INVESTIGATING THE PERFORMANCE OF NANO SILICA & CARBON NANO TUBES CONCRETE SUBJECTED TO ELEVATED TEMPERATURE

By

Ahmed Saied Ahmed Abd El-Haleem

A Thesis Submitted to the
Faculty of Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the Degree of
MASTER OF SCIENCE
in
Structural Engineering

FACULTY OF ENGINEERING, CAIRO UNIVERSITY
GIZA, EGYPT
2021

**INVESTIGATING THE PERFORMANCE OF NANO
SILICA & CARBON NANO TUBES CONCRETE
SUBJECTED TO ELEVATED TEMPERATURE**

By
Ahmed Saied Ahmed Abd El-Haleem

A Thesis Submitted to the
Faculty of Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the Degree of
MASTER OF SCIENCE
in
Structural Engineering

Under the Supervision of

Prof. Dr. Mohamed M. El-Ataar

Professor of Materials
Civil Engineering Department
Faculty of Engineering, Cairo University

Prof. Dr. Ahmed M. Ragab

Professor of Materials
Civil Engineering Department
Faculty of Engineering, Cairo University

Ass.Prof. Dr. Mohamed S. El-Feky

Associate Professor
Civil Engineering Department
National Research Centre

FACULTY OF ENGINEERING, CAIRO UNIVERSITY
GIZA, EGYPT

Faculty of Engineering – Ein Shams University

Title of Thesis:

Investigating the Performance of Nano Silica & Carbon Nano Tubes Concrete
Subjected to Elevated Temperature

Key Words:

Nano Silica; Carbon Nano Tubes; Fire Resistance; Elevated Temperature; Thermal Effect.

Summary:

This research thesis presents the results of a study on the performance of concrete containing relatively small volume of nano silica (up to 1.5%) and carbon nano tubes (up to 0.03%) exposed to severe heating conditions in order to evaluate the effect of exposure to the elevated temperature on the properties of the hybrid (nano silica - carbon nano tubes) concrete subjected to elevated temperature up to 600°C. The results confirmed the ability of nano silica and carbon nano tubes to enhance the mentioned properties.

Disclaimer

I hereby declare that this thesis is my own original work and that no part of it has been submitted for a degree qualification at any other university or institute.

I further declare that I have appropriately acknowledged all sources used and have cited them in the references section.

Dedication

**To my family and friends that has a great effect on my
life,**

All my love to you for your care and support.

Acknowledgments

IN THE NAME OF ALLAH, THE MOST GRACIOUS AND THE MOST MERCIFUL

First and above all, I have to thank **Allah** for giving me wisdom and knowledge I have today. I praise **Allah** for His care and support and providing me with the opportunity to present my hard work in a beneficial knowledge to people.

I would like to deeply thank my admired supervisor Dr. **Mohamed M. El-Ataar**; who offered me the opportunity to be under his supervision. I thank him for his encouragement and his flexible treatment during the course of my thesis. I also thank him for caring, patience, and his great effort to make my thesis appear in its current form.

I would like to gratefully thank my respectful supervisor **Dr. Muhammad S. El-Feky** for his mentorship, information, patience, and powerful support in my thesis. In addition to the above, I appreciate his treatment as a helpful brother to me. I thank him for benefiting me culturally, socially, ethically and religiously.

Finally, I would like to thank my technicians; **Ahmed Said** and **Hamdy Beheiry** for their hard efforts in my experimental work.
