Impact of Lifestyle Modification Module on Adherence to Therapeutic Regimen of Children and Adolescents with Beta Thalassemia Major

Thesis

*Submitted for Partial Fulfillment of the Requirements of
Doctorate Degree in Pediatric Nursing*

By

Rahma Elsayed Abdel Aziz Salem

*Assistant Lecturer of Pediatric Nursing
Faculty of Nursing- Ain Shams University
Master Degree in Pediatric Nursing (2017)
Ain Shams University*

**Faculty of Nursing
Ain-Shams University
2020**

Impact of Lifestyle Modification Module on Adherence to Therapeutic Regimen of Children and Adolescents with Beta Thalassemia Major

Thesis

*Submitted for Partial Fulfillment of the Requirements of
Doctorate Degree in Pediatric Nursing*

Supervised by

Prof/ Safy Salah Eldin Ibrahim AlRafay

*Professor and Head of Pediatric Nursing Department
Faculty of Nursing - Ain Shams University*

Prof/ Randa Mahmoud Asaad Sayed Matter

*Professor of Pediatrics
Faculty of Medicine- AinShams University*

Prof/Salma Elsayed Hassan

*Professor of Pediatric Nursing
Faculty of Nursing - Ain Shams University*

**Faculty of Nursing
Ain-Shams University
2020**

Acknowledgement

Foremost, I feel always indebted to **Allah** to whom I relate any success in First and achieving any work in my life.

*I would like to express my deepest gratitude and sincere appreciation toward **Prof. Safy Salah Eldin Ibrahim AlRafay**, Professor and Head of Pediatric Nursing Department, Ain Shams University, who devoted much of her time, effort, and generous advice for the completion of this work. Words can never express my hearty thanks and indebtedness to her valuable advice, experienced guidance and encouragement.*

*I would like to express my deepest appreciation to **Prof. Randa Mahmoud Asaad Sayed Matter**, Professor of Pediatric, Faculty of Medicine, Ain Shams University, who devoted much of her time and effort for the completion of this work.*

*I would like also to express my gratitude to **Prof. Salma Elsayed Hassan**, Professor of Pediatric Nursing, Faculty of Nursing, Ain Shams University, for her assistance, continuous directions and support throughout the whole work.*

Special thanks are also extended to all the study patients and their families who participate to establish this work.

List of Tables

Table No	Title	Page No.
	Tables in Results	
(1)	Distribution of the studied children and adolescents with β -TM according to their characteristics	129
(2)	Distribution of caregivers of β -TM children & adolescents according to their characteristics	131
(3)	Distribution of the studied children and adolescents with β -TM according to duration of disease, clinical manifestations and complications of beta thalassemia major	132
(4)	Distribution of the studied children and adolescents with β -TM according to their measurements	133
(5)	Distribution of the studied children and adolescents with β -TM according to their present history related to medications & complications	134
(6)	Distribution of the studied children and adolescents with β -TM according to their present history related to blood transfusions and its complications	136
(7)	Distribution of the studied children and adolescents with β -TM according to their informational needs about beta thalassemia major pre/post module	137
(8)	Distribution of the studied children and adolescents with β -TM according to effect of the disease on their daily living activities pre/post module	140

Table No	Title	Page No.
(9)	Distribution of the studied children and adolescents with β -TM according to their knowledge about beta thalassemia major pre/ post module.	143
(10)	Distribution of the studied children and adolescents with β -TM according to their knowledge about blood transfusion and iron pre/post module	145
(11)	Distribution of the studied children and adolescents with β -TM according to their knowledge related to puberty and its signs in females and males pre/post module	147
(12)	Distribution of the studied children and adolescents with β -TM according to their adherence to medication regimen pre/post module	150
(13)	Distribution of the studied children and adolescents with β -TM according to their adherence to diet regimen pre/post module	153
(14)	Distribution of the studied children and adolescents with β -TM according to their adherence to physical exercise regimen	156
(15)	Distribution of the studied children and adolescents with β -TM according to their adherence to follow up in outpatient clinic pre/post module	159

Table No	Title	Page No.
(16)	Matrix Correlation between study variables post implementation lifestyle modification module	164
(17)	Relation between characteristics of studied children and adolescents with β -TM and their total informational needs post implementation lifestyle modification module	166
(18)	Relation between characteristics of studied children and adolescents with β -TM and their total daily living activities post implementation lifestyle modification module	168
(19)	Relation between characteristics of studied children and adolescents with β -TM and their total adherence to medication regimen post implementation lifestyle modification module	170
(20)	Relation between characteristics of studied children and adolescents with β -TM and their total adherence to diet regimen post implementation lifestyle modification module	172
(21)	Relation between characteristics of studied children and adolescents with β -TM and their total adherence to physical exercise post implementation lifestyle modification module	174

Table No	Title	Page No.
(22)	Relation between characteristics of studied children and adolescents with β -TM and their total adherence to follow up post implementation lifestyle modification module	176
(23)	Relation between characteristics of studied children and adolescents with β -TM and their levels of perceived stress post implementation lifestyle modification module	178
(24)	Relation between characteristics of studied children and adolescents with β -TM and their sleep quality domains post implementation lifestyle modification module	180
(25)	Matrix Correlation between study variables post implementation lifestyle modification module	182

Table No	Title	Page No.
	Tables in Appendix	
(1)	Distribution of the studied children and adolescents with β -TM according to their stress pre/post module (n=80).	1
(2)	Distribution of the studied children and adolescents with β -TM according to their levels of perceived stress pre/post module	2
(3)	Distribution of the studied children and adolescents with β -TM according to their sleep pre/post module	3
(4)	Distribution of the studied children and adolescents with β -TM according to their sleep quality domains pre/post module	6

List of Figures

Figure No	Title	Page No.
	Figures in Review	
(1)	Definition of thalassemia	8
(2)	Inheritance of beta thalassemia	11
(3)	Signs and symptoms of thalassemia	19
(4)	Bone change of β -TM	24
(5)	Splenomegaly in children	25
(6)	The mechanism of gene therapy is illustrated	49

Figure No	Title	Page No.
	Figures in Results	
(1)	Percentage distribution of the studied children and adolescents with β -TM according to their total informational needs pre/post module	139
(2)	Percentage distribution of the studied children and adolescents with β -TM according to effect of the disease on their total daily living activities pre/post module	142
(3)	Percentage distribution of the studied children and adolescents with β -TM according to their total knowledge about beta thalassemia major pre/post module	149
(4)	Percentage distribution of the studied children and adolescents with β -TM according to their total adherence to medication regimen pre/post module	152
(5)	Percentage distribution of the studied children and adolescents with β -TM according to their total adherence to diet regimen pre/post module	155
(6)	Percentage distribution of the studied children and adolescents with β -TM according to their total adherence to physical exercise pre/post module	158
