The Potential Role of Cyclooxygenase-2 Inhibitors in the Treatment of Experimentally-Induced Mammary Tumor

B16700

Thesis

**Submitted for the Master Degree (M.Sc.) in Pharmaceutical Sciences
(Pharmacology)**

By

Ahmed El-Sayed Abd El-Hameed Goda, B.Sc. Pharmacy

Instructor

Pharmacology and Toxicology Department

Faculty of Pharmacy

Tanta University

Under Supervision of

Prof. Dr. Wageh M. Awara

*Professor of Pharmacology and Toxicology,
and Vice Dean of the Faculty of Pharmacy
Tanta University*

Prof. Dr. Alaa E. El-Sisi

*Assistant Professor of Pharmacology and Toxicology
Faculty of Pharmacy
Tanta University*

Dr. Magda E. El-Sayad

*Lecturer of Pharmacology and Toxicology
Faculty of Pharmacy
Tanta University*

FACULTY OF PHARMACY

TANTA UNIVERSITY

2003

بسم الله الرحمن الرحيم

قَالَ تَوَدُّ
سُبْحَانَكَ
وَمَا يَدْرِي

لَا عِلْمَ لَنَا
بِشَيْءٍ إِلَّا
بِمَا عَلَّمَنَا

أَنْتَ أَعْلَمُ
بِشَيْءٍ إِلَّا
بِمَا عَلَّمْنَا

صدق الله العظيم

2) Prof. Dr. Mohamed Naguib Zakaria

Professor of Pharmacology and Toxicology

Vice Dean, Faculty of Pharmacy, Zagazig University

M...N...Zakaria

3) Prof. Dr. Wageh M. Awara

Professor of Pharmacology and Toxicology

Vice Dean, Faculty of Pharmacy, Tanta University

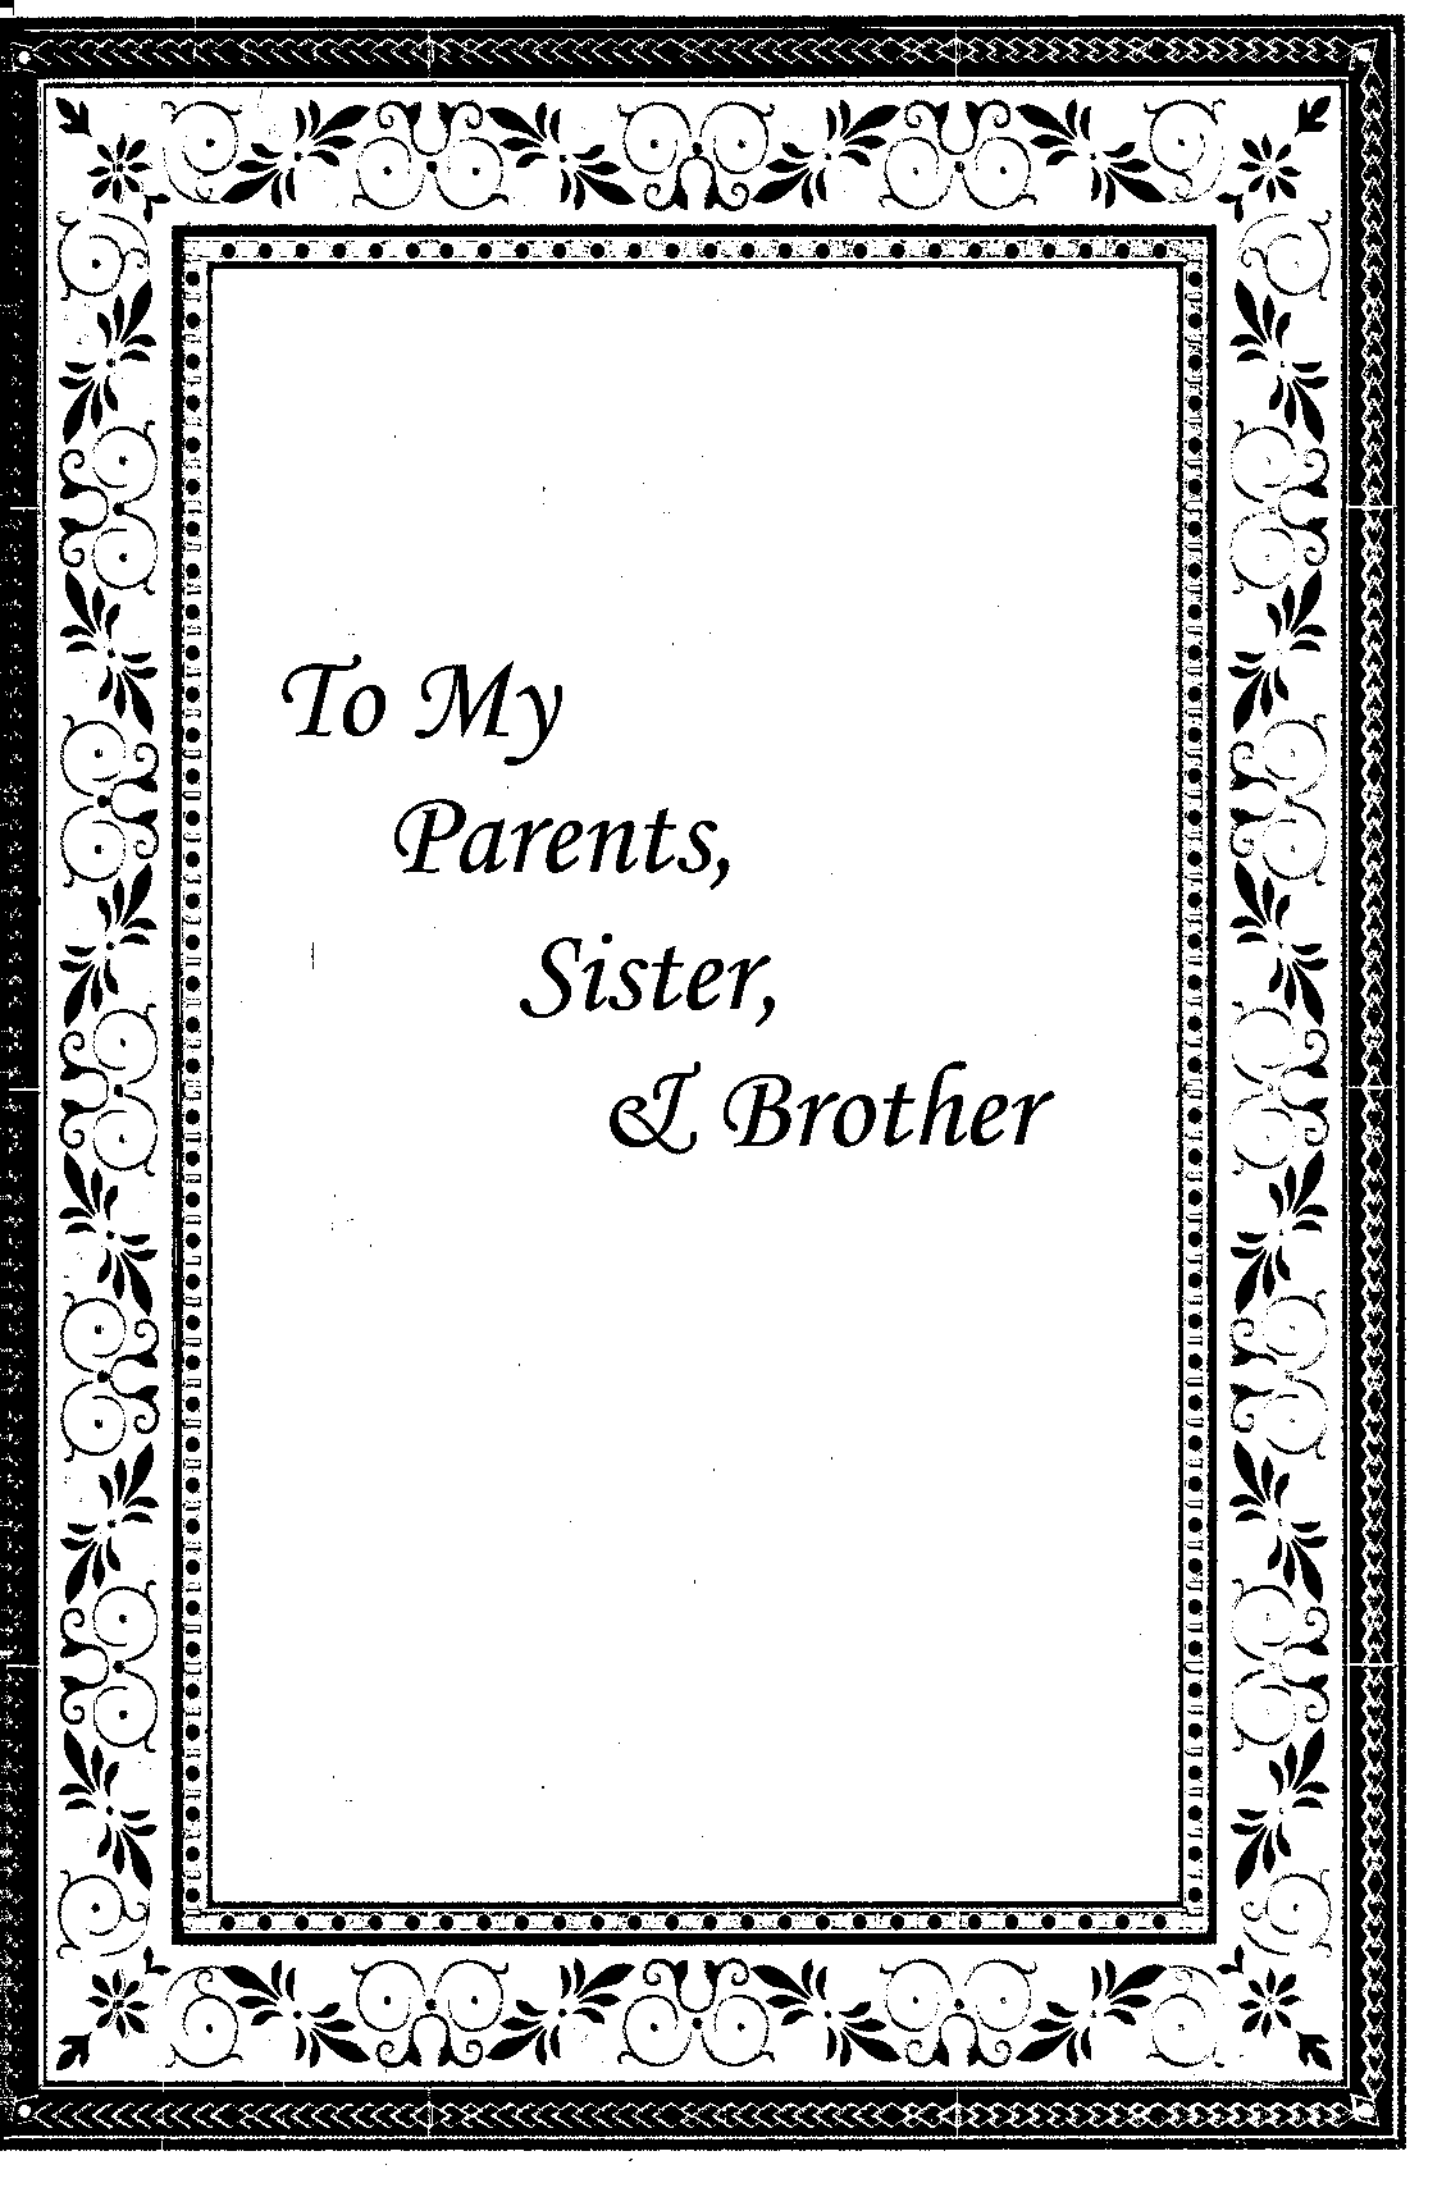

Wageh Awara
.....

4) Prof. Dr. Alaa El-Din E. El-Sisi

Assistant Professor of Pharmacology and Toxicology

Faculty of Pharmacy, Tanta University

*To My
Parents,
Sister,
& Brother*

Acknowledgements

I am sincerely indebted and profoundly grateful to **Prof. Dr. Wageh M. Awara**, Professor of Pharmacology and Toxicology, and Vice Dean of the Faculty of Pharmacy, Tanta University, for his continuous supervision, indispensable comments and suggestions. His foresight and patience, objective and critical evaluation, unselfish sharing of his time, invaluable support and continuous encouragement led me through the intricacies of producing this thesis.

I wish to express my sincere appreciation and deep gratitude to **Prof. Dr. Alaa E. El-Sisi**, Assistant Professor of Pharmacology and Toxicology, Faculty of Pharmacy, Tanta University, for his invaluable assistance and real support, and professional guidance throughout the whole work.

My cordial thanks are expressed to **Dr. Magda E. El-Sayad**, Lecturer of Pharmacology and Toxicology, Faculty of Pharmacy, Tanta University, for her meaningful suggestions, close observation, and great cooperation.

I owe a heavy debt of gratitude to **Prof. Dr. Abdel-Moneim Osman**, Professor of Pharmacology and Experimental Oncology, and Head of Pharmacology Unit, National Cancer Institute, Cairo University, for generously providing us with Ehrlich Ascites Carcinoma cell line, his indispensable contributions, kind help, and continuous advice throughout this work.

My special thanks goes also to **Prof. Dr. Mohamed M. Sayed-Ahmed**, Assistant Professor of Pharmacology and

Experimental Oncology, and **Dr. Raafat El-Awady**, lecturer of Pharmacology and Experimental Oncology, National Cancer Institute, Cairo university, for their invaluable technical assistance and fruitful cooperation.

I wish to express my gratitude to **Prof. Dr. Karima El-Desoky**, Professor of Pathology, Faculty of Medicine, Tanta University, for her marvelous help and professional assistance in the immunohistochemistry and histopathology parts of this thesis.

I would like to extend thanks to all members of Pharmacology and Toxicology Department, Faculty of Pharmacy, Tanta University for their fruitful cooperation and sincere efforts.

Finally, a special word of thanks to my kind parents, sister and brother for their continuous support, never-fading care, and providing a quite environment to accomplish this work.

AIM OF THE WORK.....	1
INTRODUCTION	
Breast Cancer.....	2
Risk Factors for Breast Cancer.....	3
Stages of Breast Cancer.....	3
Symptoms of Breast Cancer.....	4
Diagnosis of Breast Cancer.....	5
Treatment of Breast Cancer.....	5
The Cell Cycle.....	10
Signaling Pathways of Apoptosis.....	13
Angiogenesis of Tumors.....	16
Regulation of Angiogenesis.....	17
The Impact of P-glycoprotein on Cancer Chemotherapy.....	18
The Role of Cyclooxygenases in Cancer.....	20
Epidemiology and expression of COX-2 in Cancer.....	22
Mechanisms of COX-2 Involvement in Cancer.....	26
The Role of Nitric Oxide in Cancer.....	32
Biological Effects of Nitric Oxide.....	33
Nitric Oxide Synthase Expression in Cancer.....	36
The role Nitric Oxide in Apoptosis.....	37
Experimental Models of Mammary Tumors.....	37
MATERIALS AND METHODS	
Animals.....	40
Cell Line.....	40
Tumor Model.....	40
Drugs.....	41
Chemicals.....	41
Preparation of Drug Solutions.....	42
Classification of Animals.....	42
Assessed parameters.....	43
Assessment of the Time-Course Effects of Different Drug Treatments on the Volume of Solid Ehrlich Carcinoma.....	45
Assessment of The Effect of Different Drug Treatments on the Growth Delay of Solid Ehrlich Carcinoma.....	46
Determination of Nitric Oxide (as Nitrate/Nitrite) in Solid Ehrlich Carcinoma.....	47
Determination of DNA content of Solid Ehrlich Carcinoma.....	51
Assessment of P-glycoprotein Activity in EAC Cells Using Rhodamine 123.....	55
DNA Fragmentation Analysis of Cultured Ehrlich Ascites Carcinoma Cells.....	59
Immunohistochemical Determination of the tumor suppressor gene product p53 protein in Solid Ehrlich Carcinoma.....	62
Histopathological Examination and Determination of Apoptotic Index of Solid Ehrlich Carcinoma.....	65

Statistical Analysis.....	67
RESULTS	
Time-Course Effects of COX Inhibitors Alone or in Combination with Doxorubicin on the Growth of Solid Ehrlich Carcinoma.....	68
Time-Course Effects of L-NAME or L-Arginine Alone or in Combination with Celecoxib on the Growth of Solid Ehrlich Carcinoma.....	73
Effects of COX Inhibitors Alone or in Combination with Doxorubicin on the Tumor Growth Delay of Solid Ehrlich Carcinoma.....	78
Effects of L-NAME or L-Arginine Alone or in Combination with Celecoxib on the Tumor Growth Delay of Solid Ehrlich Carcinoma.....	81
Effects of COX Inhibitors Alone or in Combination with Doxorubicin on Nitric Oxide Level of Solid Ehrlich Carcinoma...	83
Effects of L-NAME or L-Arginine Alone or in combination with Celecoxib on Nitric Oxide Level in Solid Ehrlich Carcinoma.....	86
Effects of COX Inhibitors Alone or in Combination with Doxorubicin on the DNA content of Solid Ehrlich Carcinoma.....	89
Effects of L-NAME or L-Arginine Alone or in combination with Celecoxib on the DNA Content of Solid Ehrlich Carcinoma.....	92
Effects of COX Inhibitors on P-glycoprotein Function in Ehrlich Ascites Carcinoma Cells Using Rhodamine 123.....	95
Effects of L-NAME or L-Arginine on P-glycoprotein Function in Ehrlich Ascites Carcinoma Cells Using Rhodamine 123.....	99
Effects of Different Treatments Alone or in Combination on the DNA fragmentation Analysis of Cultured Ehrlich Ascites Carcinoma Cells.....	103
Effects of COX Inhibitors Alone or in Combination with Doxorubicin on the Expression of Tumor Suppressor Gene Product p53 protein Solid Ehrlich Carcinoma.....	105
Effects of L-NAME or L-arginine Alone or in Combination with Celecoxib on the Expression of Tumor Suppressor Gene Product p53 protein Solid Ehrlich Carcinoma.....	109
Effects of COX Inhibitors Alone or in Combination with Doxorubicin on Histopathology of Solid Ehrlich Carcinoma.....	112
Effects of L-NAME or L-Arginine Alone or in Combination with Celecoxib on Histopathology of Solid Ehrlich Carcinoma.....	119
