Title of Thesis:

Public Library Design From an Environmental Psychology Perspective: Case Study
of Bibliotheca Alexandrina, Egypt

Key Words:

Library, Psychology, Environment, Behaviors, Responses

Summary:

Physical environments are a combination of social rules, conventions, and expectations in a particular behavior setting. Although there are many aspects within environmental psychology, human spatial behavior is one of those aspects in which individuals' privacy, personal space, and territoriality are discussed. Therefore, studying the environmental psychology basics was important to understand how users behave in built spaces. This research aims to contribute a better understanding of the users' needs and expectations toward the library's environment. Highlighting the complex relationship between users and their environment by evaluating the UEIF framework variables on the library environment, emphasizing Bibliotheca Alexandrina. Evaluating of Bibliotheca Alexandrina's setting through the UEIF framework by using a self-report questionnaire and observation techniques. Results had indicated the validation of the hypothesis that the successful library environment had a direct positive impact on user's behavior, internal responses, and expectations.

Disclaimer

I hereby declare that this thesis is my own original work and that no part of it has been submitted for a degree qualification at any other university or institute.

I further declare that I have appropriately acknowledged all sources used and have cited them in the references section.

Dedication

This thesis dedicated to my mother, the pure and gentle soul who taught me that fear is not an option. Thank you for the unconditional love, support, and the good moral and values that you instilled in me. My best feeling is that I am a little piece of you, I am very proud to say that am your daughter. It was not possible to complete this thesis without you; since you are my source of inspiration.

Acknowledgments

I want to express my deepest appreciation to my thesis supervisors Professor Dr. Hisham Sherif Gabr and Dr. Noha Hossam Nashaat, for the unique knowledge and skills, continuous support, and the great effort involved in developing my master thesis. I have enjoyed the whole process because of the inspiration and encouragement from the amazing supervisors.

Furthermore, I would like to acknowledge my very profound gratitude to my family for their unlimited support throughout my study years. They always believed in me, and this accomplishment would not have been possible without them, with special thanks to my little sister and my husband for always believing in me and their support through the most challenging times.

Finally, I would like to thank all my close friends for being helpful throughout the dissertation process.
