A GILBERT CELL BASED GAIN AND PHASE MISMATCH CALIBRATION LOOP FOR 5G BEAMFORMERS

By

Mohamed Kamel Mohamed Hussein

A Thesis Submitted to the
Faculty of Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the Degree of
MASTER OF SCIENCE
in
Electronics and Communications Engineering

FACULTY OF ENGINEERING ,CAIRO UNIVERSITY
GIZA,EGYPT
2020

A GILBERT CELL BASED GAIN AND PHASE MISMATCH CALIBRATION LOOP FOR 5G BEAMFORMERS

By

Mohamed Kamel Mohamed Hussein

A Thesis Submitted to the
Faculty of Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the Degree of
MASTER OF SCIENCE
in
Electronics and Communications Engineering

Under the Supervision of

Prof. Islam A. Eshrah

Professor

Electronics and Communications Engineering
Faculty of Engineering , Cairo University

Dr. Mohamed A. Y. Abdalla

Assistant Professor

Electronics and Communications Engineering
Faculty of Engineering, Cairo University

FACULTY OF ENGINEERING ,CAIRO UNIVERSITY
GIZA,EGYPT
2020

A GILBERT CELL BASED GAIN AND PHASE MISMATCH CALIBRATION LOOP FOR 5G BEAMFORMERS

By

Mohamed Kamel Mohamed Hussein

A Thesis Submitted to the
Faculty of Engineering at Cairo University
in Partial Fulfillment of the
Requirements for the Degree of
MASTER OF SCIENCE
in
Electronics and Communications Engineering

Approved by the Examining Committee:

Prof. Islam A. Eshrah,	Thesis Main Advisor
-------------------------------	---------------------

Prof. Ahmed Nader Mohieldin ,	Internal Examiner
--------------------------------------	-------------------

Dr. Mohamed A. M. El-Nozahi ,	External Examiner
--------------------------------------	-------------------

Associate professor at ECE Dept.
Faculty of Engineering, Ain Shams university

FACULTY OF ENGINEERING ,CAIRO UNIVERSITY
GIZA,EGYPT
2020

Engineer's Name: Mohamed Kamel Mohamed Hussein
Date of Birth: 06/04/1993
Nationality: Egyptian
E-mail: Engineer's E-mail
Phone: +201092856919
Address: Misr El-Gdeeda, Cairo, Egypt.
Registration Date: 01/10/2016
Awarding Date: --/--/2020
Degree: Master of Science
Department: Electronics and Communications Engineering

Supervisors:

Prof. Islam A. Eshrah
Dr. Mohamed A. Y. Abdalla

Examiners:

Prof. Islam A. Eshrah (Thesis Main Advisor)
Prof. Ahmed Nader Mohieldin (Internal Examiner)
Dr. Mohamed A. M. El-Nozahi (External Examiner)
Associate professor at ECE Dept.
Faculty of Engineering, Ain Shams university

Title of Thesis:

**A Gilbert Cell Based Gain and Phase Mismatch Calibration
Loop for 5G Beamformers**

Key Words:

5G mobile networks; mm-Wave beamformers; calibration; Gilbert cell

Summary:

This thesis explores some calibration methods for gain and phase mismatch between beamformer channels responsible for either RF signals transmission or reception through a mmw 5G antenna array. These methods eliminates thos e mismatches leading to improve the accuracy of the direction of the beam and the exact distance between the transmitter and the receiver . The thesis represents an innovative low power calibration loop that is implemented in TSMC 65nm BiCMOS technology. The design procedure and the layout implementation for all of the building blocks are studied in detail and the simulation results for each block and for the top level will be presented to show the impact of the loop on the overall system performance

Disclaimer

I hereby declare that this thesis is my own original work and that no part of it has been submitted for a degree qualification at any other university or institute.

I further declare that I have appropriately acknowledged all sources used and have cited them in the references section.

Dedication

To Mom, Zeinab Omar

To Dad, Kamel Mohamed Hussein

To my sister, Noha

To my nieces, Jana and Jomana

To All of my great teachers and Professors

To my friend and Colleagues

And to all of my colleagues at Analog Devices, Egypt design center.

THANK YOU...

Acknowledgements

In the name of Allah the most merciful the most gracious; all thanks to Allah the Lord of the Heavens and Earth and peace be upon Mohamed and his companions. I wish to express my gratitude to my principal advisers, Dr. Mohamed Youssef who was helpful and offered invaluable assistance, support and guidance. I am also genuinely blessed to have Dr. Islam Eshrah as a member of the supervisory committee, for his great efforts and constant care.

Many thanks to my friends and colleagues for their support and help through the duration of this work.

Special thanks to my family at Analog Devices, Egypt design center.

My deepest gratitude to my family. Without their encouragement, I would not have gone this far.

Mohamed.
