ZAGAZIG UNIVERSITY**

**2005**

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

"قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا

إِلَّا مَا عَلَّمْتَنَا إِنَّكَ أَنْتَ

الْعَلِيمُ الْحَكِيمُ"

صدق الله العظيم

"سورة البقرة - آية ٣٢"

## ACKNOWLEDGEMENT

I would like to begin by thanking God for granting me the ability to complete this work. My thanks and cordial appreciation to my dear family for their continuous support.

It is with deep appreciation and gratitude that I acknowledge the great support of **Prof. Safya Galal Khalifa**, Prof. of Pediatrics Benha Faculty of Medicine, Zagazig University for his kind assistance, support and supervision which were essential for the completion of this work.

I am extremely indebted to **Prof. Mohamed Mahmoud Rashad**, Prof. of Pediatrics, Benha Faculty of Medicine, Zagazig University for his sincere help, continuous guidance and assistance throughout the work without which it could not have been accomplished.

I would like to express my thanks to **Prof. Maha Yousef**, Prof. of Clinical Pathology, Benha Faculty of Medicine, Zagazig University, for his guidance, reassurance and help.

I am extremely indebted to **Dr. Mohamed El-Sherbeeney**, Lecturer of Pediatrics, Benha Faculty of Medicine, Zagazig University for his sincere help, continuous guidance and assistance throughout the work without which it could not have been accomplished.

Finally, I would like to express my sincere thanks to all those who helped me directly or indirectly during the preparation of this work.

## LIST OF ABBREVIATIONS

ADHD	: Attention disorder deficit hyperactivity.
APC	: Antigen presenting cells.
BALF	: Broncho- alveolar lavage fluid
b-FGF	: Basic fibroblast growth factor.
BCG	: Bacille Calmett Gumarate.
BHR	: Bronchial hyperresponsiveness.
BMI	: Body mall index.
CAM	: Cell adhesion molecule.
COPD	: Chronic obstructive pulmonary dis.
EAR	: Early asthmatic response
ECM	: Extracellular
EGFR	: Epidermal growth factor receptor.
FEF <sub>25-75</sub>	: Forced expiratory flow through the mid portion of the F.V.C
FEV1	: Forced expiratory volume.
GM.CSF	: Granulocyte mousocyte colony stimulating factor
IFN	: Interferon.
IgE	: Immunoglobuline E
IL	: Interleukin.
LAR	: Late asthmatic response.
LJ	: Leukotriens.
MDI	: Metered dose inhaler.
MHC	: Major histocompatibility complex
MIP	: Macrophage inflammatory protein.
MMFC	: Maximum mid expiratory flow
MMP	: Matrix metal oprotenase

NAMEPP	: National asthma education and prevention prog.
NK cell	: Natural killer cells.
OSA	: Obstructive sleep apnea.
PAF	: Platelet activating factor.
PC	: Provocative concentration.
PD	: Provocative dose
PDGF	: Platelet derived growth factor.
PEF	: Peak expiratory flow.
PEFR	: Peak expiratory flow rate.
PGD2	: Prostaglandins
RANTES	: Regulated on activation normal T cells expressed and secreted.
RAST	: Radio allergosorbent test.
RSV	: Resp. syncytial virus.
TAAAs	: Tayside Asthma assessment stamp.
TH	: T helper cells
TGF	: Transforming growth factor.
TLC	: Total lung capacity
TNF	: Tumour necrosis factor.
U.K.	: United kindome
VCAM	: Vascular cells adhesion molecule.
VLA	: Very late antigen.

## LIST OF FIGURES

FIGURES OF THE REVIEW	Page
Figure (1): Normal airway	6
Figure (2): Inflammation of airway	7
Figure (3): Pathological changes in asthma	36
Figure(4):Concept of direct and indirect airway hyper-responsiveness	37
Figure (5): Factors that contribute to air flow limitation in asthma.	49
Figure (6): Natural history of asthma.	55
Figure (7): Inflammatory cascades asthma.	56
Figure (8): Inflammation and remodeling in asthma.	60
Figure (9): Remodeling in asthma	61
Figure (10): Moth, Uuvla	93
Figure (11): Anatomy of upper airway	94
Figure (12): BMI in boys	116
Figure (13):BMI in females	116
Figure (14): Body mass index in Egyptian girls.	117
Figure (15): Body mass index in Egyptian boys.	117
Figure (16): Predicated PEFr to hight.	120
Figure (17): Lung volumes to time in seconds.	120
FIGURES OF THE RESULTS	
Figure (1): Prevalence of clinical diagnosis among the study group.	124
Figure (2): Prevalence of asthma according to parental smoking	127
Figure (3): Prevalence of asthma according to allergic rhinitis	129
Figure (4): Prevalence of snoring according to allergic rhinitis	132
Figure (5): Distribution of asthma in relation to snoring	136
Figure (6): Distribution of nocturnal cough according to asthma.	137
Figure (7): Distribution of nocturnal cough according to snoring	138
Figure (8): Relation between nocturnal cough asthma and snoring	139

## LIST OF TABLES

<b>Tables FIGURES OF THE REVIEW</b>	<b>Page</b>
Table (1): Classification of asthma, exacerbation severity	75
Table (2): Classification of asthma severity by clinical features before treatment.	77
Table (3): Classification of asthma severity by daily medication regimen and response to treatment.	87
Table (4): Differential diagnosis of childhood asthma.	79
Table (5): Stepwise approach for managing asthma in children older than 5 y.	82
Table (6): Recommended medications by level of severity: Children younger than 5 y.	84
Table (7): Management of an asthma attack home treatment.	85
Table (8): Choice of inhaler device for young children.	85
Table (9): Management of asthma attacks hospital – Based care.	86
Table (10): Usual dosages for long-term control medication.	87
<b>TABLES OF THE RESULTS</b>	
Table (1) : Clinical features of study group.	122
Table (2): Distribution of the study group according to age and sex	123
Table (3): Prevalence of clinical diagnosis among the study group.	123
Table (4): Pulmonary function test among asthmatic group.	125
Table (5): Prevalence of asthma according to age.	125
Table (6): Prevalence of asthma according to sex.	126
Table (7): Prevalence of asthma according to parental smoking (passive smoking).	126
Table (8): Prevalence of asthma according to obesity.	128
Table (9): Prevalence of asthma according to allergic rhinitis	128
Table (10): Prevalence of snoring according to age.	130
Table (11): Prevalence of snoring according to sex.	130

Table (12): Prevalence of snoring according to smoking	131
Table (13): Prevalence of snoring according to obesity	131
Table (14): Prevalence of snoring allergic rhinitis.	132
Table (15): Prevalence of nocturnal according to age.	133
Table (16): Prevalence of nocturnal according to sex.	133
Table (17): Prevalence of nocturnal according to parental smoking	134
Table (18): Prevalence of nocturnal cough according to obesity.	134
Table (19): Prevalence of nocturnal cough according to allergic rhinitis	135
Table (20): Distribution of asthma in relation to snoring	135
Table (21): Distribution of nocturnal cough according to asthma.	137
Table (22): Distribution of nocturnal cough according to snoring	138
Table (23): Relation between nocturnal cough asthma and snoring.	139
Table (24): Relation between snoring and severity of asthma.	140
