Educational Guidelines for Nurses' Competence Level Caring for Patients with Accidental Chest Trauma during Emergency Period

Thesis

Submitted for Partial Fulfillment of Doctorate Degree in Medical Surgical Nursing (Critical Care Nursing)

Under Supervision

Prof. Dr. Tahany El-Senousy

Professor of Critical Care Nursing Faculty of Nursing - Ain Shams University

Assis. Prof. Dr. Fatma Mostafa Mahrous

Assistant Professor of Medical-Surgical Nursing Faculty of Nursing - Ain Shams University

Assis. Prof. Dr. Shimaa Nabil Abd- Al Salam

Assistant Professor of Medical-Surgical Nursing Faculty of Nursing - Ain Shams University

Faculty of Nursing
Ain Shams University
2021

First and foremost praise and thanks are given to **ALLAH** who provided me, in his unlimited generosity with knowledge, and by his abundant aid this work has been done.

It is a great honor to express my sincere gratitude and deep appreciation to **Prof. Dr. Tahany El-Senousy, Professor of Critical Care Nursing, Faculty of Nursing Ain-Shams University.** Who gave me the honor of working under her supervision, for her careful and great support in this thesis and valuable and precious experience and she devoted her time for upgrading the knowledge and research issues.

It is a great honor to express my sincere gratitude and deep appreciation to **Assist. Prof. Dr. Fatma Mostafa Mahrous, Assistant Professor of Medical-Surgical Nursing,** Faculty of Nursing Ain-Shams University. Who gave me the honor of working under her supervision, for her careful and great support in this thesis and valuable and precious experience.

I would like also to express my sincere gratitude and deep appreciation to Assis. Prof. Dr. Shimaa Nabil Abd-Al Salam, Assistant Professor of Medical-Surgical Nursing, Faculty of Nursing Ain-Shams University. Who gave me the honor of working under her supervision, for her careful and great support in this thesis.

I would like to express my sincere gratitude to the hospital administrating team who helped in facilitating conduction of this study. Great appreciation as well as to all nurses who accepted to participate in the current study.

I also acknowledge the expertise of Critical Care Medicine and physicians for their cooperation during conducting the study and Critical Care Nursing Faculty staff members for their efforts in revising the data collection instruments.

LIST OF TABLES

Mo.	Table	Page
1	Number and percentage distribution of nurses according to their demographic characteristics (n=60).	67
<u>2</u>	Distribution of nurses' knowledge regarding anatomy of chest pre and post implementation of the educational guidelines (N=60).	69
<u>3</u>	Distribution of nurses' knowledge regarding mechanism of injuries pre and post implementation of the educational guidelines (N=60)	70
4	Distribution of nurses' knowledge regarding primary survey pre and post implementation of educational guidelines (N=60)	71
<u>5</u>	Distribution of nurses' knowledge regarding secondary survey pre and post implementation of the educational guidelines (N=60)	73
<u>6a</u>	Distribution of nurses' knowledge regarding nursing care of specific chest trauma Pre and post implementation of the educational guidelines (N=60)	74
<u>6b</u>	Nurses' knowledge related to nursing care of specific chest trauma Pre and post implementation of the educational guidelines (N=60)	76
7	Nurses' attitude related to nursing care of patient with chest trauma Pre and post implementation of the educational guidelines (N=60)	78

No.	Table	Page
<u>8</u>	Distribution of nurses' knowledge regarding nursing care of patient with chest trauma during emergency period pre and post implementation of the educational guidelines (N=60)	80
<u>9a</u>	Distribution of nurses' practice regarding primary assessment Pre and post implementation of the educational guidelines (N=60)	82
<u>9b</u>	Distribution of nurses' practice regarding primary assessment Pre and post implementation of the educational guidelines (N=60)	84
<u>10a</u>	Distribution of nurses' practice regarding secondary assessment Pre and post implementation of the educational guidelines (N=60)	86
<u>10b</u>	Distribution of nurses' practice regarding secondary assessment Pre and post implementation of the educational guidelines (N=60)	88
<u>10c</u>	Distribution of nurses' practice related to secondary assessment Pre and post implementation of the educational guidelines (N=60)	90
<u>11</u>	Distribution of nurses' practice regarding evaluation of patient with chest trauma Pre and post implementation of the educational guidelines (N=60)	92
12	Distribution of nurses' practice regarding applying occlusive dressing Pre and post implementation of the educational guidelines (N=60)	95

No.	Table	Page
<u>13</u>	Distribution of nurses' practice related to needle decompression procedure Pre and post implementation of the educational guidelines (N=60)	97
<u>14</u>	Nurses' performance regarding nursing care of patient with chest trauma during emergency period pre and post implementation of the educational guidelines (N=60)	99
<u>15</u>	Nurses' knowledge and practice regarding nursing care of patient with chest trauma during emergency period pre and post implementation of the educational guidelines (N=60)	101
<u>16</u>	Relation between nurses' knowledge, practice, attitude and gender regarding nursing care of chest trauma during emergency period pre and post implementation of the educational guidelines (N=60)	103
<u>17</u>	Relation between nurses' knowledge, practice, attitude and age regarding nursing care of patient with chest trauma during emergency period pre and post implementation of the educational guidelines (N=60)	104
<u>18</u>	Relation between nurses' knowledge, practice, attitude and level of education regarding nursing care of patient with chest trauma during emergency period pre and post implementation of the educational guidelines (N=60)	105

Mo.	Table	Page
<u>19</u>	Relation between nurses' knowledge, practice, attitude and years of experiences regarding nursing care of patient with chest trauma during emergency period pre and post implementation of the educational guidelines (N=60)	107
<u>20</u>	Relation between nurses' knowledge, practice, attitude and training courses regarding nursing care of patient with chest trauma during emergency period pre and post implementation of educational guidelines (N=60)	108
<u>21</u>	Relation between nurses' level of knowledge, practice, attitude and presence of trauma care protocols regarding nursing care offered to patient with chest trauma during emergency period pre and post implementation of the educational guidelines (N=60)	109

LIST OF FIGURES

No.	Figure	Page	
	Figures in Review of Literature		
1	Anatomy of chest.	8	
<u>2</u>	The diaphragm.	10	
<u>3</u>	Position of the Heart in the Thorax.	11	
<u>4</u>	Massive haemothorax demonstrated by the presence of blood within the right pleural cavity.	18	
<u>5</u>	Types of traumatic pneumothorax.	20	
<u>6</u>	Needle Decompression Landmarks Chest.	22	
<u>7</u>	The needle used in procedure.	22	
<u>8</u>	Pericardiocentesis sites.	25	
9	Flail-Chest-and-Paradoxical-Respiration.	26	
	Figures in Results		
1	Number and percentage distribution of nurses' Age group (n=60).	68	
<u>2</u>	Nurses' satisfactory level of knowledge regarding nursing care of patient with chest trauma during emergency period pre and post implementation of the educational guidelines (N=60).	81	
<u>3</u>	Figure (3): Nurses' satisfactory level of practice regarding nursing care of patient with chest trauma during emergency period pre and post implementation of the educational guidelines (N=60).	100	

List of Figures 🕏

No.	Figure	Page
4	Satisfactory level of nurses' knowledge and practice regarding nursing care of patient with chest trauma during emergency period pre and post implementation of the educational guidelines (N=60).	102

LIST OF ABBREVIATIONS

Abb.	Full Term
2 ICS MCL	Second Intercostal Space, Mid Clavicular Line
ABCDE	Airway, Breathing, Circulation, Disability, and
	Exploration
ACLS	Advanced Cardiac Life support
ARDS	Acute Respiratory Distress Syndrome
ATLS	Advanced Trauma Life support
AVBU	Alert, Verbal response, Pain response and
	Unresponsive
BLS	Basic Life support
BP	Blood Pressure
BSN	Bachelor Sciences in Nursing
BVM	Bag Valve Mask
C3	Cervical vertebra number 3
