Bacteriology, Mycology and Immunology

B16629

**DESCRIPTION AND COMPARISON OF DNA PROBES AND
ENZYME-LINKED IMMUNOSORBENT ASSAY FOR THE
DETECTION OF ANAPLASMA MARGINALE IN BOVINES**

Thesis Submitted

By

Khaled Farouk Mohammad Abd El Hamid
Bachelor Degree of Veterinary Sciences, 1992

*in the Partial Fulfilment of Master Degree in
Veterinary Science*

Bacteriology, Mycology and Immunology

Under supervision of

Prof. Dr. Waguih Armanious Gad-El Said
*Professor of Microbiology,
Chairman of Bacteriology, Mycology and Immunology Dept.
Faculty of Veterinary Medicine
Cairo University*

Dr. Gamal El-Saeid Eid
*Assistant Professor of Microbiology
Bacteriology, Mycology and Immunology Department
Faculty of Veterinary Medicine
Cairo University*

1996

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

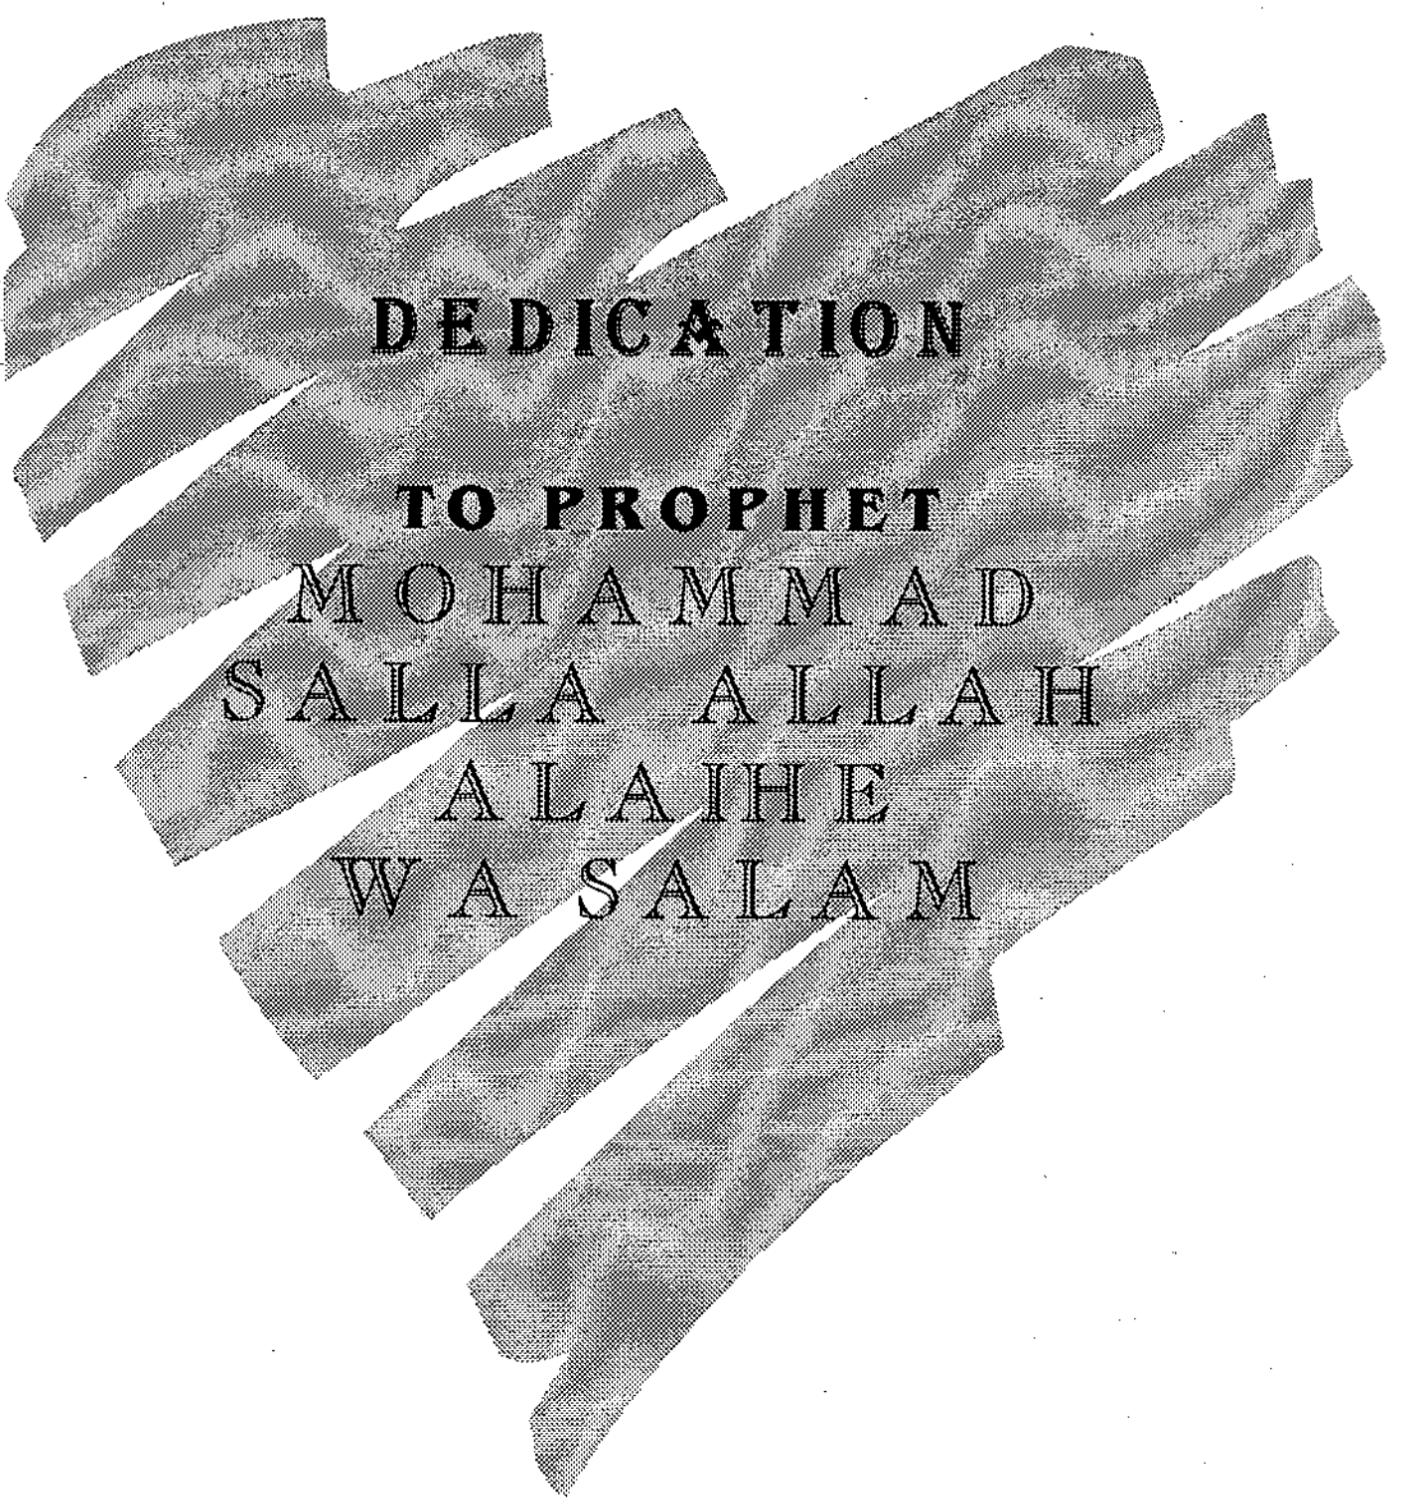

﴿قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا

عَلَّمْنَا إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ﴾

صَدَقَ اللَّهُ الْعَظِيمُ

(سورة البقرة، آية ٣٢)

This work was carried out in the Biotechnology Laboratory, Faculty of Veterinary Medicine, Cairo University and supported through a project of cooperative agreement No. 263-0152-A-00-2207, entitled "Control of Anaplasmosis and Babesiosis in Egypt through Biotechnology"

DEDICATION
TO PROPHET
MOHAMMAD
SALLA ALLAH
ALAIHE
WA SALAM

ACKNOWLEDGEMENT

First of all, I would like to express my greatest thanks to
ALLAH *Almighty who gave me this opportunity to carry out this thesis and supported me with his blessing and unlimited care.*

I am deeply honoured to have the opportunity to express my great indebtedness and gratitude to my scientific father Prof. Dr. Waguih Armanious Gad El Said, Chairman of Microbiology Department, Faculty of Veterinary Medicine, Cairo University who kindly devoted a great deal of his valuable time in planning the entire development of this work. Because of his sincere initiating power, effective scientific supervision, stimulating suggestions, constructive criticism, continual encouragement, valuable advices, intense kind efforts and generous help, this work was brought to light. It is a great honour to work under his supervision.

It is difficult to translate my special feelings of love towards Dr. Gamal El Saeid Eid, Assistant Professor of Microbiology, Faculty of Veterinary Medicine, Cairo University. He, very generously, lent me all the required facilities to accomplish this work. Certainly, I would like to send him all kinds of respect and appreciation. I can not forget his guidance, endless help along the course of this work, his special care, his encouragement, his valuable advices, his thinking about my future and his guiding lights. He was the first man who taught me how to deal with DNA. I can not forget his friendly relationship and fruitfull time that we spent in our biotechnology laboratory together with our close friend Anaplasma marginale. He is an ideal model of the researcher and scientist. For him, I am indebted for ever.

A special word of cardial thanks should be sent to my parents who taught me unlimited things in life and encouraged me to complete my studies.

My deepest thanks and gratitude to my brothers, sweetie wife and lovely son Gehad for their kind patience, sacrifice as well as their continuous encouragement which ensured the fair and smooth flow of my work.

I would like to express my heart felt gratitude to our scientific grandfather Professor Dr. Ahmed Farid, Professor of Microbiology, Faculty of Veterinary Medicine, Cairo University for his kindness and his great help.

I have a great pleasure to offer a hug to my brother Dr. Mahmoud Hashad, Lecturer of Microbiology, Faculty of Veterinary Medicine, Cairo University for his descant smile, his kindness and goodness, his generous help and his scientific opinion. He was the first man who learned me how to deal with the library. He gave me time and all other things which helped me to accomplish this thesis in an excellent form.

My meaning of love to all my professors, members, workers of the Microbiology Department, Faculty of Veterinary Medicine, Cairo University, for their continuous support and love since I had been appointed as a demonstrator in the Department.

A special word of thanks must be extended to my colleagues Mr. Ossama Abd El Raoof, Mr. Mustafa El Metwaly, Mr. Ihab Ibrahim, Mr. Youhana Sabet, Mr. Khaled Zein and Mrs. Nashwa Abd El Salam for cooperation and continuous help.

It is a great pleasure to record my sincere thanks to Mr. Mohamed El Shafei for his technical assistance through this work.

Finally,

I wish to express my sincere thanks to Mr. Mustafa Ibrahim Mustafa for his highly efforts, his trim touch and his magic fingers. All these qualifications helped me to complete the typing of this thesis in an excellent form and short time.

Yours
Khaled Farouk Al Amery

LIST OF CONTENTS

NUMBER	TITLE	PAGE
1.	INTRODUCTION.	1
2.	REVIEW OF LITERATURE.	8
2.1.	Anaplasmosis.	8
2.1.1.	Economic importance.	21
2.1.2.	Anaplasma species.	25
2.1.2.1	Genome structure of Anaplasma marginale.	32
2.1.2.1.1	Major surface proteins of Anaplasma marginale and their encoding gene families.	35
2.1.2.1.1.1	Major Surface Protein 1 "MSP-1".	37
2.1.2.1.1.2.	Major Surface protein 2 "MSP-2".	42
2.1.2.1.1.3.	Major Surface protein-3 "MSP-3".	46
2.1.2.1.1.4.	Major Surface Protein-4 "MSP-4".	48
2.1.2.1.1.5	Major Surface Protein-5 "MSP-5".	50
2.1.2.1.1.6	Intermolecular relationships of Anaplasma marginale major surface proteins "M.S.Ps".	52
2.1.2.1.1.7	Anaplasma marginale isolate-restricted and isolate-common antigens.	53
2.1.2.1.1.8	Antigenic variations between Anaplasma species.	56
2.1.3.	Trials for diagnosis of anaplasmosis.	59
