# **Energy Management as an Approach for Applying Green Supply Chains: An Empirical Study on Pharmaceutical and Cosmetic Industries**

**إدارة الطاقة كمدخل لتطبيق سلاسل التوريد الخضراء:  
دراسة ميدانية علي قطاع الأدوية ومستحضرات التجميل**

*A Thesis Submitted For Partial Fulfilment of the Requirements of  
PhD Degree in Business Administration*

***Presented By***

**Marwa Abdel Moez Hussein Bakry**

***Supervised By***

**Prof. Dr.  
Khaled Kadry**

*Professor of Business Administration  
The Dean of Faculty of Business  
Ain Shams University*

**Prof. Dr.  
Hussein Sharara**

*Associate Professor of Business Administration  
Faculty of Business  
Ain Shams University*

**2020**

## **Approval Sheet**

**Thesis** : PhD Degree in Business Administration

**Researcher Name** : Marwa Abdel Moez Hussein Bakry

**Thesis Title** : Energy Management as an Approach for Applying Green Supply Chains: An Empirical Study on Pharmaceutical and Cosmetic Industries

### ***Examination Committee***

**Prof. Adel Zayed**

**Head of the Committee**

*Professor of Business Administration  
Faculty of Commerce - Cairo University*

**Prof. Khaled Kadry**

**Supervisor**

*Professor of Business Administration  
Dean of the Faculty of Business  
Faculty of Business - Ain Shams University*

**Prof. Dr. Hussein Sharara**

**Associate Supervisor**

*Associate Professor of Business Administration  
Faculty of Business - Ain Shams University*

**Prof. Dr. Bassam El Ahmady** **Member**

*Associate Professor of Business Administration  
Faculty of Business - Ain Shams University*

**Date of Dissertation Defense: 27<sup>th</sup> of February 2020**

**Approved by Faculty Council on**        /        /

**Approved by University Council on**    /        /

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

أَقْرَأُ بِسْمِ رَبِّكَ الَّذِي خَلَقَ ﴿١﴾ خَلَقَ  
الْإِنْسَانَ مِنْ عَلَقٍ ﴿٢﴾ أَلْقُرْءُ وَرَبُّكَ  
الْأَكْرَمُ ﴿٣﴾ الَّذِي عَلَّمَ بِالْقَلَمِ ﴿٤﴾ عَلَّمَ  
الْإِنْسَانَ مَا لَمْ يَعْلَمْ ﴿٥﴾

سورة العلق

صَدَقَ اللَّهُ الْعَظِيمُ

## *Acknowledgement*

*First and foremost, thanks to Allah, the most beneficial and most merciful, for everything. Getting to the presentation of this PhD was a long trip supported by my professors who were my mentors.*

*Lots of thanks to **Prof. Khaled Kadry**, Professor of Business Administration and the Dean of Faculty of Business, Ain Shams first for his kindness and humanity and second for supervising this work.*

*I am greatly indebted to my advisor **Prof. Hussein Sharara**, for his great help, outstanding support, motivation, immense knowledge, and for his extreme patience, thanks for persistent guidance and understanding from my supervisors. They enlightened my path and guided my footsteps through many obstacles.*

*I owe a special thanks to my family, my parents, my siblings, my husband, and my kids.*

*Thanks to My colleagues, my managers and my supervisors at work for being supportive and helpful.*

## *Dedication*

I dedicate this work to  
my father's soul and my  
whole family, my  
professors who were  
always supportive, my  
Colleagues who were  
always by my side

## Table of Contents

Topic	Page
Table of Contents	i
List of Figures	iv
List of Tables	v
<b>Chapter One: Research Framework</b>	<b>1-14</b>
Introduction	1
1. Research problem	2
2. Research variables	5
3. Research hypothesis	6
4. Research model	6
5. Research objective	9
6. Research importance	10
7. Research methodology	11
<b>Chapter Two: Literature Review</b>	<b>15-34</b>
Introduction	15
1. Literature review concerning energy management and green supply chain and their interface	15
2. The researcher comments on literature review	33
<b>Chapter Three: Theoretical Background</b>	<b>35-81</b>
Introduction	35
<b>1. Section 1: Green Supply Chain</b>	<b>36</b>
Introduction	36
1.1 The concept of green supply chain	36
1.2 Differences between traditional and green supply chain	39
1.3 Reasons for change to green supply chain	41
1.4 Implementation of green supply chain	44

Topic	Page
1.5 Sustainable supply chain	53
<b>2. Section 2: Energy Management</b>	54
Introduction	54
2.1 Energy management concept	55
2.2 Levels of energy management	56
2.3 Importance of energy management	57
2.4 Dimensions of energy management	59
2.5 Net zero energy	59
2.6 Barriers to energy management	61
2.7 Improving energy efficiency	64
<b>3. Section 3: Energy Management and Green Supply Chain Interface</b>	66
Introduction	66
3.1 Environmental practices	67
3.2 ISO 50001	68
3.3 Integration between ISO 50001 and green supply chain	69
3.4 Contributions of ISO 50001 to green supply chain	73
3.5 CSR as one of the results of ISO 50001 and green supply chain	76
3.6 Benefits of CSR	79
3.7 Environment CSR	80
<b>Chapter Four: Research Methodology and Results</b>	<b>82-131</b>
Introduction	82
1. Research methodology	82
2. Research hypothesis	83
3. Research population and sample	84

<b>Topic</b>	<b>Page</b>
<b>First:</b> Data Collection	90
<b>Second:</b> Validation and Verification of the Measures Used	94
<b>Third:</b> Descriptive statistical measurements of variables	104
<b>Fourth:</b> Testing hypothesis	112
4. Conclusion	124
5. Recommendations for improving performance of energy management in organizations	127
6. Suggestions for future studies	130
<b>References</b>	<b>132</b>
<b>Appendix</b>	<b>151</b>
<b>Arabic Summary</b>	-

## List of Figures

	Figure	Page
1	Research model	8
2	Benefits of green supply chain managements	42
3	Top five pressures driving green supply chain management	43
4	How mature is the green supply chain	45
5	Energy management in green supply chain management	59
6	Barriers and drivers of energy management	65
7	Scheme of green supply chain management	68
8	Central tendency and dispersion	105
9	The number of statements contained in each dimension, their measures of central tendency, and their dispersion	109

## List of Tables

	Table	Page
1	The change in price of fossil fuels in Egypt	3
2	The change in price of electricity in Egypt	4
3	Population size	12
4	Sample size	13
5	Difference between green supply chain and traditional supply chain	41
6	Definition of green supply management practices	52
7	Energy management requirements and its contribution to green supply chain management practices	71
8	Population	84
9	Sample	85
10	Determining sample size for research activities	86
11	Pharmaceutical manufacturing companies included in the sample	87
12	Response rate	89
13	Sections of the questionnaire	90
14	Validation and verification of energy management dimensions	94
15	Validation and verification of green supply chain practices dimension	97

	Table	Page
16	Validation and verification of the interface between energy management and green supply chain	99
17	Validation and verification of green supply chain and economic performance	103
18	The descriptive analysis of the presence of energy management	104
19	The phrases with the highest average and those with the lowest average	106
20	The measures of central tendency and their dispersion	107
21	The phrases with the highest average and those with the lowest average	108
22	The number of statements contained in each dimension, their measures of central tendency, and their dispersion	109
23	Phrases with the highest average and those with the lowest average	110
24	The results of the descriptive study of the economic performance of the firm	111
25	Phrases with the highest average and those with the lowest average	112
26	The correlation analysis and the simple regression between the presence of energy management and the dependent variable	114
27	The correlation analysis and the simple regression between the presence of energy management and green procurement	116

	Table	Page
28	The correlation analysis and the simple regression between the presence of energy management and green manufacturing	117
29	The correlation analysis and the simple regression between the presence of energy management and green distribution	119
30	The correlation analysis and the simple regression between the presence of energy management and the application of reverse supply chains	120
31	The correlation analysis and the simple regression between green practices and the dependent variable (the economic performance of the firm)	122
32	The Mann-Whitney U test	123
33	Recommendation Action Plan	128
