# **Systematic and ecological studies of the Diatom Flora of the coastal waters - Alexandria**

Thesis submitted to Oceanography Department, Faculty of Science,  
Alexandria University in partial fulfillment for the degree of  
Master of Science  
(Biological Oceanography)

B16456

By

***Hanan Mitwally Mahmoud***

Demonstrator, Oceanography Dept., Faculty of Science,  
Alexandria University  
B.Sc. General Oceanography, 1987

Supervised By

***Prof. Dr. Youssef Halim Youssef***

Professor of Biological  
Oceanography Department  
Faculty of science-  
Alexandria University

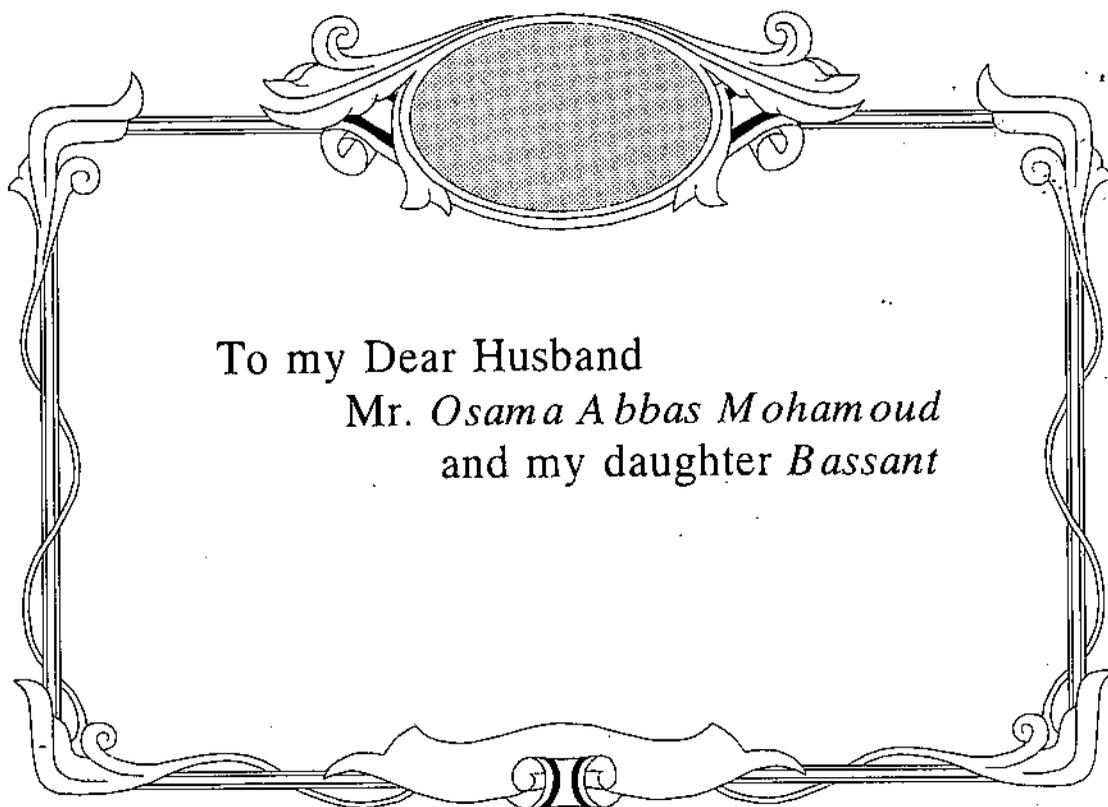

***Prof. Dr. Abdel Ghani N.Khalil***

Professor of Biological  
Oceanography Department  
Faculty of science-  
Alexandria University

***Dr. Manal M. Atta***

Lecturer of Biological Oceanography  
Oceanography Department  
Faculty Science - Alexandria University

**1993**

To my Dear Husband  
Mr. *Osama Abbas Mohamoud*  
and my daughter *Bassant*

## *Acknowledgement*

I wish to express my deep gratitude to **Professor Dr. Y. Halim** Professor of Biological oceanography and **Professor Dr. Abdel Ghani N. Khalil**, Professor of Biological oceanography, oceanography Department, Faculty of Science, Alexandria University for proposing the subject of this thesis.

It is my pleasure to express my deep appreciation and gratitude to **Prof. Dr. Y. Halim**, for his continuous encouragement and supervision of my work, his valuable suggestions and fruitful discussion at all stages of the thesis preparation. I am also indebted to him for his patience and for all the working facilities.

It is my great honor to express my deepest gratitude and Sincere thanks to **Prof. Dr. Abdel Ghani N. Khalil** for his supervision and his encouragement. His support, valuable and critical discussion and the time he gave to the revision are greatly appreciated. I thank him for all his efforts and assistance. Without their experience and references they provided me this work would never have been completed.

I am grateful to **Dr. Manal M. Atta** lecturer of Biological Oceanography, for her revision of the data of the practical part, for reading manuscript and for her pertinent advice.

My thanks also to both **Ms. Hoda H. El Rashidy** teaching assistant in Oceanography Department, **Ms. Nadia Badr El-Said** and **Ms. Amany A.A. Ismael** Demonstrators in the same Department for their help in writing the references and their cooperation.

My thanks are also due to **staff members of the oceanography Department.** Faculty of Science, Alexandria University for their cooperation and kind encouragement.

My thanks also to my sister **Ms. Manal. Mitwally** for her help in processing the plates of this thesis.

I am grateful to my parents and sisters for their continuous encouragement .

All my thanks and best gratitude to my Husband **Mr. Osama Abbas.** Taxaccountant for his cooperation, understanding and for his unfailing patience during the work for this thesis.

# Contents

	<i>Page</i>
Introduction .....	1
Chapter I. Material and Methods	
1.1. The Site .....	8
1.2. Stations .....	9
1.3. Sampling .....	10
1.4. Field measurements .....	11
1.5. Treatment of phytoplankton samples .....	11
1.5.1. Qualitative study .....	12
1.5.2. Quantitative study .....	13
1.5.2.1. Numerical standing crop .....	13
1.5.2.2. Biovolume measurements .....	13
1.5.2.3. Cleaning of frustules and preparation of permanent slides .....	15
1.5.2.3.1 Cleaning frustules .....	15
1.5.2.3.2 Preparation of permanent slides.....	16
1.5.2.3.3 Drawings and photographs .....	17
1.6. Analytical techniques	
1.6.1. Dissolved oxygen "DO".....	18

1.6.2. Salinity .....	18
1.6.3. Determination of reactive silicate .....	19
1.6.4. Determination of total nitrogen.....	20
1.6.5. Determination of total phosphorous .....	20
1.7. Statistical treatment of the data	
1.7.1. Diversity indices .....	21
1.7.1.1 Species diversity indices .....	21
1.7.1.2 Species richness indices .....	22
1.7.1.3 Evenness indices .....	23
1.8. Cluster analysis .....	23
1.9. Simple discriminant analysis .....	24
Chapter II :-      The physico chemical parameters and the hydrography of the Eastern Harbour.	
2.1. The physico - chemical parameters .....	25
2.1.1. Temperature ( $T_c^\circ$ ) .....	25
2.1.2. Salinity ( $S_{\text{‰}}$ ) .....	27
2.1.3. Density ( $\sigma_t$ ) .....	29
2.1.4. Transparency .....	29
2.1.5. Dissolved oxygen .....	31
2.1.6. Nutrient salts .....	33

2.1.6.1	Total phosphorus .....	33
2.1.6.2	Total nitrogen .....	35
2.1.6.3	Reactive silicate .....	37
2.1.6.4	Total nitrogen total phosphorous ratio .....	37

## 2.2. Hydrographical conditions in the Eastern

Harbour from August 1989 to August 1990 .....	40
2.2.1. Phase 1: August 1989 to mid September 1989.....	42
2.2.2. Phase 2: End. September 1989 to November 1989 .....	44
2.2.3. Phase 3: December 1989 to February 90 .....	45
2.2.4. Phase 4: March to June 1990 .....	47
2.2.5. Phase 5: July to August 1990 .....	48

## Chapter III :- The planktonic Diatom population of the

Eastern Harbour from August 1989 to August 90 .....	49
3.1. Role of Diatoms relative to the phytoplankton population.....	49
3.2. Structure of the Diatom poplation .....	53
3.3. Comparsion of the Eastern Harbour with the offshore population.	61
3.4. Comparison between the present observations and earlier records: Longterm changes .....	64

## Chapter IV :- Quantitative cycle of Diatoms

4.1. Phase 1: August 1989 to September 1989 .....	79
4.2. Phase 2: November 1989 to February 1990 .....	85
4.3. Phase 3: March to August 1990 .....	90
4.4. Conclusions .....	92
Chapter V :- Variability of cell volume in selected Diatom species.....	97
5.1. Size group .....	102
5.1.1. The smaller sized species .....	102
5.1.2. The medium sized species .....	103
5.1.3. The larger sized species .....	104
5.2. Classification according to the mode of size frequency curves....	105
5.2.1. The unimodal species .....	106
5.2.2. the bimodal species .....	109
5.2.3. The trimodal species .....	111
5.2.4. The tetramodal species .....	111
5.3. The statistical relation between average cell volume of perennial species and the environmental parameters .....	112
5.4. Conclusions .....	116

## Chapter VI: Statistical treatment of data

6.1. Diversity indices .....	119
6.1.1. Species diversity.....	119
6.1.2. Richness indices .....	121
6.1.3. Evenness indices .....	121
6.1.4. Relation between diversity indices and environmental parameters.....	125
6.1.5. Relation between diversity, richness equitability indices and the numerical Standing crop .....	126
6.2. Cluster analysis.....	132
6.2.1. Similarity indices .....	132
6.2.1.1 Euclidean distance .....	133
6.2.1.2 Percentage similarity .....	134
6.2.1.3 Bray curtis index .....	134
6.2.1.4 Relative Euclidean group distance .....	135
6.2.2. The first cluster group .....	136
6.2.3. The second cluster group .....	136
6.2.4. The Thrid cluster group .....	137
6.3. Simple discriminant analysis .....	139
6.3.1. Approach .....	139
6.3.2. Procedures .....	140
