Role of Neutrophil/Lymphocyte Ratio as an Indicator of Relapse in Multiple Sclerosis

Thesis

*Submitted for Partial Fulfillment of Master
Degree in Neurology and Psychiatry*

Presented by

Asmaa Mostafa Eissa

M.B.B.Ch.

Under supervision of

Prof. Dr. Nahed Salah Eldin Ahmed

Professor of Neurology

Faculty of Medicine – Ain Shams University

Prof. Dr. Eman Mahmoud Awad

Professor of Neurology

Faculty of Medicine – Ain Shams University

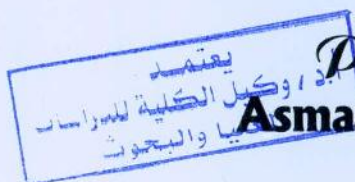

Dr. Mohamed Mahmoud Fouad

Lecturer of Neurology

Faculty of Medicine – Ain Shams University

*Faculty of Medicine
Ain Shams University*

2017

Handwritten signature in the bottom right corner.

First thanks to **ALLAH** to whom I relate any success in achieving any work in my life.

I wish to express my deepest gratitude to my parents for their care and support by being in my life. Special thanks to my professors, colleagues and friends in Nasser Institute hospital for their support and co-operation.

I am deeply thankful to **Prof. Dr. Mahed Salah Eldin**, Professor of Neurology Faculty of Medicine – Ain Shams University for her encouragement, generous help and support.

Special thanks to **Prof. Dr. Eman Mahmoud Awad**, Professor of Neurology Faculty of Medicine – Ain Shams University for her meticulous supervision.

I am deeply thankful to **Dr. Mohamed Mahmoud Fouad**, Lecturer of Neurology Faculty of Medicine – Ain Shams University for his great efforts and for help and guidance.

Ahmed Mostafa Edsa

Appendix	108
Arabic Summary	—

List of Tables

Table No.	Title	Page No.
Table (1):	Revised McDonald criteria 2010	19
Table (2):	Sex and co-morbidities distribution in the study group.	55
Table (3):	Age in the study group.	56
Table (4):	Age at the onset of the disease.	56
Table (5):	Total number of relapses since the onset of disease.	56
Table (6):	The main symptom of the presenting relapse.	57
Table (7):	Severity of the relapse.	58
Table (8):	EDSS score among the study population.	59
Table (9):	Treatment during the relapse.	59
Table (10):	Recovery from the relapse.	59
Table (11):	Total number of the MRI T2 lesions.	60
Table (12):	Location of the MRI lesions0	61
Table (13):	NLR values at relapse and remission.	61
Table (14):	Comparison between NLR at relapse and at remission.	63
Table (15):	Correlation between age of patients and NLR at relapse and remission.	64
Table (16):	Correlation between age of patients at the onset of disease and NLR at relapse and remission.	64
Table (17):	Correlation between total number of relapses and NLR at relapse and remission.	65
Table (18):	Correlation between EDSS score at the time of relapse and NLR at relapse and remission.	65
Table (19):	Correlation between the main symptom of relapse and NLR at relapse.	66
Table (20):	Correlation between the severity of the relapse and NLR at relapse.	67
