**Enhancement of Hydrogen and Methane
Production by Ultrasonication of Municipal
Sludge**

A PhD Thesis

Submitted to Ain-Shams University for the Degree of
Doctor of Philosophy in Science

By

Mohamed Abdalla Metwalli Mansour El Qelish
(M. Sc. Chemistry 2013, Cairo University)
National Research Centre

To

***Chemistry Department
Faculty of Science
Ain Shams University
2020***

Approval Sheet

Enhancement of Hydrogen and Methane Production by Ultrasonication of Municipal Sludge

A Thesis Submitted to Ain-Shams University for the Degree of Doctor of
Philosophy in Science

By

Mohamed Abdalla Metwalli Mansour El Qelish

(M. Sc. Chemistry 2013, Cairo University)
National Research Centre

Thesis supervisors

Prof. Dr. Mohamed Mahmoud Abo-Aly	Professor of Inorganic Chemistry, Faculty of Science, Ain Shams University
Prof. Dr. Fatma Abdel Hameed El-Gohary	Professor of Water Pollution Research Department, National Research Centre

Examining committee

Prof. Dr. Mohamed Mahmoud Abo-Aly	Professor of Inorganic Chemistry, Faculty of Science, Ain Shams University
Prof. Dr. Fatma Abdel Hameed El-Gohary	Professor of Water Pollution Research Department, National Research Centre

Acknowledgement

First of all, I am deeply thankful to **God** on success of this work.

This thesis is based on the work carried out at the National Research Centre, Egypt and at Department of Chemistry and Bioengineering, Tampere University, Tampere, Finland.

I would like to express my great and sincere appreciation to **Professor. Mohamed Abo-Aly**, Professor of inorganic Chemistry, Faculty of Science, Ain Shams University, for supervising this work, honest advice and encouragement through this study.

It is my pleasure to express my deepest thanks and assure my sincere appreciation to **Professor. Fatma El-Gohary**, Water Pollution Research Department, National Research Centre, for close supervision, valuable assistance and continuous guidance and support throughout this study.

I owe my deepest gratitude to **Professor. Jukka Rintala**, Department of Chemistry and Bioengineering, Tampere University, for his excellent guidance, enthusiastic encouragement, support and motivation. The financial support from the **Finnish Government Scholarship Pool** and **Tampere University** under the supervision of **Professor. Jukka Rintala** is very much appreciated.

I would like to thank **Dr. Pritha Chatterjee** (IIT Hyderabad) and **Dr. Paolo Dessì** (National University of Ireland Galway) for the valuable guidance in the beginning of my experiments and valuable discussions (both scientific and nonscientific), pleasurable companion, and friendship during my thesis. I would also express my great thanks to **Dr. Marika Kokko** (Tampere University) for her help in writing the manuscripts. Special thanks also to **Dr. Tejaswini Gowda** for her help, support and friendship. I would like to thank **Dr. Antti Nuottajärvi** and **Mrs. Tarja Ylijoki-Kaiste** from Tampere University for help and support with my experiments. I would like to thank all members of the chemistry and bioengineering department of Tampere University.

I would like to thank the staff members of the Water Pollution Research Department of the National Research Centre.

I would like to thank with all my heart my family especially my father and my mother for their love, continuous encouragements, support and praying for me.

Finally, I would like to thank my wife **Hala** and my daughter **Aysel** who provided me with unending inspiration. I would also appreciate very much their great patience and supporting me in the ups and downs of my research.

Cairo, November 2019

Mohamed El Qelish
