**Taxonomy, distribution and chromosomal analysis
of the Egyptian diving beetles
(Coleoptera: Dytiscidae & Noteridae)**

B16567

By

Rowaida Salah Saleh Ahmed

Thesis submitted in partial fulfilment of the requirements
for the degree of Doctor of philosophy

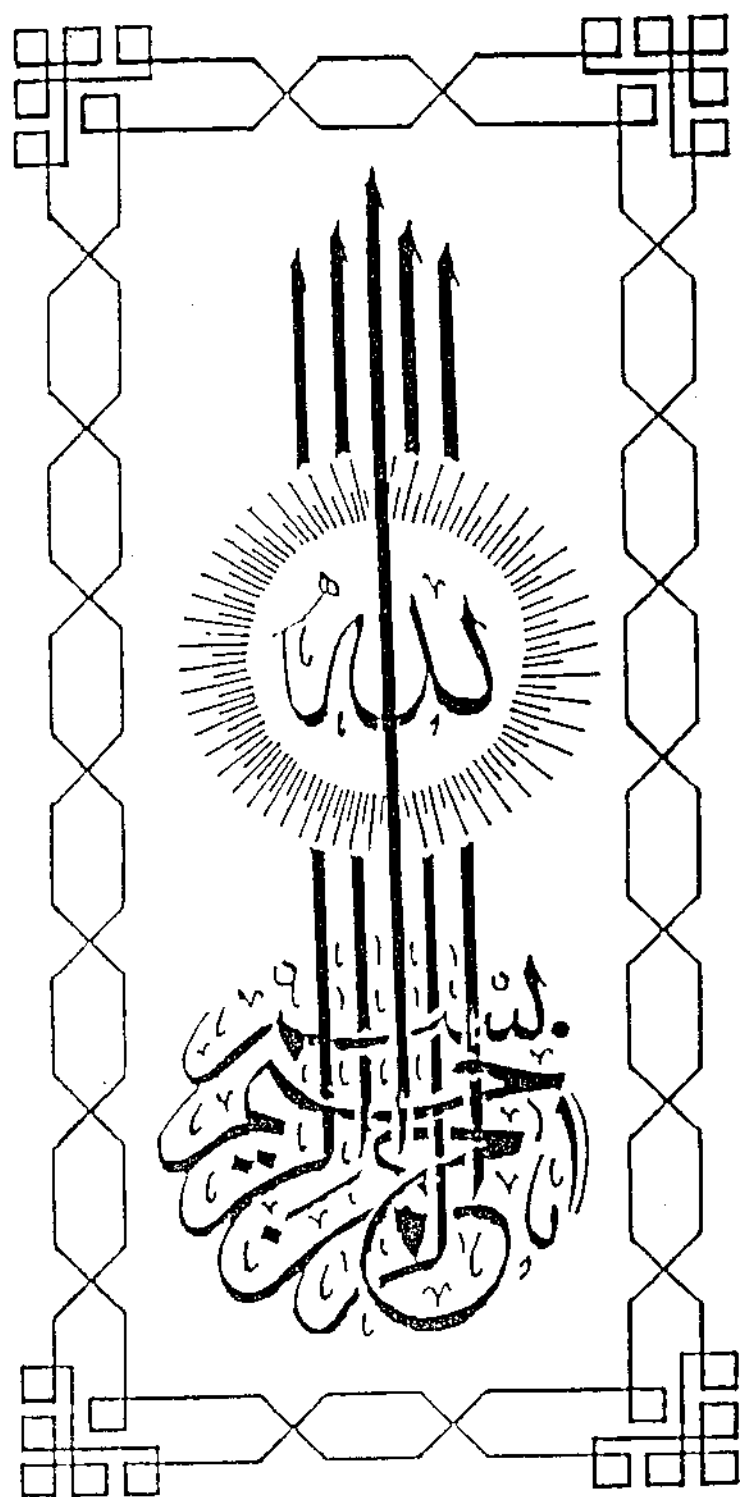

Zoology Department, Faculty of Science
Suez Canal University

A. Karam

**Ismailia
Egypt**

1996

S. Zaki
M. Elmaghrabi

APPROVAL SHEET

**Taxonomy, distribution and chromosomal analysis of the Egyptian
diving beetles (Coleoptera: Dytiscidae & Noteridae)**

SUPERVISOR:

Signature

Prof. Dr. Ahmed H. Kaschef

- Professor of Entomology
Faculty of Science
Ain Shams University

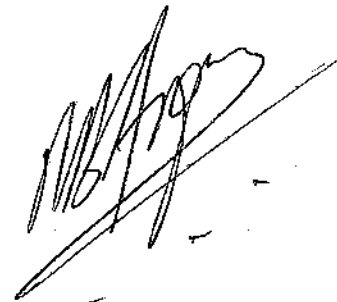

Dr. Samy M. Zalal

- Assistant professor of Entomology
Faculty of Science
Suez Canal University

Dr. R. B. Angus

- Senior Invertebrate Zoologist
Royal Holloway College
London University / UK

ARBITRATION SHEET

Title: Taxonomy, distribution and chromosomal analysis of the
Egyptian diving beetles (Coleoptera: Dytiscidae & Noteridae)

Name: Rowaida Salah Saleh Ahmed

Referees:

Prof. Dr. M. E. Mohallal

TO MY
HUSBAND

Acknowledgment

I wish to express my greatest gratitude and sincere thanks to Prof. **Ahmed H. Kaschef**, Entomology Department, Faculty of Science, Ain Shams University for suggesting the research problem, advising me to work on the Egyptian aquatic insects, his kind supervision and continuous encouragement during the course of this study are highly appreciated.

I am deeply grateful to Dr. **Samy M. Zalut**, Zoology Department, Faculty of Science, Suez Canal University, for suggesting the topic of research, his generous effort in programming this work, kind help in carrying out the field work in the Sinai vicinity, fruitful supervision and guidance throughout the period of study.

I am greatly indebted with thanks and appreciation to Dr. **Robert Angus**, Biology Department, Royal Holloway College, London University for supervising with great enthusiasm the work undertaken, his advice concerning the data and their presentation, translation of French, German and Italian description of some species, arranging the facilities to study in the library and collection of Natural History Museum

Special thanks are due to Dr. Robert Angus's family for their very kind hospitality and care with me and my family during my study in London University.

I would like to express my best thanks to the following persons for placing material or information at my disposal: Dr. Hassan Fadl (Ain Shams University, Egypt), Dr. Michael Balke (Berlin), Prof. Olof Biström (Finland), Dr. M. Brancucci (Switzerland), Dr. Hans Fery (Berlin), Dr. Keith Miller (Cyprus), Dr. Anders Nilsson (Sweden) and Prof. Günther Wewalka (Wien) for placing material or information at my disposal.

My sincere thanks to the staff of the Natural History Museum especially Mr. Martin Brendel for kind help and borrowing types to study at Royal Holloway and offering all library facilities. Also my best thanks to the staff of the following Museums: Muséum National d'Histoire Naturelle, Paris, France; Museum Zoologicum, Helsingfors, Finland and Museum Für Naturkunde der Humboldt-Universität zu Berlin for facilities to work with their collections, library and allowing me access to the types material under their charge.

A particular thanks are also due to Dr. Fatma Shaurawi, Dept. of Entomology, Ain Shams University for her kind help with karyological studies.

Many thanks are due to the staff members and workers of the Biology Department and Electron microscopy unit in Royal Holloway, London University for their help and friendly treatment during my study there.

Deep thanks are also extended to Suez Canal University which supported my study, and to Prof. **M. E. Mouhalel** the head of Zoology Department as well as all staff members of the department for their encouragement during the study.

Finally, It is a great pleasure to express my hearty thanks to my husband engineer Ibrahim Imam for his support, great help during the field work and constant encouragement.
