ACKNOWLEDGEMENT

First and foremost, I feel always indebted to Allah, the kindest and most merciful, who give me the power and strength to complete this work.

I would like to express my respectful thanks and profound gratitude to prof. Moustafa El Houssinie Moustafa, for his keen guidance and continuous encouragement. His vision and professional experience have fueled my academic, professional and personal development in the past years. I would like to express my respectful thanks and profound gratitude to my mentors; Prof. Mahi Mahmoud Al Tehewy, Prof. Hanaa Abdelhakiem Ahmed, Prof. Nahla Fawzi Abou Elezz and Dr. Mohamed Abdel Magid Tolba Mo'men for their kind supervision, great help, active participation, valuable advice and keen guidance. They have been amazing resources to me, under their mentoring I had the honour and pleasure to proceed with work.

I would like to express my deepest gratitude and thanks to the nurses and the physicians who participated in this study, who opened up and shared with me their experiences. I would like to thank quality and training unit in Ain Shams University Hospitals for facilitating my work. I would like to thank Dr Marwa El Khamisy assistant professor in the Psychiatry Department for revising the training material. I would like to thank my colleague Aya Abdellatif for helping me in the translation process.

Finally, special thanks go to my lovely family and my dearest friends, for their endless love and support, if it were not for you, I wouldn't be here today.
