Study of Some Physical Properties of Cast Mg Alloys

A Thesis Submitted in Partial Fulfillment of the requirement for The Master Degree
in Science (M.Sc.) in Physics

By:

Asmaa Hamed Ahmed Ayoub

B.Sc. in Material Physics, Faculty of Science, Ain Shams University, 2014

To Physics Department

Faculty of Science – Ain Shams University

Supervised by

Prof. Dr. / Gamila Al-Sayed Al-Ganainy

Professor of Solid State Physics, Physics Department, Faculty of Science,
Ain Shams University

Prof. Dr. / Mohamed Abdel Wahab Waly

Emeritus Professor, Casting Technology Department, Central Metallurgical Research and
Development Institute

Prof. Dr. / Mohsen Hussein Ali

Professor of Material Science, Physics Department, Faculty of Science,

Ain Shams University

2021

Study of Some Physical Properties of Cast Mg Alloys

Name: Asmaa Hamed Ahmed Ayoub

Degree: M. Sc.

Department: Physics

Faculty: Science

University: Ain Shams University

Graduation Date: 2014 - Ain Shams University

Registration Date: 10 / 4 / 2017

Grant Date: 2021

Acknowledgment

First and foremost, glory is to Almighty Allah, the Most Merciful, who bestowed upon me the abilities to complete this research project.

*It gives me great pleasure to express my gratitude to **Prof. Dr. Gamila Al-Ganainy**, my mentor and immediate supervisor, for her unwavering encouragement, constant guidance, meticulous recommendations, and astute criticism during the practical phase of this dissertation, as well as her inexhaustible patience during the correction phase. She was always focused on my objectives and aided me in achieving them. Her door was always open to me, and she was very giving with her time and counsel. Working with her throughout my master's program has taught me a great deal.*

*I'd also like to thank **Prof. Dr. Mohamed Waley**, who has been instrumental in promoting and planning this research, as well as keeping me informed about scientific advances and providing encouragement during the review.*

***Prof. Dr. Mohsen** is a fantastic supervisor. He inspires you to succeed while still supporting you when you don't. He has aided my development as a researcher by providing a fami'ly atmosphere and treating me as his daughter.*

*I'd also like to thank **prof. Dr. Madiha (Central Metallurgical Research and Development Institute)** for introducing me to advanced techniques for study. Moreover, she has been of great assistance and mercy to me. She possesses a level of emotional intelligence that I have yet to witness in the majority of individuals. It has been a tremendous joy, and I hope to work with her again in the future. And I'd like to express my gratitude to **Dr. Omar Hafez**, "Dr. Madiha's major pupil," as well as **Eng. Ali** for their help and assistance*

***Prof. Dr. Lobna (National Center of radiation Research & Technology, Atomic Energy Authority)** is not just one of the brightest people I've ever worked with, but she's also a gem of a person who is always prepared to provide a helping hand. All of this is wrapped up in a contagious smile!*

*As well as thanks to **Dr. Moustafa Shalaby**; "Dr. Lobna's major pupil," for his help and advice.*

*I also would like to express thanks to **Dr. Mohamed Ali**, (Institute of Al-Tabbin) for his collaboration with me and to **Dr. Mohamed Essa**, (Central Metallurgical Research and Development Institute) for the respective supervising.*

***Dr. Hayam** (Central Metallurgical Research and Development Institute) deserves special recognition for her assistance, encouragement, and grin.*

*My appreciation also extends to my colleagues in **Metal Physics laboratory**; **Nada, Amal, and Ayah** for helping me in different ways and encourage me and my colleagues **Wafaa**, and **Noura**.*

***Tarek** (a young coworker) is a brilliant and clever one who has assisted me in cutting my samples in a professional manner and deserves special thanks.*

*I'd also like to show my thankfulness to my **mother** and my sisters **Suzan** and **Hanan**, and my young brother **Mohamed** and my beloved uncle **Mokhtar** for always believing in me and supporting me to pursue my dreams by assisting me in every way they could through this difficult time.*

*To my **Dad** the man who has rested there. Thank you for everything and for believing me. May Allah rest his soul in peace!*

*I'd like to convey my gratefulness to my steady husband, **Moustafa**, for his unwavering love, for believing in me long after I'd lost faith in myself, and for sharing my desire to complete this mission, yet caring enough to love me even if I never did.*

*Thank you, my cute little daughter, **Halla**, for being in my life.*

Finally, I would like to thank Ain Shams University, Faculty of Science, Physics Department, Graduate Studies, for their financial support of my master's education in Egypt.

Thank you all

Asmaa Hamed Ayoub

Dedication

*To my Lovely husband,
Mustafa*

Table of contents

List of abbreviation	xiii
List of Figures	xvi
List of Tables	xx
Abstract	xxi
Chapter 1: Introduction.....	1
1.1 Introduction ..	1
1.2 Literature Review	3
1.3 Aim of Work.....	5
1.4 Layout of the Thesis	6
Chapter 2: Theoretical Background	8
2.1 Pure Magnesium	8
2.1.1 Atomic and Crystal Structure.....	8
2.1.2 Physical and Chemical Properties material	9
2.1.3 Electrical and Mechanical properties	10
2.2 Magnesium and Magnesium Alloys.....	11
2.2.1 Mg Alloys Designation	11
2.2.2 Progress of Magnesium Alloys.....	12
2.2.3 Classification of Magnesium alloys.....	14
2.2.4 Casting technique.....	14
2.2.5 Applications of Magnesium Alloys	16
2.3 Mechanical Characteristics	18
2.3.1 Stress and strain	18

2.3.2	Stress- Strain curve.....	19
2.3.3	Hardness.....	21
2.3.4	Creep	22
2.3.4.1	Types of creep testing.....	22
2.3.4.2	Vickers's microhardness tester	23
2.3.4.3	Indentation creep calculations.....	25
2.3.4.4	Creep mechanisms.....	27
2.4	Phase Diagrams.....	30
2.4.1	Mg-Sn phase diagram.....	30
2.4.2	Mg-Sb phase diagram.....	31
2.4.3	Mg-Bi phase diagram.....	32
2.4.4	Sn-Sb phase diagram.....	33
2.4.5	Sn-Bi phase diagram.....	34
2.5	Corrosion.....	35
2.5.1	Corrosion in magnesium alloys.....	36
2.5.2	Cathodic protection.....	39
2.5.3	Electrochemical tests for corrosion evolution.....	39
2.5.3.1	What is potentiostat?.....	39
2.5.3.2	Potentiodynamic polarization (<i>PDP</i>).....	39
2.5.3.3	Electrochemical impedance spectroscopy (<i>EIS</i>).....	40
Chapter 3: Experimental Work.....		45
3.1	Sample preparation.....	45
3.1.1	Casting and production process.....	45
3.1.2	Etching and metallographic preparation.....	47
3.2	Chemical analysis	48
3.2.1	X-ray fluorescence (XRF)	48
3.3	Microstructure examination	49
3.3.1	Optical microscopy (OM).....	49
