**CALCIUM-DROUGHT INTERACTIONS ON CARBON
STRATEGY, MEMBRANE DISORDERS AND SOME
RELATED METABOLIC PROCESSES OF *HELIANTHUS
ANNUUS* L., *VICIA FABA* L. AND *ZEA MAYS* L.**

A Thesis

Submitted For The Degree Of

Ph. D. in Botany

(Plant Physiology)

By

Abdul Baset Mohammed Ahmed El-Hakimi

M.Sc. (Botany) Assiut University

Supervised by

Prof. Dr.

Ahmed Mostaffa Ahmed Hamad

Professor of Plant Physiology

Prof. Dr.

Mohamed Ali Zidan

Professor of Plant Physiology

Prof. Dr.

Refat Abdel-Basset Mohamed

Professor of Plant Physiology

Botany Department-Faculty of Science

Assiut University, Egypt

1999

TO MY FAMILY AND MY WIFE

**THIS THESIS HAS NOT PREVIOUSLY BEEN SUBMITTED FOR
ANY DEGREE AT THIS OR AT ANY OTHER UNIVERSITY.**

ACKNOWLEDGMENTS

ACKNOWLEDGMENTS

I would like to express my sincere thanks and appreciation to **Prof. Dr.** A. M. Ahmed-Hamed, **Prof. Dr.** Mohamed Ali Zidan and **Prof. Dr.** Refat Abdel-Basset Botany Department, Faculty of Science, Assiut University, Assiut for suggesting and supervising this work.

Sincere thanks are also due to **Prof. Dr.** I. A. El-Kady, Head of Botany Department, Faculty of Science, Assiut University, Egypt, for his continuous encouragement and facilities offered.

Sincere thanks are also due to all members of Botany Department, Faculty of Science, Assiut University Assiut, Egypt for valuable help and generous hospitality.

Special thanks and gratitude are also due to the University of Taiz, Republic of Yemen for continuous encouragement and financing my stay in Egypt.

Abdul baset El-Hakimi

Faculty of Science
Taize University

Yemen

CONTENTS

CONTENTS

	Page
INTRODUCTION	1
MATERIALS AND METHODS	13
Culture technique	13
- Determination of transpiration rate	14
Growth criteria	14
- The determination of leaf area, fresh and dry weight	14
- determination of photosynthetic pigments	15
Photosynthesis and respiration	15
Determination of maintenance respiration and growth efficiency	16
Determination of cell membrane stability index	17
UV-absorbing metabolites	18
Cell wall components	18
- Extraction and purification of cell wall material	18
Cell wall fractionation	19
1- Pectins	19
2- Hemicellulose fraction	19
3- Cellulose fraction	20
Cell wall-associated proteins	20
Determination of carbohydrates	20
Determination of proteins	21
- Soluble proteins	21
- Insoluble proteins	22
- Total protein contents	22
- Determination of free proline	23
- Determination of free amino acids	23

Lipids	24
- Lipid extraction and purification	24
- Thin layer chromatography	24
* Estimation of glycolipids	25
* Estimation of phospholipids	25
* Estimation of total sterols	25
Determination of mineral elements	26
- Sodium and potassium	26
- calcium and magnesium	26
- Phosphorus	27
RESULTS	29
- Water relations: Transpiration rate and relative water content	29
- Growth	32
a- Fresh and dry weight	32
b- Leaf area	39
c- Photosynthetic pigments	39
- Photosynthesis	48
- Respiration	54
- Maintenance respiration and growth efficiency	61
- Membrane stability index and ion leakage	70
- Cell wall polysaccharides	77
a- Pectins	77
b- Cellulose	79
c- Hemicellulose	81
- Cell wall-associated proteins	96
- Soluble sugars and starch pools	97
- Nitrogenous components	107
- Proteins	107

III	
- Proline and other free amino acids	121
- Lipids and lipid fractions	124
- Inorganic cations	144
- Sodium	144
- Potassium	145
- Calcium	146
- Magnesium	146
- Phosphorus	147
DISCUSSION	167
SUMMARY	196
REFERENCES	199
ARABIC SUMMARY
