"سورة البقرة آية ٣٢"

ACKNOWLEDGEMENT

ACKNOWLEDGEMENT

First and foremost, I feel always indebted to *ALLAH* the kind and merciful.

I would like to express my deepest gratitude and appreciation to *Prof. Dr. Refaat Mahfouz Mahmoud*, Professor of Psychiatry, Faculty of Medicine, El-Minia University, for his constant guidance, suggestions, encouragement and meticulous revision of every detail for precise completion of this study.

I would like to express my sincere appreciation and gratefully acknowledging to *Prof. Dr. Hamdi Naguib El-Tallawi*, Professor and Chairman of Neurology and Psychiatric Department, Assiut University, for his guidance, encouragement and personal enthusiasm.

I would like to express my cordial and sincere gratitude to *Prof. Dr. Enayat Abd El-Wahab Khalil*, Professor of Psychiatric Nursing, Cairo University, for her constant encouragement, guidance and meticulous revision of every detail for precise completion of this work.

I would like to express my best gratitude to *Dr. Zeinab Abd El-Haleim Osman*, Assistant Prof. Psychiatric Nursing, Cairo University for her assistance in this work.

My thanks and gratitude to *Dr. Ahmed Moustafa*, Specialist of Psychiatry, Assiut University, for his help during the conduction of the study.

Also, I wish to express my gratitude to all patients and their relatives, without their cooperation, this research would not have been possible.

Last but not least, my great appreciation to my family members, for their tolerant understanding and support at all times.

The Candidate

Ikrām Ibraheem Mohamed Ahmed

ARABIC SUMMARY	

LIST OF TABLES

No.	Page
1	Demographic characteristics of the studied patients.....36
2	Distribution of diagnoses of the studied patients38
3	Distribution of clinical characteristics of the studied patients40
4	Distribution of the studied patients according to their regularity in receiving medications42
5	Distribution of the studied patients according to their follow-up at the outpatient clinics.....43
6	Distribution of the consequences of receiving medications without observable improvement among the studied patients44
7	Distribution of the pattern of stopping treatment among the studied patients.....45
8a	Distribution of knowledge among schizophrenic patients about concept and causes of psychiatric illness: preprogram, postprogram and at follow-up47
8b	Distribution of knowledge among mood disordered patients about concept and causes of psychiatric illness: preprogram, postprogram and at follow-up48
9a	Distribution of knowledge about treatment among schizophrenic patients: preprogram, postprogram and at follow-up50
9b	Distribution of knowledge about treatment among mood disordered patients: preprogram, postprogram and at follow-up52
10	Distribution of causes of treatment adherence and nonadherence as mentioned by schizophrenic patients: preprogram, post- program and at follow-up55

No.	Page
11	Distribution of Rating of Medication Influences Scale (ROMIS) for schizophrenic patients: preprogram, postprogram and at follow-up 58
12	Distribution of causes of treatment adherence and nonadherence as mentioned by mood disordered patients: preprogram, post- program and at follow-up 63
13	Distribution of Rating of Medication Influences Scale (ROMIS) for mood disordered patients: preprogram, postprogram and at follow-up 66
14a	Distribution of forms of treatment nonadherence among schizophrenic patients: preprogram and at follow-up 71
14b	Distribution of forms of treatment nonadherence among mood disordered patients: preprogram and at follow-up 73
15a	Distribution of consequences of treatment nonadherence for schizophrenic patients: preprogram, postprogram and at follow-up 76
15b	Distribution of consequences of treatment nonadherence for mood disordered patients: preprogram, postprogram and at follow-up 77
16	Distribution of the mean score of Drug Attitude Inventory Scale (DAI-30) among the studied patients: preprogram, postprogram and at follow-up 79
17	Distribution of the mean score of Brief Psychiatric Rating Scale (BPRS) among the studied patients: preprogram, postprogram and at follow-up 81

No.	Page
18	Distribution of the mean score of the quality of life for the studied patients: preprogram and at follow-up 84
19	Correlation between clinical data and Drug Attitude Inventory scale (DAI-30) in schizophrenic patients pre-, postprogram and at follow-up 86
20	Correlation between clinical data and Drug Attitude Inventory scale (DAI-30) in mood disordered patients pre-, postprogram and at follow-up 88
21	Correlation between clinical data and Brief Psychiatric Rating Scale (BPRS) in schizophrenic patients pre-, postprogram and at follow-up 90
22	Correlation between clinical data and Brief Psychiatric Rating Scale (BPRS) in mood disordered patients pre-, postprogram and at follow-up 92
23	Correlation between clinical data and Quality Of Life (QOL) in schizophrenic patients preprogram and at follow-up 94
24	Correlation between clinical data and Quality Of Life (QOL) in mood disordered patients preprogram and at follow-up 96

LIST OF ABBREVIATIONS

BPRS	: Brief Psychiatric Rating Scale
DAIS	: Drug Attitude Inventory Scale
ECT	: Electro Convulsive Therapy
MD	: Mood disorder
QOL	: Quality of Life
ROMIS	: Rating of Medication Influences Scale
Schiz.	: Schizophrenic
