Faculty of Women for Arts,
Science and Education
Ain Shams University

Preparation, Characterization and Evaluation of New Biopolymers for Different Applications

*A Thesis Submitted for Degree of M.Sc. in
Organic Chemistry*

By

**Shimaa Khaled Farouk Sayed
(B.Sc. of Chemistry 2016)**

To

**Chemistry Department
Faculty of Women for Arts, Science and Education
Ain Shams University
Cairo, Egypt**

Supervised By

Prof. Dr. Howida T. Zaky

Professor of Organic Chemistry
Chemistry Department
Faculty of Women for Arts,
Science and Education
Ain Shams University

Prof. Dr. Nadia G. Kandile

Professor of Applied Organic Chemistry
Chemistry Department
Faculty of Women for Arts,
Science and Education
Ain Shams University

Assis. Prof. Dr. Abir S. Nasr

Assistant Professor of Organic Chemistry
Chemistry Department
Faculty of Women for Arts, Science and Education
Ain Shams University

(2021)

Faculty of Women for Arts,
Science and Education
Ain Shams University

Approval Sheet

Preparation, Characterization and Evaluation of New Biopolymers for Different Applications

By

Shimaa Khaled Farouk Sayed

Supervisor Committee:

Thesis approved

Prof. Dr. Howida T. Zaky

.....

Prof. Dr. Nadia G. Kandile

.....

Assis. Prof. Dr. Abir S. Nasr

.....

Head of Chemistry Department

Prof. Dr. Omya Ahmed Moustafa

(2021)

Faculty of Women for
Arts, Science and Education
Ain Shams University

Qualification

Name : Shimaa Khaled Farouk Sayed

Science Degree : Bachelor Degree

Department : Chemistry

College : Faculty of Women for Arts,
Science and Education

University : Ain Shams University

B.Sc. Graduation Year : 2016

Acknowledgment

- I would like to express my sincere gratitude to my advisor **Prof. Dr. Howida T. Zaky**, Professor of Organic Chemistry, Chemistry Department, Faculty of Women, Ain Shams University, for her keen interest, encouragement, continuous guidance during the course of this work and invaluable advice during my research. She gave me the opportunity to do this wonderful project, which also helped me in doing a lot of research and I came to know about so many new things I am really thankful to her.
- I am deeply indebted to my respected **Prof. Dr. Nadia G. Kandile**, Professor of Applied Organic Chemistry, Chemistry Department, Faculty of Women, Ain Shams University, for her keen interest, encouragement, kind supervision, was a great help through the course of this research work. She managed me in the right direction and provided me with all the necessary facilities.
- I would like to express my special thanks of gratitude to **Assis. Prof. Dr. Abir S. Nasr**, Assistant Professor of Organic Chemistry, Chemistry Department, Faculty of Women, Ain Shams University, for her continuous support during the process of researching and her good guidance.

نحيطكم علماً أن بحثكم المعنون بـ

" Modified Chitosan Hydrogels and Nano Hydrogels for Congo Red Removal from Aqueous System "

قد تم تحكيمه علمياً من أساتذة متخصصين في مجال البحث وتقرر قبوله للنشر في مجلة البحث العلمي في العلوم علي أن ينشر في عددها الورقي:

العدد: الثامن و الثلاثون لسنة 2021

الترقيم الدولي: (Print) (ISSN2356- 8364)

بالإضافة الي نشره الكترونياً (Online) (ISSN2356- 8372)

على موقع مجلة البحث العلمي في العلوم

Topic	Page
<i>Abstract</i>	-
<i>Aim of the work</i>	-
<i>Summary</i>	i
<i>Chapter I: Introduction</i>	1
1.1. Biopolymer	1
1.2. Classification of biopolymers	1
1.2.1. Classification of biopolymers according to their based material	2
1.2.2. Classification of biopolymers according to their structure	2
1.2.2.1. Natural biopolymers	3
1.2.2.2. Classification of biopolymers based on repeating unit	6
1.2.2.3. Synthetic biopolymers	7
1.3. Chitin	7
1.3.1. Source of chitin	7
1.3.2. Chemical structure of chitin	8
1.4. Chitosan	8
1.4.1. Extraction of chitosan	8
1.4.2. Chemical structure of chitosan	11
1.4.3. Chitosan forms	12
1.5. Modification of chitosan	13
1.5.1. Acylation	13
1.5.2. Alkylation	14
1.5.3. Carboxylation	15
1.5.4. Quaternization reaction	16
1.5.5. Schiff base modification of chitosan	17
1.5.6. Graft copolymerization modification	18
1.5.7. Epichlorohydrin cross-linked chitosan	19

Topic	Page
1.5.8. Glutaraldehyde cross-linked chitosan	20
1.6. Hydrogels	21
1.6.1. Classification of hydrogels	22
1.6.2. Hydrogels based on chitosan	22
1.6.2.1. Hydrogel formation via crosslinking of chitosan	22
1.7. Nanotechnology	23
1.7. 1. Nano particles	23
1.7.2. Nanohydrogels	24
1.7.3. Preparation of nano particles of chitosan	24
1.8. Sulfonamides	27
1.8.1. Synthesis of sulfonamide	28
1.8.2. Sulfonamides based on polymeric structure	29
1.9. Application of chitosan and its derivatives	31
1.9.1. Biological activity of chitosan	31
1.9.1.1. Antibacterial activity of chitosan	32
1.9.1.2. Antifungal activity of chitosan	33
1.9.2. Antioxidant activity	33
1.9.3. Wound dressings (Wound healing)	34
1.9.4. Drug Delivery	34
1.9.5. Wastewater treatment	36
1.9.5.1. Metal ions removal	36
1.9.5.2. Dyes removal	37
<i>Chapter II: Experimental work</i>	39
2.1. Materials	39
2.2. Methods	39
<i>Part I</i>	39
2.2.1. Preparation of diphenyl sulfone -3, 3'-disulfonyl chloride (DPS)	39
2.2.2. Preparation of hydrogel Cs-DPS-I	39

Topic	Page
2.2.3. Preparation of hydrogel Cs-DPS-G-II	40
2.2.4. Preparation of nanohydrogel NCs- DPS-III	40
2.2.5. Preparation of nanohydrogel NCs-DPS-G-IV	41
Part II	41
2.2.4. Synthesis of diphenyl ether - 4, 4'-disulfonyl chloride (DPE)	41
2.2.7. Preparation of hydrogel Cs	41
2.2.8. Preparation of hydrogel DPE-I	42
2.2.9. Preparation of hydrogel DPE-II	42
2.2.10. Preparation of nano hydrogel DPE-III	42
2.2.11. Preparation of nano hydrogel DPE-IV	43
2.3. Characterization of the prepared hydrogels	43
2.3.1. Fourier Transform Infrared analysis (FTIR)	43
2.3.2. Nuclear Magnetic Resonance analysis (NMR)	44
2.3.3. Elemental analysis	44
2.3.4. Thermogravimetric analysis (TGA)	44
2.3.5. X-Ray diffraction analysis (XRD)	44
2.3.7. Scanning Electron Microscope analysis (SEM)	45
2.3.7. Transmission electron microscope (TEM)	45
2.3.8. Solubility study	45
2.3.9. Swelling behavior	45
2.3.9.1. Determination of sol-gel fraction of the hydrogels	45
2.3.9.2. Effect of pH	46
2.3.9.3. Effect of temperature	46
2.4. Evaluation of the prepared hydrogels for different applications	46
2.4.1. Antimicrobial assay	46
2.4.1.1. Pathogenic strains	46
2.4.1.2. Determination of Inhibition Zone	47
2.4.1.3. Minimum Inhibitory Concentration (MIC) and Minimum	47

Topic	Page
Bactericidal Concentration (MBC)	
2.4.2. Drug delivery study	48
2.4.2.1. 5-Fluorouracil (5-FU) loading study	48
2.4.2.2.3. 5-Fluorouracil (5-FU) loading release study	49
2.4.2.2.1. Preparation of hydrogel Cs-DPS-I-Alg	49
2.4.3. Dye removal from aqueous solutions	50
2.4.3.1. Adsorption study	50
2.4.3.2. Reusability study	51
2.5. Statistical analysis	52
<i>Chapter III: Results and Discussion</i>	53
<i>Part I</i>	53
3.1. Preparation of diphenyl sulfone -3, 3`- disulfonyl chloride (DPS)	53
3.2. Preparation of hydrogels Cs-DPS-I and Cs-DPS-G-II	54
3.3. Preparation of nanohydrogels NCs-DPS-III and NCs-DPS-G-IV	55
3.4. Characterization of the prepared hydrogels Cs-DPS-I, Cs-DPS-G-II, NCs-DPS-III and NCs-DPS-G-IV	57
3.4.1. FTIR spectroscopy	57
3.4.2. Nuclear Magnetic Resonance analysis (NMR)	61
3.4.3. Elemental analysis	63
3.4.4. Thermogravimetric analysis (TGA)	65
3.4.5. X-Ray Diffraction (XRD) analysis	68
3.4.6. Scanning Electron Microscope (SEM)	70
3.4.7. Transmission Electron Mmicroscopy (TEM)	71
3.4.8. Solubility study	72
3.4.9. Swelling studies	73
3.4.9.1. Sol-gel fraction of the hydrogels	73
3.4.9.2. Effect of pH	74
3.4.9.3. Effect of temperature	75

Topic	Page
3.5. Evaluation of the prepared hydrogels Cs-DPS -I, Cs-DPS-G-II, NCs-DPS -III and NCs-DPS-G-IV for different applications	77
3.5.1. Antimicrobial assay	77
3.5.1.1. Inhibition zone of bacteria	77
3.5.1.2. Inhibition zone of fungi	80
3.5.1.3. Determination of Minimum Inhibitory Concentration (MIC) and Minimum Bactericidal Concentration (MBC) of the hydrogels	81
3.5.2. Drug delivery	82
3.5.2.1. Drug loading capacity and efficiency	82
3.5.2.2. In vitro drug release studies	83
3.5.2.2.1. Drug release at pH 1.2	83
3.5.2.2.2. Drug release at pH 7.4	84
Part II	86
3.6. Modification of chitosan hydrogels DPE-I, DPE-II, DPE-III and DPE-IV	86
3.6.1. Preparation of diphenyl ether - 4, 4` - disulfonyl chloride (DPE)	86
3.6.2. Preparation of hydrogels DPE-I and DPE-II	86
3.6.3. Preparation of nanohydrogels DPE-III and DPE-IV	86
3.7. Characterization of the prepared hydrogels	89
3.7.1. FTIR spectroscopy	89
3.7.2. Nuclear Magnetic Resonance analysis (NMR)	94
3.7.3. Elemental analysis	94
3.7.4. Thermogravimetric analysis (TGA)	95
3.7.5. X-Ray diffraction analysis (XRD)	98
3.7.6. Scanning Electron Microscope (SEM)	100
3.7.7. Transmission Electron Microscopy (TEM)	102
3.7.8. Solubility study	102
3.7.9. Swelling behavior	103

Topic	Page
3.7.9.1. Effect of pH	103
3.7.9.2. Effect of temperature	105
3.8. Evaluation of the hydrogels DPE-I, DPE-II, DPE-III and DPE-IV for different applications	106
3.8.1 In vitro antimicrobial activity	106
3.8.1.1. Inhibition zone of bacteria	106
3.8.1.2. Inhibition zone of fungi	109
3.8.1.3. Determination of (MIC) and (MBC) of the hydrogels	110
3.8.2. Dye removal	111
3.8.2.1. Adsorption of Congo red from aqueous solutions	111
3.8.2.1.1. Effect of contact time	111
3.8.2.1.2. Effect of initial pH solution	114
3.8.2.1.3 . Effect of sorbent dose	116
3.8.2.1.4 . Effect of CR dye concentration on adsorption	119
3.8.2.1.5. Isotherms studies	120
3. 8.2.1.6. Reusability study	121
Conclusion	124
