PRODUCTION OF DEXTRANSUCRASE IN FREE OR IMMOBILIZED *LEUCONOSTOC* CULTURES

Thesis

Submitted to the Faculty of Science,

Alexandria University

By

Pahar Mohamed Fikry Fathy

B.Sc. in Microbiology 1991

In Partial Fulfillment of the Requirements

**for the Degree of
Master of Science**

In

Botany (Microbiology)

Supervised by

Prof. Dr. Samy A. El-Aassar

Professor of Microbiology

Faculty of Science

Alexandria University

Dr. Hoda H. Yusef

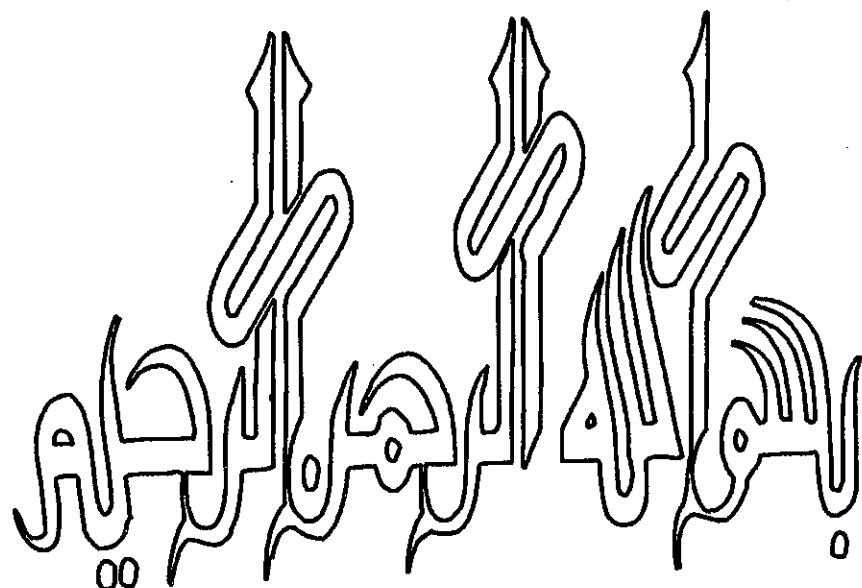

Lecturer of Microbiology

Faculty of Science

Alexandria University

**Botany Department
Faculty of Science - Alexandria University**

1996

وقل رب زدني علما

صدق الله العظيم

This thesis has not been previously submitted for a degree at this or any other university and is the original work of the writer

*It is a pleasure to dedicate
this Thesis to My Family*

CONTENTS

	Page
ACKNOWLEDGEMENT	
1. INTRODUCTION	1
1.1. Dextran and its applications	1
1.2. Microbial production of dextran and dextransucrase ...	5
1.3. Immobilization of microbial cells and enzymes	7
1.4. Production of dextran by immobilized cells or enzyme	12
1.5. Purification of dextransucrase	13
2. MATERIALS AND METHODS	15
2.1. Materials	15
2.1.1. Microorganism	15
2.1.2. Culture media	15
2.1.2.1. Deep liver broth medium (maintenance medium)	15
2.1.2.2. Sucrose-agar medium (slant agar)	16
2.1.2.3. Sucrose mineral medium (production medium)	16
2.1.3. Chemicals	16
2.2. Methods	17
2.2.1. Maintenance of stock culture	17
2.2.2. Cultivation of the bacteria for dextran and dextransucrase production	17

	Page
2.2.3. Analysis of dextran	18
2.2.3.1. Infra-red spectra	18
2.2.3.2. Molecular weight estimation	18
2.2.4. Analysis of fermentation products	19
2.2.4.1. Estimation of dextran	19
2.2.4.2. Preparation of the crude enzyme	19
2.2.4.3. Estimation of protein content	19
2.2.4.4. Assay of dextransucrase enzyme activity	20
2.2.4.5. Determination of dry weight	20
2.2.5. Immobilization of bacterial cells by entrapment	21
2.2.6. Immobilization of dextransucrase enzyme	21
2.2.7. Air bubble column	22
2.2.8. Purification of dextransucrase enzyme produced by <i>Leuconostoc mesenteroides</i>	23
2.2.8.1. Partial purification	23
a) Fractionation by salting-out with ammonium sulphate	23
b) Fractional precipitation with acetone	24
2.2.8.2. Column chromatography	25
a) Gel filtration	25
b) Ion-exchange chromatography on CM-Sephadex C-50	26

3. RESULTS	27
3.1. Effect of different incubation periods on the production of dextran and dextransucrase enzyme by <i>Leuconostoc mesenteroides</i>	27
3.2. Effect of sucrose concentration on the production of dextran and dextransucrase enzyme by <i>Leuconostoc mesenteroides</i>	30
3.3. Effect of yeast extract concentration on the production of dextran and dextransucrase enzyme by <i>Leuconostoc mesenteroides</i>	30
3.4. Effect of $\text{MgSO}_4 \cdot 7\text{H}_2\text{O}$ concentration on the production of dextran and dextransucrase enzyme by <i>Leuconostoc mesenteroides</i>	35
3.5. Effect of K_2HPO_4 concentration on the production of dextran and dextransucrase enzyme by <i>Leuconostoc mesenteroides</i>	38
3.6. Effect of initial pH value of the culture on the production of dextran and dextransucrase enzyme by <i>Leuconostoc mesenteroides</i>	38
3.7. Effect of calcium carbonate (CaCO_3) concentration on the production of dextran and dextransucrase enzyme by <i>Leuconostoc mesenteroides</i>	43
3.8. Effect of mineral salts mixture concentration on the production of dextran and dextransucrase enzyme by <i>Leuconostoc mesenteroides</i>	43

	Page
3.9. Effect of different vitamins on the production of dextran and dextransucrase enzyme by <i>Leuconostoc mesenteroides</i>	48
3.10. Effect of tween 80 concentration on the production of dextran and dextransucrase enzyme by <i>Leuconostoc mesenteroides</i>	48
3.11. Production of dextran and dextransucrase enzyme by <i>Leuconostoc mesenteroides</i> cells entrapped in Ca-alginate	48
3.12 Effect of different alginate concentrations on the production of dextran and dextransucrase enzyme by entrapped <i>Leuconostoc mesenteroides</i>	60
3.13 Effect of different sizes of bead inoculum on the production of dextran and dextransucrase enzyme by entrapped <i>Leuconostoc mesenteroides</i>	63
3.14 Effect of cultivation in an air bubble column on the production of dextran and dextransucrase enzyme by entrapped <i>Leuconostoc mesenteroides</i>	63
3.15 Effect of reusing the entrapped <i>Leuconostoc mesenteroides</i> cells on the production of dextran and dextransucrase enzyme	67
3.16. Analysis of dextran produced by <i>Leuconostoc mesenteroides</i>	72

	Page
3.17. Purification of the dextransucrase enzyme produced by <i>Leuconostoc mesenteroides</i>	72
3.17.1. Partial purification	75
3.17.2. Column chromatography of the partially purified enzyme	79
3.18. Immobilization of dextransucrase enzyme on different supports	90
3.19. Effect of substrate concentration on the activity of free and immobilized dextransucrase preparations	91
3.20. Effect of temperature on the activity of free and immobilized dextransucrase enzyme preparations	96
3.21. Effect of pH values on the activity of free and immobilized dextransucrase enzyme preparations	96
3.22. Thermal stability of free and immobilized dextransucrase enzyme preparations at pH 5.2	99
3.23. Effect of some ions and inhibitors on free and immobilized dextransucrase enzyme	104
4. DISCUSSION	107
5. SUMMARY	122
6. REFERENCES	127

ARABIC SUMMARY

ACKNOWLEDGEMENT

The writer wishes to express her grateful thanks and deep appreciation to Prof. Dr. Samy A. El-Aassar, who suggested the topic of this thesis and who meticulously supervised the execution of the experimental studies and for his help in the preparation and revision of the manuscript.

She also wishes to express her sincere thanks and special appreciation to Dr. Hoda H. Yusef, Lecturer of Microbiology for her supervision, valuable suggestions during the work and for her great help in the preparation and revision of the manuscript.

Sincere thanks are also expressed to Prof. Dr. Abd El-Mohsen S. Ismail of the National Research Centre at Giza for providing the bacterial culture.

Words of thanks to Dr. Moustafa El-Naggar for his kind help in the work concerned with the analysis of dextran.

Profound thanks and heart felt gratitude to Prof. Dr. Abd El-Fattah El-Walily Q. C. Division Director in the Pharco Pharmaceuticals Company for his great help, encouragement and continuous advice.

The writer also wishes to express her gratitude and heart felt thanks to her colleagues in the Q.C. Laboratory in Pharco Pharmaceuticals Company.

Grateful thanks are also expressed to my parents and husband for their kind help and continuous encouragement during the work.
