**CONTAMINATION OF GROUNDWATER WITH ORGANIC
AND INORGANIC POLLUTANTS IN EL-SADAT CITY,
A NEW SETTLEMENT IN EGYPT**

A thesis
Submitted in partial fulfillment for the
Requirements of the degree of Master of Science in
Inorganic Chemistry

BY

SELEEM EL-SAYED GABER TALKHAN SAID

B.Sc. in Chemistry (1997)
Researcher Assistant
National water research center

To
Chemistry Department - Faculty of Science
Minufiya University

Supervisors

Dr. El-Sayed E. El -Shereafy

E. El Shereafy

Chemistry Department
Faculty of Science
Minufiya University

Dr. Tarik. A. Tawfic

Tarik A. Tawfic

Director of Central Laboratory
for Environmental Quality monitoring
National Water Research Center

August - 2002

لجنة الفحص و المناقشة :-
أ.د/ محمود صبري رزق
أستاذ الكيمياء غير العضوية - علوم القاهرة

أ.د/ محمد احمد عبد الخالق
أستاذ نوعية المياه - المركز القومي لبحوث المياه

أ.د/ السيد السيد الشريفى
أستاذ الكيمياء الفيزيائية - علوم المنوفية

د/ طارق عبد الرحمن توفيق
مدير المعامل المركزية - المركز القومي لبحوث المياه

ACKNOWLEDGMENT

The author wishes to express his sincere gratitude to his advisors, **Dr. El-Sayed E. El-Shereafy** professor of physical chemistry , Faculty of science , Minoufiya University, **Dr. Tarik A. Tawfic** assisstant professor, Director for Central Laboratory for Environmental Quality Monitoring , National Water Research Center. For their defending and directing this study. Many thanks for their guidance and discussion.

Special thanks to **Dr. Moustafa El-Behairy** professor of inorganic chemistry, Faculty of Education, Ain -Shams University for his valuable help during preparing to this thesis.

The author wishes to express his deep appreciation to **Dr. Mohamed M. Yehia** , assistance professor, deputy director for Central Laboratory for Environmental Quality Monitoring , National Water Research Center. For his continuos guidance during the practical work.

The author would like to express his thanks for all the staff members of the Central Laboratory for Environmental Quality Monitoring for their continuos encouragement and help.

The author
Seleem E. Gaber

NOTATIONS

ICP-OES	Inductively Coupled Plasma – Optical Emission Spectroscopy
USN	Ultra Sonic Neublizer
CFN	Cross Flow Neublizer
IC	Ion Chromatography
BOD	Biochemical Oxygen Demand
COD	Chemical Oxygen Demand
TOC	Total Organic Carbon
TON	Total Organic Nitrogen
US-EPA	United State Environmental Protection Agency
WHO	World Health Organization
EC	Electric Conductivity
TDS	Total Dissolved Solids
TSS	Total Suspended Solids
DO	Dissolved Oxygen
TIC	Total Inorganic Carbon
RIGW	Research Institute for Ground Water
SAR	Sodium Adsorption Ratio
CFU	Colony Forming Unit

CONTENTS

	Page
I-INTRODUCTION:	
General outline-----	1
Review of literature-----	2
Objectives-----	6
II-MATERIALS AND METHODS:	
1-Study area-----	8
2-Activities carried out-----	9
2.1-Field activities -----	9
2.2-Laboratory analysis-----	11
2.2.1-Chemicals used in analyses-----	11
2.2.2-Methods used in determination of major and minor constituents in water-----	12
1-Determination of pH-----	12
2-Determination of Carbonate and Bicarbonate-----	12
3-Electrical conductivity-----	12
4-determination of Total Dissolved Solids-----	13
5-Water analyses using Inductively Coupled Plasma Optical Emission Spectrometry (ICP-OES)-----	13
6-Determination of Anions with Ion Chromatography----	15
7-Determination of Transition Metals by Chelation using ion chromatography-----	15
8-Total Organic Carbon (TOC)-----	17
9-Chemical Oxygen demand (COD)-----	18
10-Biochemical Oxygen Demand “BOD-5 day”- -----	18
11-Total Organic Nitrogen (TON)-----	18
12-Oil and grease (Gravimetry)-----	19
13-Microbiological parameters-----	19
14-Extraction of sediments samples-----	19
3-Background about chemical speciation of groundwater-----	20
II-RESULTS AND DISCUSSION:	
1-General outline-----	26
2-Chemistry of groundwater-----	27
2.1- pH-----	29
2.2- Specific Electrical Conductivity (EC)-----	30
2.3- Total Salinity-----	31
2.4- Alkalinity-----	32
2.5- Hardness-----	35
2.6-Major ion distribution-----	36

2.6.1- Calcium	37
2.6.2- Magnesium	38
2.6.3- Sodium	39
2.6.4- Potassium	40
2.6.5- Sulfate	42
2.6.6- Chloride	43
2.6.7- Carbonate and Bicarbonate	44
2.6.8- Nitrite and Nitrate	46
2.6.9- Fluoride	48
2.7- Minor and Trace Constituents	49
2.7.1- Iron	51
2.7.2- Manganese	52
2.7.3- Copper	54
2.7.4- Zinc	55
2.7.5- Lead	56
2.7.6- Aluminum	57
2.7.7- Chromium	58
2.7.8- Nickel	60
2.7.9- Cadmium	61
2.7.10- Boron	62
2.8- Organic Constituents	62
2.8.1- Total Organic Carbon (TOC)	64
2.8.2- Total Organic Nitrogen (TON)	65
2.8.3- Chemical Oxygen Demand (COD)	65
2.8.4- Biochemical Oxygen Demand (BOD ₅)	66
2.8.5- Oil and Grease	68
2.9- Bacteriological quality	68
3- El-Sadat city oxidation ponds and their effect on groundwater quality	70
3.1- Water samples from the ponds	71
3.1.1- Major ion and Salinity	71
3.1.2- Metals	72
3.1.3- Organic matter	73
3.2- Sedimentation	75
4- Hydrochemical profiles	77
5- Concentration and activity correction	84

IV-EVALUATION OF GROUNDWATER FOR VARIOUS USES:

1- Suitability of groundwater for Drinking	85
2- Suitability of groundwater for Irrigation	94
2.1. The Total Concentration of dissolved Salts (TDS)	94

2.2-The relative proportion of sodium to other cations----	95
2.2.1- Wilcox classification for irrigation-----	96
2.2.2- Sodium Adsorption Ratio (SAR)-----	99
2.3- The Concentration of boron-----	100
3- Suitability of groundwater for Industrial use-----	101
V-SUMMARY AND CONCLUSION-----	104
Recommendations-----	108
VI- REFERENCES-----	109
VII-APPENDICES-----	117
ARABIC SUMMARY	

LIST OF FIGURES

Fig. No.	page
(1-1) Sources of pollution-----	2
(2-1) Location map of El-Sadat City-----	9
(2-2) The change in chemical composition of discharge during well flushing-----	10
(2-3) Structure of Cation exchange copolymer Layer and anion exchange copolymer layer-----	16
(2-4) Separation of Transition Metals using CS5A with PDCA-----	17
(3-1) The distribution of the sampled observation and production wells in El-Sadat City-----	28
(3-2) comparison between field and laboratory results of pH in groundwater samples-----	30
(3-3) Relation between Total Dissolved Solids (TDS) and Specific Electric conductivity (EC) $\mu\text{s/cm}$ -----	31
(3-4) Means and ranges of Salinity, Alkalinity, Hardness and Electrical conductivity of groundwater wells-----	33
(3-5) Relation between the total dissolved solids and concentration of different ions for groundwater wells-----	34
(3-6) Average concentration in mmol/liter and percent distribution of calcium species in ground water-----	38
(3-7) Average concentration in mmol/liter and percent distribution of magnesium species in ground water-----	39
(3-8) Average concentration in mmol/liter and percent distribution of sodium species in ground water-----	40
(3-9) Average concentration in mmol/liter and percent distribution of potassium species in ground water-----	41
(3-10) Average concentration in mmol/liter and percent distribution of sulfate species in groundwater-----	43
(3-11) Average concentration in mmol/liter and percent distribution of chloride species in ground water-----	44
(3-12) Percentage of carbon dioxide species activities at 1 atmospheric pressure and 25 °C-----	45
(3-13) Average concentration in mmol/liter and percent distribution of carbonate species in groundwater-----	46
(3-14) Average concentration in mmol/liter and percent distribution of nitrate species in ground water-----	48
(3-15) Average concentration in mmol/liter and percent distribution of iron species in groundwater-----	52
