ORBICULARIS OCCULI; SURGICAL ANATOMY AND ITS IMPLICATION IN LOWER BLEPHAROPLASTY

Thesis

1377465

Submitted for Partial Fulfillment of
The Doctorate Degree (M.D) in
General Surgery

By

Ahmed Fathy Abo-Rady
(M.B., B.Ch., M.Sc., Cairo University)

Under supervision of

Prof. Dr. Safwat Abdulkader Salem

*Professor of General & Plastic Surgery,
Faculty of Medicine, Cairo University*

Prof. Dr. Ahmed Tarek Atta

*Professor of General & Plastic Surgery,
Faculty of Medicine, Cairo University*

Prof. Dr. Fathy Farouk Khodair

*Professor of General & Plastic Surgery,
Faculty of Medicine, Cairo University*

Prof. Dr. Haytham Ezzat Nasr

*Professor of Ophthalmology,
Faculty of Medicine, Cairo University*

**Faculty of Medicine,
Cairo University**

ACKNOWLEDGEMENT

I would like to start their humble work by expressing my deepest gratitude to all the team that helped me in achieving it.

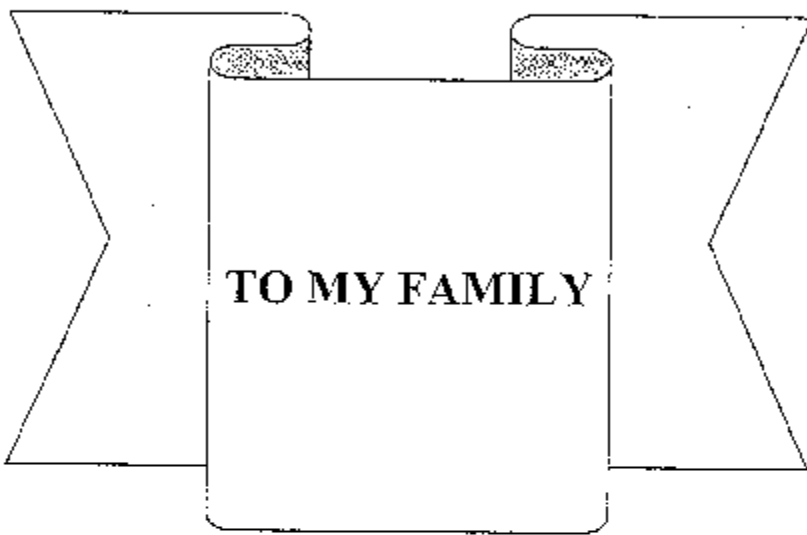

I wish to thank our Professor Dr. Safwat Abdulkader Salem Professor of General & Plastic Surgery, Faculty of Medicine, Cairo University; who honored me by carrying out the burden of meticulously revising my script and guiding my thoughts.

I am also profoundly grateful to Prof. Dr. Ahmed Tarek Atta, Professor of General & Plastic Surgery, Faculty of Medicine, Cairo University, for his brotherly guidance and enormous support that was a great help to me.

I am deeply indebted to Prof. Dr. Fathy Farouk Khodair, Professor of General & Plastic Surgery, Faculty of Medicine, Cairo University, whose kindness was more than encouraging.

I would like to express my sincere thanks and deep gratitude to Prof. Dr. Haytham Ezzat Nasr, Professor of Ophthalmology, Faculty of Medicine, Cairo University, for his energetic follow up with constructive advice, criticism and creative suggestions.

Last, but not least, I would like to thank all members of the Department of General Surgery, Faculty of Medicine, Cairo University for their help.

TO MY FAMILY

CONTENTS

	Page
▪ Introduction and Aim of the Work	1
▪ Review of Literature	3
○ Surgical anatomy of the eyelid	3
○ Current concepts of eyelid function, innervation and biomechanics	50
○ Aging changes in the eyelid and periorbital area ...	66
○ Evaluation of the cosmetic oculoplastic surgery patient	83
○ The history of cosmetic oculoplastic surgery	93
○ Operative approach	97
○ No touch lower blepharoplasty	110
○ Blepharoplasty complications and its management	117
▪ Patients and Methods	135
▪ Results	150
▪ Case Presentation	157
▪ Discussion	167
▪ Conclusion	176
▪ Summary	177
▪ References	178
▪ Arabic Summary	185

LIST OF FIGURES

No.	Title	Page
1	Normal eyelid surface anatomy	4
2	The white scleral triangles	5
3	The orbital septum in the Asian and the non-Asian upper eyelid	6
4	(A) The upper lid crease, (B) The upper lid fold	7
5	Surface anatomy of the lower eyelid and malar area	8
6	Cross section of the lower lid	9
7	The tarsal plates and canthal ligaments	10
8	The medial canthal ligament	10
9	The lateral canthal ligament	12
10	The posterior lamellar ligamentous and support structures	13
11	The orbital septum	14
12	The orbicularis oculi muscle	16
13	The orbicularis oculi muscle	16
14	The levator palpebrae superioris	17
15	Muller's muscle	20
16A	The capsulopalpebral fascia	21
16B	The inferior muscle	22
17	Postseptal fat pads in upper and lower eyelids	23
18	Orbital septum and fat pads	24
19	Midfacia anatomy in cross section	25
20	Layered anatomy of the midface	26
21	ROOF or brow fat in the upper lid	27-28
22A	The orbitomalar ligament	28
22B,C	Sagittal views of the primary midface periosteal attachments	29
23	The anatomy of the tear trough	30
24	Arterial supply of the eyelids and periorbital region	31
25	The internal carotid blood supply	32
26	Arterial cast	35
27	The position of the inferior arcade in the lower lid	36
28	Venous anatomy	38
29	The lymphatic drainage of the upper and lower eyelids	39
30	Sensory nerves to the periorbital region	41
31	The four major nerves requiring nerve blocks for periorbital surgery	42
32	Motor innervation of the periorbital region	43
33	The muscles of the forehead and brow area	44
34	Fascial layers in the brow temporal area	45

No.	Title	Page
35	Cross section of the eyelid margin demonstrating Riolan's muscles and the pilosebaceous gland	46
36	Lacrimal gland and lacrimal drainage system	49
37	Benign essential blepharospasm	51
38A	Renvolds procedure	51
38B	The offending nerves are avulsed	52
39	Blepharospasm	52
40	Blepharospasm	53
41	Anderson's neuromyectomy procedure	54
42	Division of labor and orbicularis function	55
43	The orbicularis in the inner canthus	56
44	The anatomic triangle	57
45	An anatomic dissection showing the buccal branches traveling in the midface area	58
46	An anatomic dissection showing the buccal branch in the inner canthus	59
47	The distribution of the infraorbital nerve and sensory nerves	60
48	Interruption of the buccal branches of the facial nerve to the inner canthus	61
49	The effects of lateral canthal fixation or anchoring to eyelid function	62
50	Eyelid closure mechanics	63
51	Dehiscence and laxity of lateral canthal tendon fixation	63
52	Dehiscence and laxity of lateral canthal tendon fixation	64
53	Variation in lateral canthal fixation, organized according to eye prominence	65
54	Contraction of the orbicularis, corrugator, and procerus muscles	66
55	The normal spacing of the brow-lash distance before aging changes	67
56	Standard aging changes	69
57	Aging changes in the lower lids	71
58	Usual areas of fat herniation and protuberance	71
59	The spring-back test	72
60	Variations in canthal tilt	73
61	Aging changes	74
62	The normal position of the inferior arc of the orbicularis oculi muscle	75
63	The normal position of the orbital malar and zygomaticofacial ligaments	75
64	The normal position of the inferior arc of the orbicularis oculi	76
65	A patient with characteristic indentations and midfacial folds	76

No.	Title	Page
66	The four types of eye-periorbital changes	77
67	Anatomic delineation of the tear trough deformity	79
68	The anatomic layers in the prezygomatic space	79
69	Measurement of the amount of eyebrow ptosis	84
70	The margin crease distance (MCD)	85
71	The palpebral fissure width	86
72	The amount of horizontal laxity of the lower eyelid	88
73	Lateral canthal tendon laxity	88
74	A basic tear secretion test	91
75	Transconjunctival blepharoplasty	93
76	Transconjunctival blepharoplasty	93
77	The proper internal vector for canthal anchoring	99
78	Differences between the vertical position of canthal anchoring	100
79	Canthopexy and canthioplasty	102
80	The lower eyelid lamellae	111
81	The lateral canthus	112
82	The no touch lower blepharoplasty	112
83	The no touch lower blepharoplasty	114
84	Blepharoplasty complications	117
85	Retrobulbar hemorrhage	118
86	CT scan after transcutaneous blepharoplasty showing aggregated clot and hemorrhage in the orbital apex	120
87	Pericentral corneal abrasion	121
88	A blepharoplasty patient developed <i>Pseudomonas</i> cellulitis	122
89	Chemosis	123
90	Residual blepharoptosis	124
91	Lower eyelid malposition after blepharoplasty	125
92	Inferior oblique paresis	128
93	Cicatricial lower eyelid retraction	130
94	Age difference between the 2 groups	150
95	Strasser's classification of both groups summarized	155
96	Pie chart showing the percentage of patient's satisfaction in group A	156
97	Pie chart showing the percentage of patient's satisfaction in group B	156

LIST OF TABLES

No.	Title	Page
1	Baseline demographic and preoperative morphologic characteristics	151
2	Operative management	151
3	Comparison between surgical time in both groups	152
4	Postoperative complications and revisions	152
5	Comparison between surgical outcome of both groups by first surgeon using modified Strasser classification.	153
6	Comparison between surgical outcome of both groups by second surgeon using modified Strasser classification	154
7	Comparison between surgical outcome of group A results by both surgeons using modified Strasser classification	154
8	Comparison between surgical outcome of group B results by both surgeons using modified Strasser classification	154
