**EVALUATION OF LOCAL ANESTHESIA USING
NEEDLE-LESS JET SYRINGE VERSUS
CONVENTIONAL SYRINGE IN
PEDIATRIC DENTISTRY**

THESIS

Submitted to the Faculty of Dentistry
Alexandria University
in Partial Fulfillment of the Requirements for
the Degree of
Master in Pediatric Dentistry

By

Injy Ahmed Mohy El-Din
(B.D.S. 1995)

Faculty Of Dentistry
Alexandria University
2003

SUPERVISORS

Prof. Dr. Amani M. Khalil

Professor of Pediatric Dentistry
Department of Pediatric and Community
Dentistry
Faculty of Dentistry
Alexandria University

Dr. Sawsan H. Mahmoud

Lecturer of Pediatric Dentistry
Department of Pediatric and Community
Dentistry
Faculty of Dentistry
Alexandria University

ACKNOWLEDGMENT

I would like to express my everlasting appreciation to Professor Dr. Amani M. Khalil, professor of pediatric dentistry, Department of Pediatric Dentistry, Faculty of Dentistry, Alexandria University for planning, continuous support and encouragement, sincere help and valuable and useful advice throughout this work.

Also I would like to express my deepest gratitude and sincere appreciation to Dr. Sawsan Hafez Mahomoud, lecturer of pediatric dentistry, Department of Pediatric Dentistry, Faculty of Dentistry, Alexandria University for her continuous guidance and valuable advice throughout this work.

My sincere appreciation to my patients and the nursing staff who helped me throughout this work. My thanks also goes to my colleagues in the Department of Pediatric Dentistry.

My deep thanks to my parents for their unlimited moral support, patience and encouragement they offered through this work. I am greatly indebted to my children and my husband whom I would not be able to complete this work without him.

TABLE OF CONTENTS

	Page
LIST OF FIGURES	i
LIST OF TABLES	ii
LIST OF GRAPHS	iv
I. INTRODUCTION	1
• Pain	2
- Phenomenon of Pain	2
- Simple Pain Mechanisms	2
▪ Nociceptors and Afferent Nerve Fibers	2
▪ Central Nervous System (CNS) Mechanisms	4
- Pain Thresholds	5
- Pain Perception and Pain Reaction	5
- Psychological Factors Modifying pain	6
▪ Factors Modifying Pain Perception	6
▪ Factors Modifying Pain Reaction	10
- Pain Control	13
• Local Anesthesia	13
- Mechanism of Action	13
- Local Anesthetic Agents	14
▪ Esters	14
▪ Amides	14
- Local Anesthesia by Conventional Injection	15
- Complications of the Conventional Injection	15
▪ Pain	15
▪ Fear and Anxiety (<i>Needle Phobia</i>)	16
▪ Overdosage	18
▪ Needle Breakage	19
▪ Intravascular Injection	19
▪ Neuropathy	19

▪ Trismus	20
▪ Undesired Nerve Block	20
▪ Hematoma Formation	20
▪ Allergic Reactions	21
▪ Mucosal Irritation	21
▪ Self Inflicted Injuries	22
- Adjuncts to Local Anesthesia	22
▪ Intraosseous Injection (IO)	23
▪ Computerized Anesthesia Delivery System (WAND)	23
▪ Electronic Dental Anesthesia (EDA)	24
▪ Periodontal Ligament Injection (PDL)	24
• Jet Injection	26
- Principle of Jet Injection	26
- Designs of Jet Injectors	27
- Clinical Applications of Jet Injection	28
- Intraoral Use of Jet Injection	28
- Advantages of Jet Injection	30
- Safety Considerations	32
▪ Transmission of Diseases	32
▪ Tissue Response	32
▪ Adverse Effects	33
- Histological Assessment	34
- Cost	35
• Scope of the Problem	36
II, AIM OF THE STUDY	37
III. MATERIAL AND METHODS	38
• Data Collection	39
- Study Sample	39
▪ Sample Selection	39
▪ Sample Subgrouping	40
- Dental Visits	41

▪ Screening Dental Visit	41
▪ Initial Dental Visit	41
▪ Restorative Dental Visits	41
▪ Scheduling of Appointments	42
- Methodology of Behavior Management	42
- Local Anesthesia Procedures	43
▪ Jet Injection	43
▪ Conventional Infiltration	45
- Operative Procedures	46
▪ Class I Cavity Preparation	46
▪ Vital Pulpotomy	47
• Data Analysis	48
- Behavioral Rating	48
▪ Measures to Assess Comfort or Pain	48
▪ Measures to Assess Children's Behavior	48
▪ Measures to Assess Treatment Satisfaction	48
- Observer Training	49
- Statistical Analysis	49

IV. RESULTS

• Evaluation of Jet Injection Anesthesia	62
- Pain Assessment Using the SEM Scale	62
- Behavior Rating Using the Frankl Behavior Rating Scale	63
- Overall Treatment Satisfaction Using the Treatment Satisfaction and Acceptability Survey	64
• Comparison of Jet Injection Anesthesia between the Upper Arch and the Lower Arch	65
• Comparison of Jet Injection Anesthesia and Conventional Infiltration Anesthesia	65
- In Pain Control Using the SEM Scale	65
▪ During Injection	65
▪ During Placement of Rubber Dam Clamp	66
▪ On Entering the Dentin	66

▪ On Entering the Pulp	67
- In Children's Behavior Using the Frankl Behavior Rating Scale	68
- In Overall Treatment Satisfaction using the Treatment Satisfaction and Acceptability Survey	68
• Comparison between Males and Females	69
• Correlations	69
- Pain with Behavior	69
- Treatment Satisfaction with Pain and Behavior	69
V. DISUCSSION	88
• Methodology	88
- Study Sample	88
- Dental Visits	89
- Anesthesia Approach	89
- Variables Measurement	89
• Results	91
- Evaluation of Jet Injection	91
▪ Patient's Comfort During Anesthesia	91
▪ Effectiveness of the Jet Anesthesia	91
▪ Overall Treatment Satisfaction	93
- Comparison of Jet Versus Conventional Injection Anesthesia	94
▪ Patient's Comfort During Anesthesia	94
▪ Effectiveness of the Anesthesia	95
▪ Treatment Satisfaction	96
- Gender Comparison	96
- Evaluation of Scales	96
• Clinical Observations	97
