**Improve Quality of Life of their
Children with Chronic
Kidney Disease**

Thesis

*Submitted in Partial Fulfillment of the Doctorate
Degree in Pediatric Nursing*

By

Amany Ibrahim Abdalla Ibrahim

*Ass. Lecturer of Pediatric Nursing
Faculty of Nursing- Fayoum University
(2014)*

**Faculty of Nursing
Ain Shams University
2019**

**Empowerment Program for Mothers to
Improve Quality of Life of their
Children with Chronic
Kidney Disease**

Thesis

*Submitted in Partial Fulfillment of the Doctorate
Degree in Pediatric Nursing*

Supervisors

Professor/ Sabah Saad AL-Sharkawi

*Professor of Pediatric Nursing
Faculty of Nursing- Ain Shams University*

Professor/ Hyam Refaat Tantawi

*Professor of Pediatric Nursing
Faculty of Nursing- Ain Shams University*

Dr. Mohammad A. Moneim Yousef Sharaf

*Lecturer of Pediatrics and Pediatric nephrology
Faculty of Medicine- Ain Shams University*

**Faculty of Nursing
Ain Shams University**

2019

Acknowledgments

First and foremost, I feel always indebted to **Allah**, the **Most Beneficent and Merciful** who gave me the strength to accomplish this work,

My deepest gratitude to my supervisor, **Prof. Sabah Saad AL-Sharkawi**, Professor of Pediatric Nursing, Faculty of Nursing – Ain Shams University for her valuable guidance, expert supervision and meticulous revision in addition to her great deal of support and encouragement. I really have the honor to complete this work under her supervision.

-I would like to express my great and deep appreciation and thanks to **Prof. Hyam Refaat Tantawi**, Professor of Pediatric Nursing, Faculty of Nursing – Ain Shams University, for guiding me throughout this work and for granting me much of her time. I greatly appreciate her efforts.

I Would like to express my deepest gratitude to **Dr. Mohammad A. Moneim Yousef Sharaf**, Lecturer of Pediatrics and Pediatric nephrology, Faculty of Medicine, Ain shams University, for his kind supervision, generous help, and advising me thoroughly during this work.

Thanks a lot to all my professors and colleagues for their considerable care and support.

Special thanks to my **Parents**, my **Husband** and my **Daughters**, for their continuous encouragement, enduring me and standing by me.

Last but not least, I would also like to thank my patients and everyone helped me in this study.

✍ *Amany Ibrahim Abdalla Ibrahim*

Appendices	210
Arabic summary	

List of Tables

Table	Title	Page No.
<i>Tables related to review of literature</i>		
1	Stages of chronic kidney disease	13
2	Estimated energy allowance for children with CKD	39
3	Recommended dietary protein intake in children with chronic kidney disease.	40
4	Suggestions for child requiring a sodium-restricted diet	42
5	Sodium claims on food labels.	43
6	Potassium content of foods	44
7	Phosphorus content of foods	46
8	Recommended dietary phosphorus intake in children with chronic kidney disease	47
9	Insensible Fluid Losses	49
10	Advantages and disadvantages of early dialysis initiation	52

Table	Title	Page No.
	<i>Tables related to results</i>	
1	Distribution of the studied mothers according to their characteristics	106
2	Distribution of the studied children with chronic kidney disease according to their characteristics	108
3A	Distribution of the studied children according to their past medical history about chronic kidney disease	110
3B	Distribution of the studied children according to their past medical history about chronic kidney disease	112
4	Distribution of the studied children according to their anthropometric measurements, vital signs and laboratory investigations	114
5	Distribution of the studied children according to the stage of chronic kidney disease	116
6	Distribution of the studied mothers according to their knowledge about chronic kidney disease (pre and post intervention)	117

Table	Title	Page No.
7	Distribution of the studied mothers according to their knowledge about nutrition of children with chronic kidney disease (pre and post intervention)	119
8	Distribution of the studied mothers according to their knowledge about hydration status of children with chronic kidney disease (pre and post intervention)	121
9	Distribution of the studied mothers according to their knowledge about treatment of children with chronic kidney disease (pre and post intervention)	123
10	Distribution of the studied mothers according to their total knowledge about chronic kidney disease (pre/post intervention)	124
11	Distribution of the studied mothers according to their reported practice (pre/post intervention)	125
12	Distribution of the studied mothers regarding to their total reported practice (pre/post intervention)	127

Table	Title	Page No.
13	Distribution of the studied children according to their quality of life (pre and post intervention) (Physical functioning)	128
14	Distribution of the studied children according to their quality of life (pre and post intervention) (Emotional functioning)	130
15	Distribution of the studied children according to their quality of life (pre and post intervention) (Social functioning)	132
16	Distribution of the studied children according to quality of life domains mean scores (pre/post intervention) (School functioning)	134
17	Distribution of the studied children according to quality of life domains mean scores (pre/post intervention)	136
18	Distribution of the studied children according to their total level of quality of life (pre/post intervention)	137
19	Distribution of the studied mothers according to their family empowerment (pre and post intervention) (Family level)	138

Table	Title	Page No.
20	Distribution of the studied mothers according to their family empowerment (pre and post intervention) (Child's services level)	140
21	Distribution of the studied mothers according to their family empowerment (pre and post intervention) (Community / political participation level)	142
22	Distribution of the studied mothers according to family empowerment levels (pre/post intervention)	144
23	Comparison between stages of chronic kidney disease according to the studied mothers characteristics (pre/post intervention)	145
24	Comparison between stages of CKD according to total knowledge of the studied mothers (pre/post intervention)	147
25	Comparison between stages of chronic kidney disease according to the studied mothers reported practice (pre/ post intervention)	148

Table	Title	Page No.
26	Comparison between stages of CKD according to the studied children quality of life (pre/post intervention)	149
27	Relation between the studied mothers' characteristics and their knowledge (post/post intervention)	150
28	Relation between the studied mothers' characteristics and their level of reported practice (pre/post intervention)	152
29	Relation between the studied mothers' knowledge and their children's quality of life (pre/post intervention)	154
30	Relation between the studied mothers' reported practice and their children's quality of life (pre/post intervention)	155

List of Figures

Figure	Title	Page No.
<i>Figures related to review of literature</i>
