Validity of the GeneXpert MTB/RIF in Diagnosis of Pulmonary Tuberculosis and Description of pulmonary TB Resistance Profile in Abbasia Chest Hospital

Thesis

Submitted for Partial Fulfillment of Doctorate Degree in Public Health

By

Mai Mohamed Dawoody

Supervised By

Prof. Dr. Mohamed Salah Gabal

Professor in Community, Occupational and Environmental Medicine Department,
Faculty of Medicine, Ain Shams University

Prof. Dr. Ahmed Esmat Shoman

Professor in Community, Occupational and Environmental Medicine Department,
Faculty of Medicine, Ain Shams University

Prof Dr. Hasnaa Abdel-Aal Abouseif

Professor in Community, Occupational and Environmental Medicine Department,
Faculty of Medicine, Ain Shams University

Faculty of Medicine
Ain Shams University
2022

Acknowledgment

First and foremost, thank **ALLAH** *for giving me the power to accomplish this work. A research topic like this is never the work of anyone alone. The contributions of many different people, in their different ways, have made this possible.*

A debt of gratitude is owed to **Prof. Dr. Mohamed Salah Gabal,** *Professor in Community, Occupational and Environmental Medicine Department, Ain Shams University, for his effort, continuous support, recommendations and encouragement.*

I would also like to express my gratitude and appreciation to **Prof. Dr. Ahmed Esmat Shoman,** *Professor in Community, Occupational and Environmental Medicine Department, for supporting the research idea, and understanding spirit.*

And to express my extreme appreciation to **Prof. Dr. Hasnaa Abdel-Aal Abouseif,** *Professor in Community, Occupational and Environmental Medicine Department, Ain Shams University, for her precious time and great effort in helping me.*

Deep thankfulness to **Dr.Wagdi Amin,** *Director of National Tuberculosis Program who were always big support in all steps of these theses and data management*

Mai Mohamed Dawoody

Arabic Summary	

List of Abbreviations

Abb.	Full term

AFB ..... *Acid-Fast Bacilli*

CFR ..... *Case fatality rate*

DOTS ..... *Directly observed treatment strategy*

DR ..... *Drug resistant*

DST ..... *Drug sensitivity test*

FN ..... *False negative*

FP ..... *False positive*

HCWs ..... *Health care workers*

HIV ..... *Human immunodeficiency virus*

IPC ..... *Infection prevention and control*

MDG ..... *Millennium Development Goal*

MDR-TB ..... *Multi-drug-resistant TB*

MOHP ..... *Ministry of health and population*

MOTT ..... *Mycobacteria other than tuberculosis*

MTB ..... *Mycobacterium tuberculosis*

NAAT ..... *Nucleic acid amplification test*

NTP ..... *National tuberculosis program*

PLHIV ..... *People living with HIV*

PVN ..... *Predictive value negative*

PVP ..... *Predictive value positive*

RIF ..... *Rifampicin*

rpoB ..... *RNA polymerase beta*

SDG ..... *Sustainability development Goal*

List of Abbreviations

Abb.	Full term
SNPT	*Smear-negative pulmonary tuberculosis*
TB	*Tuberculosis*
TN	*True negative*
TP	*True positive*
TST	*Tuberculin Skin Test*
WHO	*World Health Organization*
XDR-TB	*Extensively drug resistant tuberculosis*

List of Tables

Table No.	Title	Page No.
Table (1):	.....	18
Table (2):	Demographic characteristics of clinically suspected Cases	47
Table (3):	Results of TB culture (Golden Diagnostic test), Sputum Microscopical examination and GenXpert assay.	48
Table (4):	Association between Socio-demographic characteristics & results of TB culture**:**	49
Table (5):	Association between comorbidities and results of TB culture	51
Table (6):	Multi variant logistic regression model for TB positive culture in the studied sample	52
Table (7):	Validity of GenXpert assay in diagnosing TB	53
Table (8):	Agreement between results of GenXpert and TB culture	54
Table (9):	Validity of **GenXpert** assay in diagnosis of Rifampicin resistance TB cases (Single Drug Resistance or combined with any other type of Drugs) among TB positive culture cases (n=206)	55
Table (10):	Agreement between results of GenXpert assay and TB culture (Golden Diagnostic test) in detecting Rifampicin resistance TB cases (single antibiotic resistance or combined with any other type of antibiotic)	56
Table (11):	Validity of Sputum Microscopy in diagnosing TB	57
Table (12):	Agreement between results of Sputum Microscopy and TB Culture	58

List of Tables *(Cont...)*

Table No.	Title	Page No.
Table (13):	ROC curves comparison for detection of TB cases by sputum Microscopy and GenXpert results	59
Table (14):	Resistance pattern to Anti TB drugs during the follow up by culture:	60
Table (15):	Resistance pattern to Anti TB Drugs based on culture results (n=46)	61
Table (16):	Demographic characteristics of the followed-up TB positive cases	62
Table (17):	Comorbidities distribution in the followed-up TB positive cases	64
Table (18):	**O**utcome of the patients after (6-9 month in drug sensitive TB cases) (9 -18 month in MDR)	65
Table (19):	Socio-demographic characteristics of the patients, comorbidities, x ray findings and treatment outcome in the follow up period (6-9 month in drug sensitive TB cases) (9 -18 month in MDR)	66
Table (20):	Socio-demographic characteristics, comorbidities and X-ray findings of patients with MDR	68
Table (21):	MDR and Treatment Outcome in (6-9 month in drug sensitive TB cases) (9 -18 month in MDR)	70
