# **Bacteriological And Mycological Studies On Skin Affections Among Buffaloes In Egypt**

Thesis submitted

By

**Hanan Ezzat Nagib Moustafa**

B.V.Sc., Cairo University (1988)

For The Degree Of

Master in Veterinary Science

(Bacteriology, Immunology and Mycology)

Under Supervision of

**Prof. Dr. Mamdouh Abd El-Ghani**

Prof. of Microbiology

Faculty of Veterinary Medicine

Cairo University

**Dr. Nagat Ahmad Saleh**

Cheif researcher of Mycology

Buffalo Diseases and Research Department

Animal Health Research Institute

Dokki, Giza

### Approval Sheet

This is to approve that the dissertation presented by **Hanan Ezzat Nagib** to Cairo University , for the degree of Master degree in Veterinary Science (*Bacteriology, Immunology and Mycology*) has been approved by the examining committee:

**1- Prof. Dr. Adel Mahmoud Abd El-Magid Khaled.**  
Prof. of Microbiology Department.  
Faculty of Veterinary Medicine,  
Moshtohor.

*A. Khaled*

**2- Prof. Dr. Salah El-Din Abd El-Karim Selim.**  
Emeritus Prof. of Microbiology Department  
Faculty of Veterinary Medicine  
Cairo University.

*SW*

**3- Prof. Dr. Mamdouh Abd El-Ghani Abd El-Aziz**  
Prof. of Microbiology Department  
Faculty of Veterinary Medicine, Cairo University  
(Supervisor)

*M. Abdel Ghani*

Date: 19/5/2001

## ACKNOWLEDGEMENT

I would like to express my profound gratitude to **Professor Dr. Mamdouh Abd El-Ghani Abd El-Aziz** Professor of Microbiology, Faculty of Veterinary Medicine, Cairo University, under whose supervision , I had the honour of working . He spared no effort or time in guiding and leading me in each step needed to perform this work . Where if not for this helping hand and great generosity, this work could not have been undertaken.

I wish also to express my sincere appreciation and gratitude to **Professor Dr. Nagat Ahmed Saleh** , Buffaloes Diseases Department, Animal Health Research Institute , Dokki for her faithful guidance and assistance during the coarse of this work.

Appreciation is also to **Dr. Emad Rizkalla Zaki** Researcher of Bacteriology , Buffaloes Diseases Department, Animal Health Research Institute , Dokki for his great efforts and encouragement for the preparation and completion of this work.

I'm deeply grateful to **Dr. Ramadan Mostafa Salem** , Researcher of Mycology Department , Animal Health Research Institute , Dokki for lightening the technical difficulties in the laboratory and made them most pleasant by close association and encouragement.

*Dedicated to*

*My kids*

*Mohammad*

*and*

*Yara*

# LIST OF CONTENTS

Title	page
1 INTRODUCTION	1
2 REVIEW OF LITERATURE.	4
2.1. Historical.	4
2.2.Frequency and types of bacterial affections in bovine skin:	7
2.3.Frequency and types of fungal affections in bovine skin.	14
2.4 In vitro sensitivity to different chemotherapeutic agents.	44
3. MATERIAL AND METHODS	49
3.1. Materials:	49
3.1.1. Samples:	49
3.1.2. Media.	49
3.1.3. Antibiotic sensitivity disks.	57
3.1.4.Antifungal drugs.	57
3.1.5 Stains.	58
3.1.6.Reagents and solutions.	58
3.2 METHODS	61
3.2.1 Collection of samples.	61
3.2.2. Laboratory examination of the collected samples.	62

<b>4 RESULTS</b>	<b>79</b>
<b>4.1- Prevalence rate of mycotic and bacterial affections in examined buffaloes.</b>	<b>79</b>
<b>4.2- Distribution of the isolated positive cases.</b>	<b>82</b>
<b>4.3-Prevalence rate of different species of fungi obtained pure causing skin affection in buffaloes.</b>	<b>85</b>
<b>4.4- concurrently mixed fungi in diseased buffaloes showing skin affection.</b>	<b>87</b>
<b>4.5-frequency and types of fungi in combination with bacteria as mixed infection from buffaloes with skin affections.</b>	<b>89</b>
<b>4.6- characterization of fungal isolates recovered from diseased buffaloes.</b>	<b>92</b>
<b>4.7. Distribution of affected mycotic lesions on different parts of buffaloes.</b>	<b>103</b>
<b>4.8. Effect of age on the incidence of mycotic and bacterial affections of skin of buffaloes.</b>	<b>107</b>
<b>4.8.1. Buffalo-calves below one year old.</b>	<b>107</b>
<b>4.8.2. Buffalo-calves aged between 1-2 years old.</b>	<b>110</b>
<b>4.8.3. Adult buffaloes above 2 years old.</b>	<b>112</b>
<b>4.9. Correlation between microorganisms recovered from skin affections of buffaloes and their time of isolation at various seasons.</b>	<b>114</b>
<b>A- In summer</b>	<b>114</b>

B- In autumn	115
C- In winter	116
D- In spring	116
4.10. Response of <i>S. aureus</i> , <i>C. pseudotuberculosis</i> and <i>Str. Pyogenes</i> to various chemotherapeutic agents in vitro.	119
4.11. Response of <i>S. epidermidis</i> , <i>E. coli</i> , <i>P. aeruginosa</i> and <i>P. pseudoalkaligenes</i> to chemotherapeutic agents in vitro.	120
4.12. Studies on the efficiency of various anti- fungal drugs in vitro.	124
5. DISCUSSION.	127
6 SUMMARY	144
7 REFERENCES	147

# LIST OF TABLES

Table No.	Title	page
1	Interpretation of reaction on TSI medium.	56
2	Differentiation of Staphylococcus into species.	72
3	Differentiation of Streptococcus species	73
4	Differentiation of Corynebacteria into species.	74
5	Key characteristics of the family Pseudomonadaceae.	75
6	Differential characteristics of Enterobacteriaceae.	76
7	Interpretation of zones of inhibition in agar diffusion Method for antibacterial susceptibility.	78
8	Prevalence rate of mycotic and bacterial affections in examined buffaloes.	80
9	Distribution of positive cases according to the type of infection.	83
10	Prevalence rate of different types of fungi isolated from skin affections in pure forms.	86
11	Incidence and types of fungi recovered as mixed infection from buffaloes with skin affections.	88
12	Frequency and types of fungi combined with bacteria as mixed infections from buffaloes with skin affections.	90
13	Distribution of affected mycotic lesions on different parts of buffalo's body.	105
14	Fungal and bacterial isolates recovered from buffalo calves below one year old.	109
15	Fungal and bacterial isolates recovered from buffalo calves between 1-2 years old.	111

16	Fungal and bacterial isolates obtained from adult buffaloes above 2 years old.	113
17	Correlation between skin affections in buffaloes and their time of isolation at summer and autumn seasons.	117
18	Correlation between skin affections in buffaloes and their time of mycotic and bacterial isolation at winter and spring seasons.	118
19	Results of chemotherapeutic sensitivity tests on <i>S. aureus</i> , <i>C. pseudotuberculosis</i> and <i>Str. Pyogenes</i> isolated from diseased buffaloes	122
20	Results of chemotherapeutics sensitivity tests on <i>S.epidermidis</i> , <i>E. coli</i> , <i>P. aeruginosa</i> and <i>P. pseudoalkaligenes</i> isolated from diseased buffaloes.	123
21	Results of antimycotic sensitivity tests for the most prevalent fungi isolated from buffaloes.	125
