Acknowledgments

*First and foremost, I feel always indebted to **Allah**, the **Most Beneficent** and **Merciful** Who gave me the strength to accomplish this work,*

*I would like to express my sincere thanks and deepest appreciation to **Prof. Dr. Shadia Hamido**, Professor of Maternity & Gynecological Nursing, Faculty of Nursing, Ain Shams University, for her continuous supervision, prudent guidance, support and unlimited help through this work,*

*I would like to express my deep thanks and appreciation to **Prof. Dr. Sabah Metwally**, Professor of Maternity & Gynecological Nursing, Ain Shams University, for her guidance, fruitful comments and efforts to complete this work,*

*It is a great honor to express my sincere gratitude and deep appreciation to **Prof. Dr. Eman Mostafa**, Professor of Maternity & Gynecological Nursing, Faculty of Nursing, Ain Shams University, for her close supervision, cooperation, encouragement, constructive criticism, valuable guidance and unlimited time and efforts to complete this work,*

*Words cannot express my thanks, gratefulness, respect and love to **my Family and my Husband**, without their help, support, patience and encouragement; I would have never achieved any success.*

Furthermore, I would like to express my deep thanks to all female intern nursing students and women with emergency obstetric conditions who participate in this study for their cooperation.

 *Ezz Ibrahim Shawer*

Effect of Emergency Obstetric Protocol on the Performance of Interns Nursing Students

Abstract

Aim: evaluate the effect of emergency obstetric protocol on the performance of intern nursing students. **Subjects and Methods:** a quasi-experimental design was utilized. **Sample:** a convenient sample, all female (100) intern nursing students and Purposive sample, 59 conscious women with obstetric emergencies conditions who agreed to participate in the study and with non co- morbid condition. **Setting:** The study was conducted in technical institute of nursing Faculty of nursing and in emergency unit, intensive care unit and labor unit of Maternity Hospital Ain- Shams University. **Tools:** **Tool 1** self- administered structured questionnaire sheet, **Tool 2** obstetric triage tool, **Tool 3** observational checklist and **Tool 4** maternal satisfaction questionnaire sheet. **Results:** showed statistically significant improvement in intern nurses' knowledge and practical skills related to emergency obstetric care immediately post intervention and in follow up phase and increase women satisfaction level toward care provided by intern nurse, **study confirmed** statistically significant positive correlation between intern nurse's knowledge and practices related to emergency obstetric care post intervention and statistically significant positive correlation between intern nurse's knowledge, practices and women satisfaction post intervention. **Conclusion:** Implementing of emergency obstetric protocol had a positive effect on the performance of intern nursing students. **Recommendations:** Dissemination of emergency obstetric care protocol for all intern nursing students in technical nursing institutions for improving knowledge and practical skills of intern nurses about obstetric emergencies care.

Key words: Emergency Obstetric Protocol, Performance, Intern Nursing Students
