***STUDIES ON FUNGAL DISEASES
AFFECTING CULTURED TILAPIA IN
KAFR EL-SHEIKH PROVINCE***

*Thesis
presented by*

Mohammed Hussam Loutfy El-Gamal
B.V.Sc. Alexandria University (1990)

For
The degree of M.V.Sci.
(Fish Diseases and Management)

Under supervision of

***Prof. Dr. El-Sayed Mohammed
Fatlouh***
Dean of the Faculty of Veterinary
Medicine,
Kafr El-Sheikh
Tanta University

***Prof. Dr. Mohammed Sayed
Marzouk***
Prof. of Fish Diseases and
Management
Faculty of Vet. Med.,
Cairo University

***Late Prof. Dr. Mohey El-Saeid
Easa***
Prof. Of Fish Pathology
Faculty of Vet. Med.,
Cairo University

Dr. Samira Saad Rezeaka
Assistant Prof. of Fish diseases
and Management
Faculty of Vet. Med., Kafr El-Sheikh

Department of Poultry and Fish.

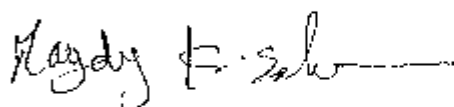

Approval sheet

This is to approve that the dissertation presented by *Mohammed Hussam Loutfy El-Gamal* to Tanta University Entitled:

"STUDIES ON FUNGAL DISEASES AFFECTING CULTURED TILAPIA IN KAFR EL-SHEIKH PROVINCE"

For the degree of M. Vet. Sci. (Fish Diseases and Management) has
been approved by the examining committee:-

Professor Dr. *Magdy Khalil Soliman*
Prof. Of Fish Diseases and Hygiene
Head of the Dept. of Avian and Aquatic Animal Medicine
Faculty of Vet. Medicine, Alexandria University

Dr. *Mohammed Saied Gado*
Assistant Prof. Of Fish Diseases and Mangement
Dept. of Poultry and Fish
Faculty of Vet. Med., Kafr El-Sheikh, Tanta University

Professor Dr. *Mohammed Sayed Marzouk*
Prof. Of Fish Medicine and Mangement
Dept. of Internal Medicine, Infections and Fish Diseases
Faculty of Vet. Medicine, Cairo University
(Supervisor)

Date 17/11/2000

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

DEDICATION

TO ...

my mother

**The Nearest Person To My
Heart**

ACKNOWLEDGEMENT

Firstly, thanks to my "God" for helping me in direction of this work.

I would like to record my cardial thanks to Professor Dr. *El-Sayed Mohammed Fattouh*, Professor of Gynaecology and Obstetrics, Dean of Faculty of Vet. Med., Kafr El-Sheikh and Head of the Department of Gynaecology and Obstetrics, Faculty of Vet. Med., Kafr-Elshikh, Tanta University for his useful suggestion.

Special thanks from the head to the memory of late Prof. Dr. *Mohey El-Saied Easa*, Prof. of Fish Pathology, Faculty of Vet. Med., Cairo University for his previous stimulating supervision and useful suggestion.

I would like to express my sincerest gratitude to Professor Dr. *Mohammed Sayed Mohammed Marzouk*, Professor of Fish Medicine and Management, Department of Internal Medicine, Infectious Diseases and Fish, Faculty of Vet. Med., Cairo University, for his stimulating supervision, kind encouragement valuable help and advice for carrying out this work.

I am greatly indebted to Dr. *Samira Saad Rezeaka*, Assistant Prof. of Fish Diseases and Management, Depart. of Poultry and Fish, Faculty of Vet. Med., Kafr El-Sheikh for her stimulating supervision, useful suggestion and continuous valuable help.

Mohamed Hussam Loutfy El Gamal

CONTENTS

CHAPTER	PAGE
1- INTRODUCTION	1
2- REVIEW OF LITERATURE	3
2.1- Prevalence of mycotic affections	3
2.2- Seasonal incidence of mycotic diseases	3
2.3- Most common mycotic affections of Tilapia	5
2.3.1- Saprolegnia infection	5
2.3.2- Aspergillus infection	15
2.3.3- Fusarium infection of freshwater fish	19
2.3.4- Penicillium infection	20
2.3.5- Yeast infection in freshwater fish	21
2.4- Fish mycosis and human health	24
3- MATERIALS AND METHODS	27
3.1- Material	27
3.1.1- Naturally infected fish	27
3.1.2- Experimental fish	27
3.1.3- Aquaria	27
3.1.4- Fish feed	28
3.1.5- Media	28
3.1.6- Stains	28
3.2- Methods	29
3.2.1- Clinical examination	29
3.2.2- Postmortem examination	29
3.2.3- Mycological examination	29
3.2.3.1- Isolation of fungi	29
3.2.3.2- Identification of isolates	30
3.2.3.2.1- Identification of moulds	30
3.2.3.2.1.1- Morphological features	30
3.2.3.2.1.2- Microscopic examination	30
3.2.3.2.2- Identification of yeasts	31

3.2.3.2.2.1- Morphological identification	31
3.2.3.2.2.2- Microscopical examination of Candida sp. Yeasts	32
4- Results and experiments	33
4.1- Clinical and postmortem examination of naturally infected fish	33
4.2- Mycological examination	38
4.2.1- Isolation and identification of fungi	38
4.3- Experimental infections	53
5- DISCUSSION	56
6- SUMMARY	64
7- REFERENCES	66
8- ARABIC SUMMARY	

LIST OF TABLES

Table	Title	Page
Table (1)	Seasonal incidence of fungal isolation from different organs	43
Table (2)	Moulds and yeasts isolated from naturally collected <i>Tilapia</i> (193)	44
Table (3)	Total counts of isolates in relation to different organs of naturally collected <i>Tilapia</i> (193)	45
Table (4)	Results of fungal isolation from examined <i>Tilapia</i>	46
Table (5)	Seasonal incidence of mycotic infection	47
Table (6)	Results of experimental infection of <i>Oreochromis niloticus</i> with isolated <i>Aspergillus flavus</i> , <i>fusarium</i> and <i>Candida albicans</i>	54
Table (7)	Results of reisolation of <i>A. flavus</i> , <i>Fusarium sp.</i> and <i>Candida albicans</i> from freshly dead and sacrificed fish at the end of experiment.	55

LIST OF FIGURES

Figure	Title	Page
Fig. (1)	<i>Tilapia</i> showing skin darkening.	35
Fig. (2)	<i>Tilapia</i> showing haemorrhages in fins.	36
Fig. (3)	<i>Tilapia</i> showing detached scales with sloughing of the superficial layers of the skin.	37
Fig. (4)	Microscopic film of <i>Aspergillus flavus</i> sp. isolated from liver of <i>O. niloticus</i> , showing enlarged tip forming around vesicle covered with flush-shaped strigmata stained by lacto phenol cotton blue stain and examined under X400.	48
Fig. (5)	Microscopic film of <i>Aspergillus flavus</i> sp. isolated from gills of <i>O. niloticus</i> stained by lacto phenol cotton blue stain and examined under X400.	48
Fig. (6)	Microscopic film of <i>Aspergillus niger</i> sp. isolated from spleen of <i>O. niloticus</i> , showing brownish black (carbon black) conidial heads stained by lacto phenol cotton blue stain and examined under X400.	49
Fig. (7)	Microscopic film of <i>Penicillium</i> sp. isolated from kidney of <i>O. niloticus</i> showing septated hyphae with unbranched conidiophores forming flask shaped sterigmata (brush appearance) stained by lacto phenol cotton blue stain and examined under X400.	49
Fig. (8)	Microscopic film of <i>Penicillium</i> sp. isolated from gas bladder of <i>O. niloticus</i> stained by lacto phenol cotton blue stain and examined under X400.	50

Fig. (9)	Microscopic film of <i>Fusarium</i> sp. isolated from skin of <i>O. niloticus</i> , showing multipseptate canoe shaped mass conidia stained by lactophenol cotton blue stain and examined under X400.	50
Fig. (10)	<i>Fusarium</i> sp. isolated from gills of <i>O. niloticus</i> , stained by lactophenol cotton blue stain and examined under X400.	51
Fig. (11)	<i>Alternaria</i> sp. isolated from spleen of <i>O. niloticus</i> showing septated hyphae with oval conidia stained by lactophenol cotton blue stain and examined under X400.	51
Fig. (12)	<i>Candida albicans</i> sp. isolated from kidney of <i>O. niloticus</i> after incubation for 72 hours at 25°C on rice agar showing the presence of pseudomycelia and chlamydospores.	52
