Vis absorption.....	60
3.7.3	US-PA imaging Experiment	63

Chapter 4:Surface Enhanced Raman Spectroscopy for Array Structured Label-free Biosensors 68

4.1	Brief history and classical treatment of Raman spectroscopy (Pre SERS).....	68
4.2	Surface Enhanced Raman Spectroscopy (SERS).....	74
4.2.1.1	Electromagnetic mechanism of SERS	75
4.2.1.2	Chemical mechanism of SERS	78
4.3	Label free biosensors.....	79
4.3.1	Samples preparation.....	81
4.3.2	Samples characterization	82
4.3.2.1	UV-Vis extinction spectra	82
4.3.2.2	Scanning Electron Microscopy (SEM).....	83
4.3.2.3	Scanning Tunneling Microscopy (STM).....	85
4.3.3	Sensitivity of the substrates	90
4.3.4	SERS measurements	93
4.3.4.1	The Raman spectrometer	93
4.3.4.2	SERS of Cresyl Violet(CV).....	95
4.3.4.3	SERS for Fibrinogen.....	98

Chapter5:Surface Enhanced Raman Spectroscopy for Detection of DNA Cancer Mutations 104

5.1	Introduction	104
5.2	Cancer and how it starts	105
5.3	Kirsten ras oncogene (KRAS) gene mutation.....	106
5.4	Samples.....	106
5.5	Methodology	108

5.5.1	DNA immobilization	109
5.5.2	DNA hybridization.....	111
5.5.3	SERS measurements	113
5.5.3.1	Raman mapping	116
5.5.3.2	Limit of Detection.....	122
5.5.3.3	Adding aggregating agent.....	124
Chapter 6:Conclusions		127
References.....		131
Publications		
ArabicSummary
