Approval sheet for submission

Name of candidate:

Mahmoud Abdellatief Mahmoud Ahmed

Degree:

M.Sc. Degree in Chemistry

Thesis title:

Modern Analytical Methods for the Assessment of Some Neurotransmitters in Human Body by Using Nano Optical Sensors.

A thesis has been approved by supervisor committee:

1-Prof. Dr. Mohamed Said Attia **……**

Professor of Analytical Chemistry, Faculty of Science, Ain Shams University

2-Prof. Dr. Ahmed Osman Youssef **……**

Professor of Analytical Chemistry, Faculty of Science, Ain Shams University

3-Prof. Dr. Mahmoud Ahmed Abdel-Ghani **……**

Professor Animal production - Faculty of Agriculture - Suez Canal University

Approval:

Prof. Dr.: Ayman Ayoub Abdel-Shafi **……**
Chairman of Chemistry Department

Chemistry Department
Faculty of Science
Ain Shams University

Name: Mahmoud Abdellatief Mahmoud Ahmed

Degree: M. Sc.

Department: Chemistry

Faculty: Science

University: Ain Shams University

Registration Date: / /

Grant year: 2021

Acknowledgment

First of all, I would like to say "Alhamdulillah" (thank Allah), for giving me the strength and health to do this work until it was done.

It is a pleasure to thank my supervisors for ***Prof. Dr. Mohamed Said Attia*** *for his expertise, kindness and most of all for his patience. I believe that one of the main gains of this thesis was working with Prof. Dr. Mohamed Said and gaining his trust and friendship. He is advising me during this work about the technical work with relevant discussions and for numerous simulating supports with experimental steps, also for getting through the difficult days.*

. I would like to gratefully acknowledge for ***Prof. Dr. Ahmed Osman Youssef*** *(for giving me permission to commence this thesis in the first instance), to do necessary research work and for his kind assistance with giving wise advices, helping in various applications, his continuous guidance and for helping me to run smoothly in this thesis.*

It is difficult to overstate my gratitude to my closest supervisor ***Prof. Dr. Ahmed Mahmoud Abdel-Ganey*** *who introduced me to the field of analytical chemistry with his enthusiasm, his inspiration and his great efforts to explain things simply and clearly, he provided me encouragement, sound advice, good company and lots of good ideas.*

Finally, I owe my loving thanks to my Mother, my Father, my Brothers and my Wife, without their encouragement and understanding my target, it would have been impossible for me to finish this work without them.

Best Regards
Mahmoud Shaheen

Abstract	**xvi**
Aim of the work	**xix**
Chapter 1	**Page**
General Introduction	
1.1. Basics of luminescence.	1
1.2. The Fluorescence Process.	2
1.3. Theory of Fluoresence Spectroscopy.	5
1.3.1. Photoluminescent Energy Level Diagrams.	6
1.3.1.1. Collisional deactivation (external conversion)	9
1.3.1.2. Intersystem Crossing (10^{-9} s) .	9
1.3.1.3. Phosphorescence .	10
1.3.1.4. Fluorescence .	10
1. 3.1.5. Internal Conversion .	11
1.4. Advantages of Fluoresence Spectroscopy.	12
1.4.1. Sensitivity.	12
1.4.2. Specificity.	13
1.4.3. Wide Concentration Range.	13
1.4.4. Simplicity and Speed.	13

1.4.5. Low Cost. 14
1.5. Factors Affecting on Fluoresence Spectroscopy. 14
1.5.1. Fluorescence and Structure. 14
1.5.2. Effect of Solvent Nature. 16
1.5.3. Effect of Structural Rigidity. 17
1.5.4. Effect of Temperature. 17
1.5.5. Effect of pH. 17
1.5. 6 . Effect of Dissolved Oxygen. 18
1.5.7 . Effect of Concentration on Fluorescence. 19
1.6. Different Applications of Fluoresence and Phosphoresence Spectroscopy. 21
1.7. Schiff Base Gold (III) Complexes 24
1.7.1. Biological Activity of Gold(III) Complexes. 24
1.7.2. Using of Gold(III) Complexes as an Optical Sensors. 27
1.8. Sol-Gel. 31
1.8.1. Introduction to Sol-Gel. 31
1.8.2. Advantages of Sol-Gel Technique. 33
1.9. Literature Reviews 34
1.9.1. Lorazepam. 34

1.9.1.1. Introduction. 34
1.9.1.2. Different Methods for Determination of Lorazepam. 35
1.9.2. Diazepam. 39
1.9.2.1. Introduction. 39
1.9.2.2. Different Methods for Determination of Diazepam 40
Chapter two 47
Highly Sensitive and Selective Spectrofluorimetric Determination of Lorazepam in Urine and Serum Samples Using Gold(III) Complex.
2.1. Introduction 47
2.2. Experimental 50
2.2.1. Materials. 50
2. 2.2. Reagents 51
2.2.3. Apparatus 51
2.2.4. Gold (III)-Schiff base complex Preparation 52
2.2.5. Gold-Schiff base complex doped sol-gel nano-optical sensor preparation 53
2.2.6. Preparation of Lorazepam solutions and construction of calibration curve 55
2.2.7.Determination of Lorazepam in serum 55

solution
2.2.8. Determination of Lorazepam in urine solution 56
2.3. Result and Discussion. 57
2.3. 1. Characterization of the thin film . 57
2.3. 2. The Absorption and Emission Spectra 60
2.3.2. Effect of experimental experimental variables. 65
2.3.2.1. Effect of pH 65
2.3.2.2. Effect of solvent. 66
2.3.3. Analytical performance 68
2.3.3.1. Analytical parameters of optical sensor method. 68
2.3.4. Accuracy and precision of the method 70
2.3.5. Selectivity 71
2.3.6. Application to samples 71
2.4. Conclusion 74

Chapter three 75

Highly Sensitive and Selective Spectrofluorimetric Determination of Diazepam in Urine and Serum Samples Using Tb-OFL Complex.
