PATHOLOGIC STUDIES ON THE EFFECT OF DITHIOCARBAMATE

B/7A.A

BY

ZEINAB MOHAMED LABIB

B.V.SC. ZAGAZIG UNIV.(1983)
Diploma of Applied Parasitology(1998)

UNDER THE SUPERVISION OF

Dr. ANISA M. H.MOUSTAFA

*Prof. Of Pathology Faculty of Vet .
Med.. Zagazig University*

Dr. MAHMOUD F.M.FAHAMY

*Prof. Of Pathology ,Faculty of Vet
Med, Zagazig University*

Dr. EL-SAYED R.A. EL-ATTAR

*Prof. Of Pathology Faculty of Vet,
Med. Zagazig University.*

Dr. ALI ABDU EL- EBEDY

*Director of Animal Health Research
institute – Dokki, Cairo*

*Thesis
Submitted to Zagazig University
For the Degree of
Master of. Vet. Medical Sciences
(Pathology)
Pathology Department
2001*

Zagazig university
Faculty of Vet. Medicine
Dep. of Pathology

Approval sheet

This is to approve that the dissertation presented by **zeinab Mohamed Labib** to Zagazig university entitled: (Pathologic studies on the effect of Dithiocarbamate) for the master Degree of Vet. Medical Sciences has been approved by the examining committee.

Prof. Dr Nabiha Ramadan Ali

Professor of Pathology
Faculty of Vet. Medicine
Cairo - university

Signature

Nabiha R.A. Hassan

Prof. Dr. Magdy Hassan Hafez

Professor of pathology and
Vice-Dean for students affairs
Faculty of Vet. Medicine
Zagazig university

Magdy H. Hafez

Prof. Dr. Anisa M. H. Moustafa

Professor of Pathology
Faculty of Vet. Medicine
Zagazig - university
(Supervisor)

Anisa M. H. Moustafa

Prof. Dr El – Sayed R.A. El- Attar

Professor of Pathology
Faculty of Vet. Medicine
Zagazig - university
(Supervisor)

El-Sayed R.A. El-Attar

Prof. Dr. Ali Abdu El-EbEdY

Director of Animal Health Research
Institute – Dokki – Cairo.

Ali Abdu El-EbEdY

8 /8/2001

ACKNOWLEDGEMENT

First of all thanks to **ALLAH** for making me finish this thesis which would not be completed without his help and good care.

I would like to my cardiac faithful thanks and great indebtedness to **Prof. Dr. Anisa M.H. Moustafa**, Prof. Of pathology, Faculty of Vet. Med., Zagazig University for here supervision, suggesting, supporting, continuous and helpful advice during the course of this work.

I wish to express my deepest appreciation and sincere gratitude to **Prof. Dr. El-Sayed R. A. E l-Attar** Prof. Of pathology, Fact of Vet. Med. Zagazig University, who have always found the time to provide the counseling, support, constructive advice and un limited help during preparation of this work to make this study possible.

My best thanks to **Prof. Dr, Mahamoud F. M. Fahamy** Prof. Of pathology, Faculty of Vet. Med., Zagazig University, for supervising this work.

Grateful appreciation and deepest thanks to **Prof. Dr. Ali Abdu El-Ebedy** Director of Animal Health Research Institute, Dokki, Cairo for his great help, supporting and supervising this work..

My grateful thanks to **Prof Dr. Osman Atallah** Emeritus Prof. of pathology, Faculty of Vet. Med., Zagazig University for the great help

My great thanks to **Prof. Dr. Alkelch Moustafa Alkelch** Prof. of Forensic Med. and Toxicology, Faculty of Vet. Med., Zagazig University for the great help.

Grateful thanks and appreciation extended to **Head and all staff members of pathology and forensic Med. & Toxicology Departments**, Faculty of Vet. Med. Zagazig University.

Also thanks extended to **Head and all members of Animal Health Research Institute, Tanta branch**

My deepest thanks to **Prof. Dr. Abo Baker Hazzaa** Prof. Of. Obstetrics and gynecology, Faculty of Vet. Med. Zagazig University for good help in part of male fertility.

I wish to record my great thanks to **Prof. Dr. Khairy M.El-Bioumy** Prof. And head of Animal production Faculty of Vet. Med. Zagazig University for his good help in statistic part in this work.

DEDICATED
to

My Family

CONTENTS

1-INTRODUCTION	1
2-REVIEW OF LITERATURE	4
▪ Exposure and uses of dithiocarbamate.	
▪ Teratogenicity of dithiocarbamate	
▪ Effect on male genital system (male fertility), with histopathologic examination correlated studies	
▪ Chronic pathological studies for 6 months on the different organs.	
3-MATERIALS AND METHODS	31
▪ -Determination of LD50, Teratological study (female fertility).	
▪ -Effect on male genital system (male fertility), with histopathological examination	
▪ -Chronic pathological study for 6 months on the different organs.	
4-Results.	45
5-DISCUSSION	113
6-SUMMARY & Conclusion	132
7-REFERENCES	139

-ARABIC SUMMARY	

LIST OF TABLES

The Number	Page
Table (1) Showing the experimental design of the work.	34
Table (2) Showing percentages of deaths after administration of different doses of dithane M-45	37
Table (3) Showing the schedule for the determination of acute oral LD50 of dithane M-45 in albino rats	45
Table (4) Showing the morphological examination of rat foeti obtained from dams administered orally dithane M-45 at a dose level 518.7mg/kg b.wt. (1/10 LD50) on 6-16 days of gestation.	51
Table (5) Showing the effect of oral administration of dithane M-45 in a dose of 518.7-mg/kg b. wt. (1/10 LD50) on pregnant rat on days 6th-16th days of gestation on skeleton and viscera.	52
Table (6) Showing mean values of testes weights and spermatozoa examination during oral administration of dithane M-45 at a dose level 518.7-mg/kg b.wt. (1/10 LD50) to male rats for 63 days.	55

LIST OF FIGURES

	Page
Fig. (1) Liver of rat during determination of oral LD50 of dithane M-45 showing portal infiltration with lymphocyte and vacuolation of hepatic cells. (H&E 300).....	66
Fig. (2) Lung of rat during determination of oral LD50 of dithane M-45 showing perivascular edema. (H&E 300).....	66
Fig. (3) kidney of rat during determination of oral LD50 of dithane M-45 showing perivascular lymphocytic aggregation and edema. (H&E 300).....	67
Fig. (4) Brain of rat during determination of oral LD50 of dithane M-45 showing submeningial aggregation of lymphocyte and edema (H&E 300).....	67
Fig. (5) Uterus of pregnant rat administered dithane M-45 showing increase sites of resorped foeti in the two horns black spots. (R).....	68
Fig. (6) Showing difference in size and retard growth of foeti from treated dam and control <u>C</u> - Foetus from non-treated dams . <u>D</u> - Foetus from dams orally administered by dithane M-45.....	68
Fig. (7) <u>C</u> - Foetus obtained from control non-treated dams. <u>D</u> - Malformed foetus obtained from a dam administered dithane M-45 showing absence of ossification of phalanges of fore and hind limbs (p) absence of some bones of sternbrae(s) and absence of coccygeal vertebrae(c) (Alizarin-red stain.....	69
Fig. (8) <u>C</u> - Foetus from non-treated dams. <u>D</u> - Malformed foeti obtained from dams administered dithane M-45 showing incomplete ossification of cranial bone specially each of occipital (o) and squamous (s) parts of tymportal bone with marked wide fontanella (f) and complete	

absence of phalanges (p) of fore and hind limbs and absence of some ribs (r) and coccygeal vertebrae(c) (Alizarin- red stain)..... 69

Fig. (9) C- Foetus from control non-treated dams. D- Malformed foeti obtained from dams administered dithane M-45 showing delayed ossification of cranial bones(cr), absence of carpal and metacarpal bones (ca) absence of some ribs (r), absence of thoracic, lumbar and sacral). vertebrae(v), caudal vertebrae (c). and absence of tarsus and metatarsus bones (t) (Alizarin- red stain)..... 70

Fig. (10) C- Foetus from non-treated dams. D- Malformed foeti obtained from dams administered dithane M-45 Showing cartilaginous formation of some part instead of bone formation, zygomatic arch (z), tympanic bulla (t), carpal and metacarpal bone (c), tarsus and metatarsus bone (t), and presence of wavy ribs (w). (Alican blue stain)..... 70

Fig. (11) C- Foetus from control non-treated dams D- Malformed foetus obtained from dams administered dithane M-45 Showing cleft plate (CL), bilateral anophthalmia (A) and homogeneous brain (H)..... 71

Fig. (12) C- Foetus from control non-treated dams. D- Malformed foeti obtained from dams administered dithane M-45 showing pressure atrophy of the brain (H), deep superior sagittal sinus (S)..... 71

Fig. (13) C- Foetus from control non-treated dams. D- Malformed foetus obtained from dams administered dithane.M-45 Showing distended urinary bladder (u), water sac surrounded lung and heart (c)..... 72

Fig. (14) C- Kidneys of foetus from control non-treated dams) D- Malformed foetus obtained from dams administered dithane M-45 showing heamorrhagic spots (H) and dilatation of renal pelvis (D)..... 72

Fig. (15) C- Brain of foetus from control non-treated dams. D- Malformed foetus obtained from dams administered dithane M-45 Showing hydrocephalus (H).....	73
Fig. (16) C- Testes from control non-treated rats. D-Testes obtained from rats administered dithane M-45 for 63 days showing hypertrophy.	73
Fig. (17) Tests of rats administered dithane M-45 for 63 days showing congestion of testicular blood vessels (1) and perivascular edema (2) (H&E X300).....	74
Fig. (18) Tests of rats administered dithane M-45 for 63 days showing interstitial edema among the degenerated (1) and necrosed seminiferous tubules (2). (H&E X300).....	74
Fig. (19) Tests of rats administered dithane M-45 for 4 months showing degeneration and necrosis of spermatogonial cells and spermatocytes of some of the seminiferous tubules (1). (H&E X300).....	75
Fig. (20) Tests of rats administered dithane M-45 for 5 months showing vacuolation and necrosis of most of the seminiferous tubules arrow (H&E X300).....	75
Fig. (21) Tests of rats administered dithane M-45 for 6months showing detachment of the spermatocytes in the lumina of seminiferous tubules arrow. (H&E X300).....	76
Fig. (22) Tests of rats administered dithane M-45 for 6 months showing necrosed spermatids and spermatid giant cells in the lumina of some seminiferous tubules arrow. (H&E X300).....	76
Fig. (23) High power of the previous figure to show the spermatids giant cells arrow. (H&E X1200).....	77
