HANAA ALY

Biomechanical Behavior of Different Implant Supported Hybrid Designs with Two Different Ceramic Materials

(Finite Element & Strain Gauge Analysis)

Thesis

Submitted to the Fixed Prosthodontics Department

Faculty of Dentistry - Ain Shams University

for Partial Fulfillment of the Requirements for Ph.D degree in

Fixed Prosthodontics

By

Mohamed Abdel Moniem Ahmed

B.D.S., Faculty of Dentistry, Ain Shams University

M.Sc., Crown & Bridge, Ain Shams University

Faculty of Dentistry - Ain Shams University

**Faculty of Dentistry
Ain Shams University**

2021

SUPERVISORS

Prof. Dr. Amina Mohammad Hamdy

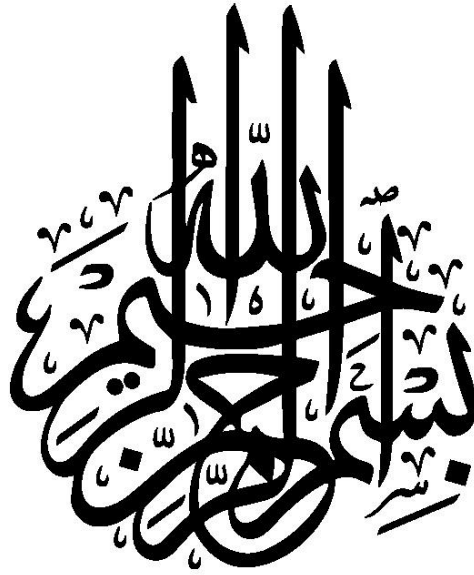

Professor of Fixed Prosthodontics
Crown and Bridge Department
Faculty of Dentistry, Ain Shams University

Dr. Ahmed Khaled Abo Elfadl

Associate Professor of Fixed Prosthodontics Department
Faculty of Dentistry, Ain Shams University

Dr. Gadah Abdel Fattah

Associate Professor of Fixed Prosthodontics Department
Faculty of Dentistry, Ain Shams University

قَالُوا سُبْحَانَكَ
لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا
إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ

صَدَقَ اللَّهُ الْعَظِيمُ

سورة البقرة - آية (٣٢)

Acknowledgement

*First and foremost, thanks to **ALLAH** the Most Gracious and the Most Merciful for giving me the strength, knowledge, ability and opportunity to undertake this research study and to complete it satisfactorily. Without his blessings, this achievement would not have been possible.*

*I would like to express my deepest gratitude, thanks and gratefulness to **Prof. Dr. Amina Mohammad Hamdy**, Professor of Fixed Prosthodontics, Crown and Bridge Department, Faculty of Dentistry, Ain Shams University, for her enthusiastic support, continuous encouragement, valuable scientific advice and indispensable suggestion.*

*My sincere thanks to **Dr. Ahmed Khaled Abo Elfadl**, Associate Professor of Fixed Prosthodontics, Faculty of Dentistry, Ain Shams University, for his kind and meticulous supervision, support, help, valuable supervision all through the work.*

*Many thanks and sincere gratitude to **Dr. Gadah Abdel Fattah**, Associate Professor of Fixed Prosthodontics, Faculty of Dentistry, Ain Shams University, for his kind supervision encouragement and meticulous revision of this work.*

From the bottom of my heart Thank you for everything.

Mohamed Abdel Moniem Ahmed

Dedication

LIST OF CONTENTS

	<i>Page</i>
LIST OF TABLES	II
LIST OF FIGURES	IV
LIST OF ABBREVIATIONS.....	IX
INTRODUCTION.....	1
REVIEW OF LITERATURE	3
STATEMENT OF THE PROBLEM.....	35
AIM OF THE STUDY	36
MATERIALS & METHODS.....	37
RESULTS.....	67
DISCUSSION	95
LIMITATION OF THE STUDY.....	99
SUMMARY AND CONCLUSIONS.....	100
REFERENCES	101
ARABIC SUMMARY.....	-

LIST OF TABLES

Table no.	Title	Page
1	Brand names and manufacturers of the materials used in the study	37
2	Composition of katana UTML zirconia blank	38
3	Mechanical properties of katana UTML zirconia blank	38
4	Mechanical properties of Polyetheretherketone (PEEK)	39
5	Factorial analysis.....	41
6	Material properties of bone, implants and restorations.....	65
7	One Way Analysis of Variance test (ANOVA) followed by post HOC analysis using LSD	68
8	One Way Analysis of Variance test (ANOVA) followed by post hoc analysis using LSD	70
9	Effect of material type on crown and model micro strain in (Fixed bridge) implant restoration design.....	72
10	Effect of material type on crown and model micro strain in (Cantilever bridge) implant restoration design	74
11	Effect of material type on crown and model micro strain in (Separate crowns) implant restoration design.....	76
12	Comparison between the 3 Full ZR different implant restoration designs.....	79
13	Comparison between the 3 combined PEEK&ZR different implant restoration designs	82

Table no.	Title	Page
14	Two way ANOVA for the effect of design, material and combination between them on Crown micro strain	84
15	Two way ANOVA for the effect of design, material and combination between them on Model micro strain.....	85
16	Two way ANOVA for the effect of design, material and combination between them on Crown & Model micro strain ($\mu\text{m/m}$)	86

LIST OF FIGURES

Figure no.	Title	Page
1	Normal Stress	5
2	Shear Stress	5
3	Normal Strain	6
4	Shear Strain	6
5	UTML zirconia blank	38
6	Chemical composition Polyetheretherketone (PEEK).....	39
7	Monobond plus	40
8	Totalcem self-adhesive resin cement.....	40
9	Patient physical model	42
10	STL file of surface scan	42
11	3D printed model	43
12	Cone beam computed topography.....	43
13	Implant planning software	44
14	Fully guided surgical guide	44
15	3D printed implant placement guide supported with the corresponding metal sleeves	45
16	Surgical guide fixed on model & implant guided surgical kit.....	45
17	Initial guide sleeve	46

Figure no.	Title	Page
18	Depth & position controlled drilling	46
19	Mounting the first implant, second implant, and third implant	47
20	Model with 3 implants inserted	48
21	Implant Ti base abutment and screw	48
22	Scan body optical impression.....	49
23	Design of screw retained restoration	49
24	Restoration design occlusal view	49
25	Scan body conversion to Virtual Ti base.....	50
26	Design of screw retained peek base	50
27	Peek base design occlusal view	50
28	Scan body conversion to Virtual Ti base.....	51
29	Restoration design.....	51
30	Design of screw retained peek base	51
31	Peek base cantilever design occlusal view	51
32	Design of screw retained separate restorations	52
33	Separate Restorations design	52
34	Design of screw retained separate peek base.....	52
35	Milled full Zr restoration	53
36	Model with Full Zr restoration	53

Figure no.	Title	Page
37	Peek screw retained base	54
38	Peek screw retained base on model.....	54
39	Peek base and Zr crowns	54
40	Milled full Zr cantilever restoration.....	55
41	Model with Full Zr restoration	55
42	Peek base cantilever design.....	55
43	Cantilever Peek base on model.....	56
44	Cantilever Peek base and Zr crowns.....	56
45	Cantilever Peek base and Zr crowns on model	56
46	Milled separate full Zr restoration	57
47	Full ZR separate restoration screw channels	57
48	Separate Peek base and Zr crowns.....	57
49	Different implant restoration after bonding to Ti base	59
50	Strain gauges attached model & restoration	59
51	Lingual & buccal model & restoration strain gauge	60
52	Metal jegg.....	60
53	Vertical Load application on restoration and model.....	61
54	Diferrent finite models.....	63
55	Diferrent finite models.....	64
56	Load application.....	66
