APPROVAL SHEET

The Committee:

- Dr. Nadia Makary Girgis
  Head, Department of Statistics
  Faculty of Economics and Political Science
  Cairo University

- Dr. Ahmed Hassan El Mawaziny
  Professor of Statistics
  American University in Cairo

- Dr. Hussein A.A. Sayed
  Department of Statistics
  Faculty of Economics and Political Science
  Cairo University

This committee approved the M.Sc. Thesis submitted by Maged George Ishak and awarded him the M.Sc. Degree in Statistics with Grade "*Excellent*".

TO MY FAMILY

ACKNOWLEDGEMENT

I owe the deepest gratitude to Dr. Hussein Abd El-Aziz Sayed, for the incessant help and the enlightening guidance he generously gave me. I am thankful to him for being helpful and patient through his supervision of this thesis.

I acknowledge with thanks the invaluable assistance bestowed on me by Dr. Ahmed Hassan El-Mawaziny while preparing this thesis.

I would like to thank all the members of the Mansoura University Computer Center.

My deep thanks and appreciation also to all persons at Cairo Demographic Center for their help in providing required data.

INTRODUCTION		i
CHAPTER I	INFANT MORTALITY: AN OVERVIEW	1
1.1	The Importance of Studying Infant Mortality	2
1.2	Infant Mortality Levels	7
1.3	Age Distribution of Infant Mortality	12
1.4	The Sex Ratio of Infant Mortality	19
1.5	Factors Affecting Infant Mortality	22
1.5.1	Factors Relevant to Foetal Mortality	23
1.5.2	Factors Associated with Both General and Infant Mortality	24
1.6	Nature of Infant Mortality Data	26
1.7	Conclusions	32
CHAPTER II	INFANT MORTALITY IN THE A.R.E.	34
2.1	Sources of Infant Mortality Data in the A.R.E.	34
2.1.1	Registration of Vital Events in the A.R.E.	35
2.2	Levels of Infant Mortality in Egypt	44
2.2.1	Estimated Infant Mortality Levels in the A.R.E.	49
2.3	Urban/Rual Differentials	52
2.3.1	Neonatal Mortality	54
2.4	The Pattern of Infant Mortality	62
2.5	Sex Differentials of Infant Mortality	68
2.6	Conclusions	71
CHAPTER III	INFANT MORTALITY MODELS	74
3.1	Review of Previous Models	74
3.2	Sayed's Model	75

Page

3.3 Karara's Model 84

3.4 A Comparison Between Programme 2 and Programme 4 93

3.5 Conclusions 95

CHAPTER IV SOME DEMOGRAPHIC IMPLICATIONS OF THE MODEL .. 97

4.1 Infant Mortality Pattern: Cairo Governorate 97

4.1.1 The First Iteration for the Estimation of the Parameters (α,β,c) 98

4.1.2 Successive Iterations 106

4.1.3 The Estimation of the Parameters λ,θ .. 108

4.2 A Demographic Analysis of the Model 118

4.2.1 The Weight Parameter λ 118

4.2.2 The First Component Parameters (α,θ) .. 122

4.2.3 The Second Component Parameters (c,β) .. 128

4.3 Conclusions 135

CHAPTER V INFANT MORTALITY DIFFERENTIALS BY URBAN/ RURAL AND GOVERNORATES IN THE A.R.E. 138

5.1 Urban/Rural Differentials 139

5.2 Governorate's Differentials 143

5.2.1 Level's Differentials 144

5.2.2 Pattern Differentials 146

5.3 Infant Mortality and the Level of Development in Various Governorates 148

5.3.1 The Physical Quality of Life Index 150

5.4 Conclusions 157

FINAL CONCLUSIONS 159

APPENDIX A FIGURES OF OBSERVED AND EXPECTED CURVES OF INFANT MORTALITY RATES FOR OVERALL EGYPT AND FOR EACH GOVERNORATE .....

APPENDIX B THE COMPUTER PROGRAMMES .....

ARABIC SUMMARY

LIST OF TABLES

Table		Page
1.1	The Ratio (%) of Infant Mortality to Total Mortality in Some Selected Countries of the World	3
1.2	I.M.R. & C.D.R. (per thousdand) in Some Selected Countries during the Period (1949-1978)	5
1.3	The Percentage Decline in I.M.R. and C.D.R. between the Two Periods (1949-1953 & 1974-1978). The First Period is Radix	7
1.4	The Mean of I.M.R. in Various Continents	10
1.5	Infant Mortality Rates (per thousand) by Sex for Some Selected Countries: Latest Available Year ..	11
1.6	Percentages of Infant Deaths by Age for Some Selected Countries: Latest Available Year	14
1.7	The Proportion (%) of First Day Deaths and Neo-natal Deaths to the Total Infant Deaths	15
1.8	Sex Ratio by Age During the Infancy Period, for Some Selected Countries	20
1.9	I.M.R. by Urban/Rural Residence in Some Selected Countries	25
2.1	Percentages of Under-Registration of Births by Region, 1974-1975, Egypt	41
2.2	Percentages of Under-Registration of Deaths by Region, 1974-1975, Egypt	42
2.3	Percentages of Under-Registration of Infant Deaths by Region, 1974-1975, Egypt	43
2.4	I.M.R. (per thousand live births) in the A.R.E. in the Period 1917-1979	45
2.5	Summary of Estimated I.M.R. (per thousand) for the Period 1932-1986	50
2.6	Direct Estimates of I.M.R. (per thousand) for the Period 1950-1980	51
2.7	Indirect Estimates of I.M.R. (per thousand) for the Period 1965-1978	51
2.8	I.M.R. (per thousand) in the Total Urban and Rural Areas of Egypt in the Period 1962-1979	55
2.9	Neonatal Mortality Rate (per thousand) in Egypt in 3 Year Averages in the Period 1962-1979	57

Page

2.10 Neonatal Mortality Rates by Urban/Rural and Male/Female Residence in Egypt in the Period 1962-1979 58

2.11 Neonatal and Post Neonatal Mortality Rates (per thousand) in Some Selected Countries. Last Available Year..... 58

2.12 Neonatal and Post Neonatal Mortality Rates (per thousand) in Egypt in 3 Year Averages in the Period 1962-1979 61

2.13 The Final Results for Kolmogorov-Smirnov Test about the Differences between the Three Year Averages 1977, 78, and 79 and the 1979 Data for Some Selected Areas in the A.R.E. 63

2.14 Infant Deaths by Age in Urban/Rural, and Overall Egypt for the Average of the Years 1977, 78 and 79 64

2.15 Sex Ratio (per thousand) in Urban/Rural, and Overall Egypt in the Average of the Years 1977, 78, and 79 70

3.1 The Values of Chi-Square Test for Programm 1 and Programme 2 83

3.2 The Values of Chi-Square Test for Programme 3 and Programme 4 92

3.3 The Values of Chi-Square Test for Programme 5 ... 94

4.1 I.M.R. (per thousand) During the First Month of Age, in Cairo Governorate for the Average of the Years 1977, 78 and 79 99

4.2 Observed and Expected Infant Mortality Rates due to the First Component of the Equation, $(\hat{y}_{1i})$. Cairo Governorate (1977, 78 and 79) 101

4.3 Infant Mortality Rates in the Age Intervals (1-12 Months) after Eliminating the Effect of the First Component $(\hat{y}_{1i})$ 103

4.4 The Expected Infant Mortality Rate in Each Age Interval due to the Second Component of the Equation $(\hat{y}_{2i})$ 105

4.5 The Values of P_i and χ^2 of the First Iteration. Cairo Governorate (1977, 78, and 79) 107

Page

4.6 Estimated Parameters and Chi-Squares Values for the First Three Iterations 108

4.7 The Values of χ^2 Corresponding to Some Specific Values of λ 109

4.8 Continued 110

4.9 The Values of χ^2 Corresponding to Some Specific Values of Θ 111

4.10 Continued 111

4.11 P_i and χ^2 Values for the Final Estimates of Infant Mortality Rates. Cairo Governorate 1977, 78 and 79 113

4.12 The Calculations of Kolmogorov-Smirnov Test for Cairo Governorate (average 1977, 78 and 79) 115

4.13 Estimated Values of the Model's Parameters by Area Type (Urban/Rural) and Sex in the A.R.E. (1977, 78 and 79) 116

4.14 Estimates of the Models Parameters by Governorate and Area (Urban/Rural) in Egypt due to the Data of the Three Year Averages (1977, 78, and 79) 117

4.15 Estimated Values of λ-Based on the Unified Model-for Some Selected Countries 120

4.16 The Ratio of Neonatal Deaths to Total Infant Deaths in the Governorates of Egypt for the Average of the Years (1977, 78, and 79) 121

4.17 The Estimated Values of α-Based on the Unified Model for Some Selected Countries 123

4.18 The Estimated Values of θ-Based on the Unified Model for Some Selected Countries 127

4.19 The Estimated Values of c-Based on the Unified Model for Some Selected Countries 131

4.20 The Estimated Values of β-Based on the Unified Model for Some Selected Countries 134

5.1 The Percentage of Neonatal Infant Mortality Excess for Various Governorates of Egypt. Three Year Averages (1977, 78, and 79) 141
