***Evaluation of the Anterior Cervical Approach for
Treatment of Traumatic Subaxial Cervical Spine
Fractures and Dislocations***

Thesis

Submitted to the Faculty of Medicine, Minoufiya University
in partial fulfillment of Master Degree
in General Surgery

BY

Ahmed Gabry Moustafa El Nagar
M.B.B.Ch

Supervisors

Prof. / Said Gamal El Din Askar

*Professor of General Surgery
Minoufiya University*

Prof. / Yousry Mahmoud Samy El Adawy

*Professor of Neurosurgery
Alexandria University*

Dr. / Esam El Din Gaber Saleh

*Lecturer of Neurosurgery
Minoufiya University*

*Faculty of Medicine
Minoufiya University
2005*

سبح لله عز وجل

﴿ قالوا سبحانك لا علم لنا إلا ما علمتنا إنك أنت العليم الحكيم ﴾

سورة البقرة

آية (٣٢)

1894

1895

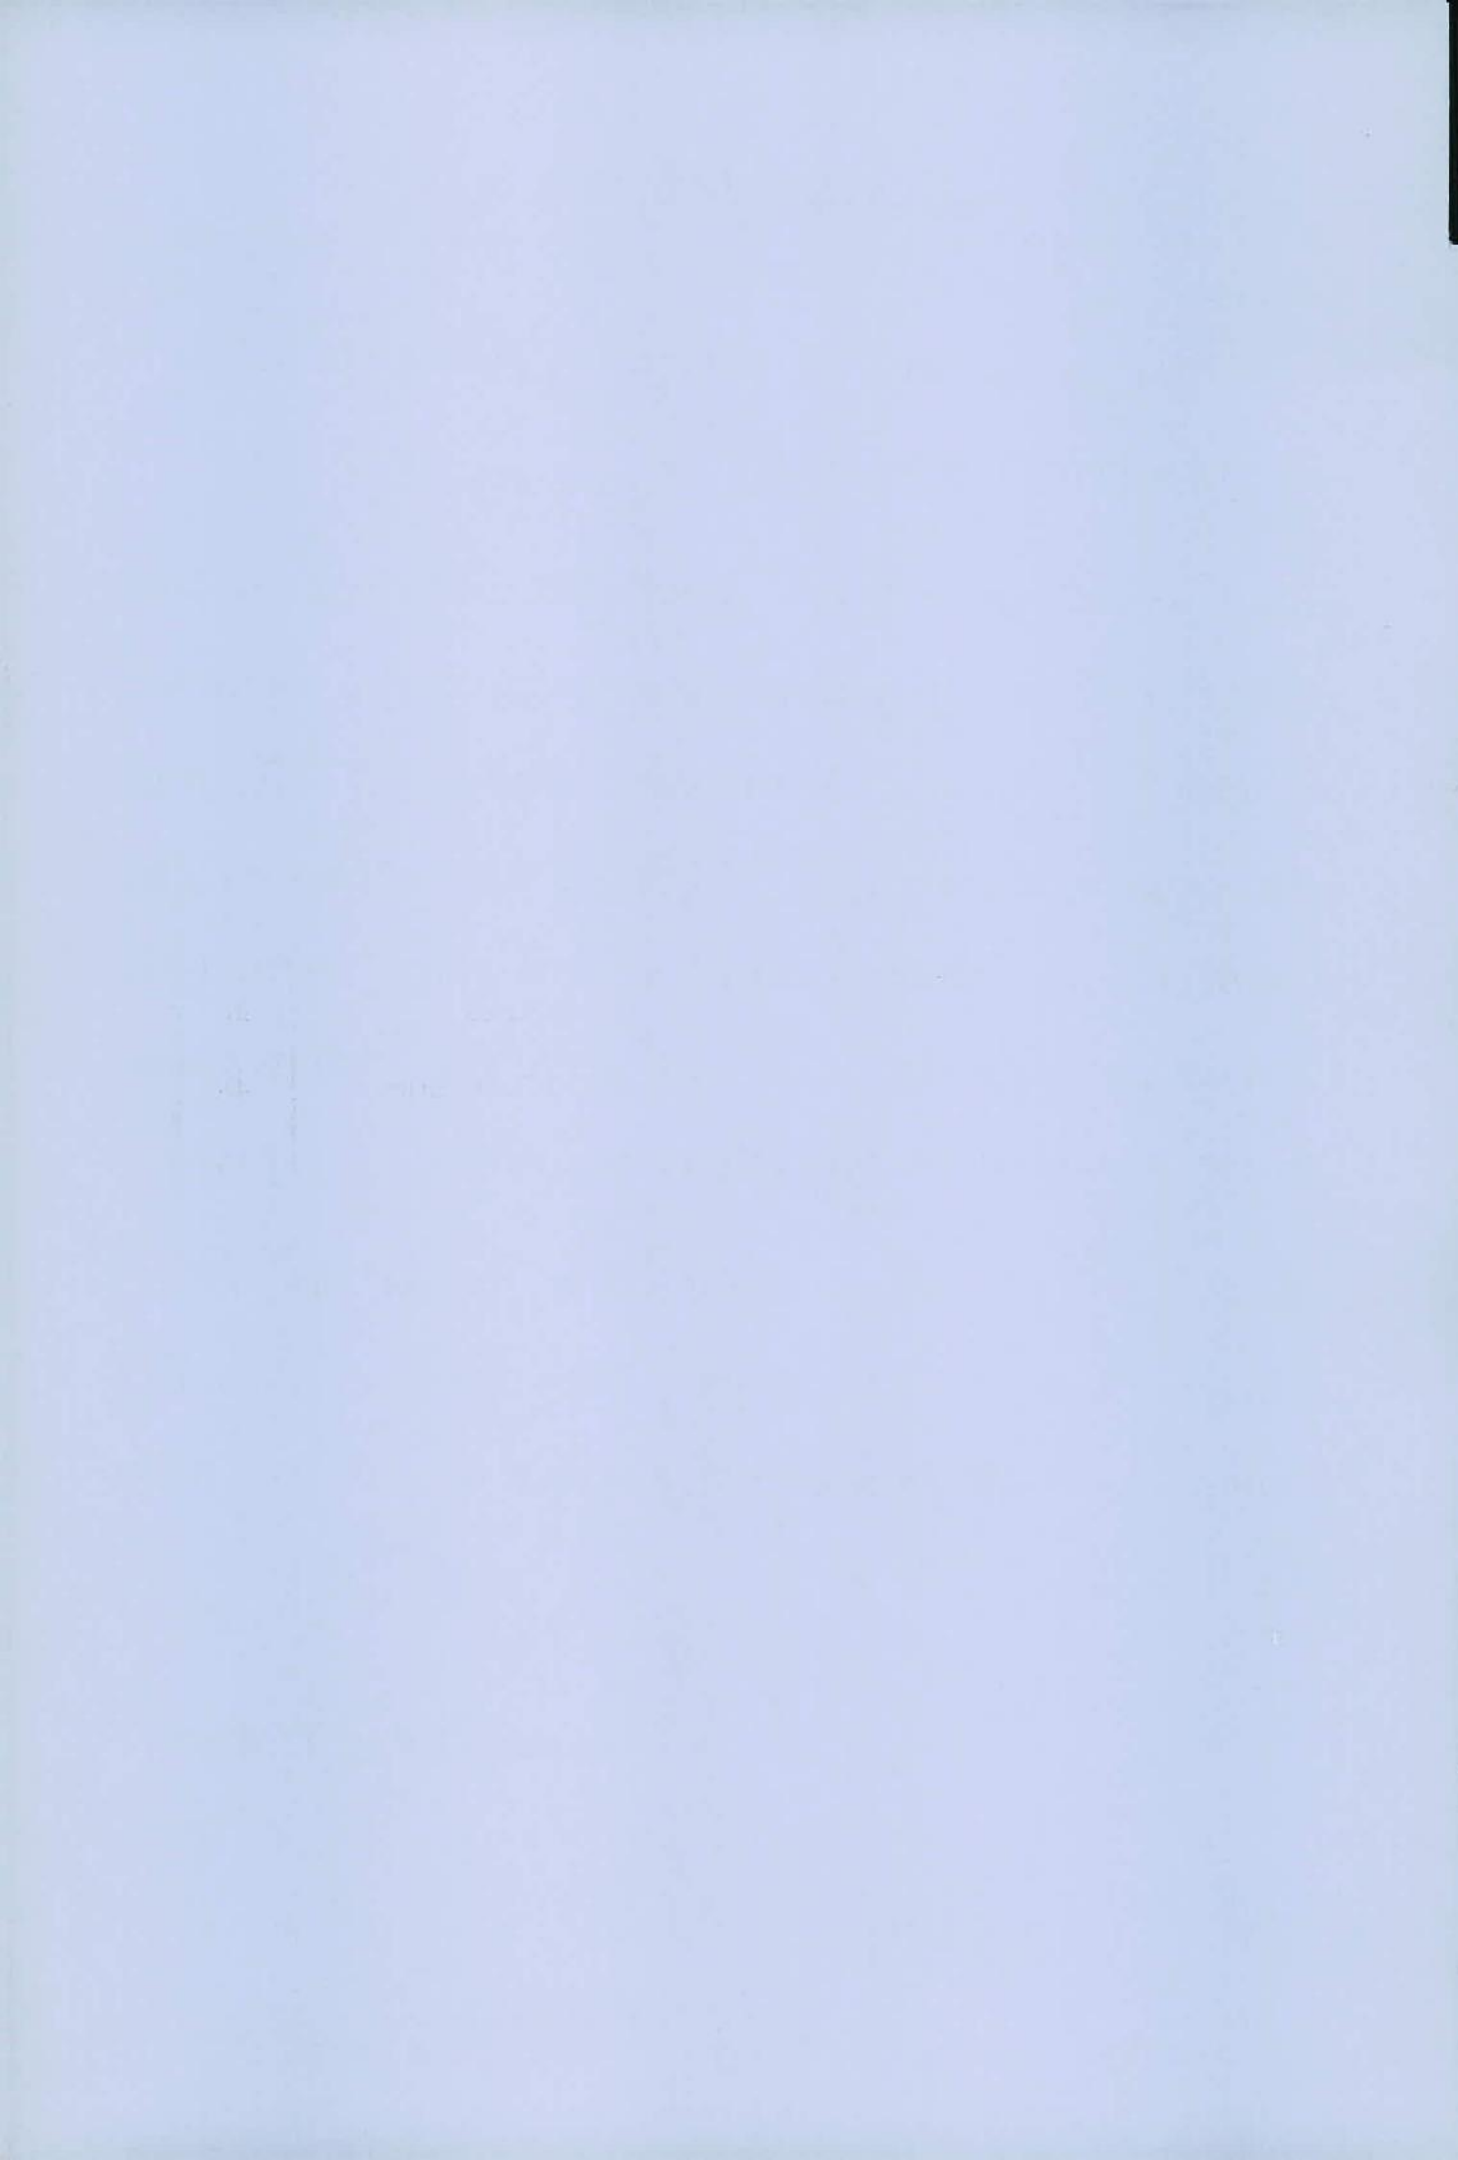

Acknowledgment

Before and above all thanks to "Allah" to whom I always pray to bless my work.

*I would like to thank **Prof. Said Gamal El Din Askar**, Professor of General Surgery Minoufiya University & **Prof. Yousry Mahmoud Samy El Adawy**, Professor of Neurosurgery Alexandria University and **Dr. Esam El Din Gaber Saleh**, Lecturer of Neurosurgery Minoufiya University, for their valuable guidance and sincere encouragement throughout this work.*

I would also like to thank all my senior staff, all my colleagues at Neurosurgery Department, Minoufiya University for the great help they offered me especially when it was needed.

Ahmed Gabry El-Nagar

Contents

<i>Subject</i>	<i>P. No.</i>
I. Introduction.	1
II. Aim of the Work.	2
III. Review of literature.	
- Development of the cervical spine.	3
- Anatomy of the Subaxial Cervical Spine	6
- Biomechanics of The Subaxial Cervical Spine	17
- Epidemiology of Cervical Spine Injuries	24
- Pathology of subaxial cervical spine fractures	26
- Clinical Picture of Cervical Spine Injuries	38
- Investigations of subaxial cervical spine injuries	48
- Management subaxial cervical spine injuries	53
IV. Patients and Methods.	70
V. Results.	88
VI. Discussion.	119
VII. Summary and conclusions	160
VIII. Recommendations	163
IX. References	164
X. Arabic Summary.	.

List of Figures

Figure		P. No.
Figure 1	The formation of the vertebral column at various stages of development.	4
Figure 2	Typical cervical vertebra.	7
Figure 3	The seventh cervical vertebra (Superior aspect)	10
Figure 4	Axial and Lateral views of the cervical vertebra demonstrating ligament relationship	12
Figure 5	Thresholds for cervical clinical stability	22
Figure 6	Flexion Compression injury	27
Figure 7	Vertical compression injury	27
Figure 8	Compression extension	28
Figure 9	Distractive flexion injury	29
Figure 10	Distraction extension injury	30
Figure 11	Lateral flexion injury	31
Figure 12	Schema of pathophysiologic events after acute spinal cord injury.	35
Figure 13	American Spine Injury Association (ASIA) Spinal Cord Injury Assessment	41
Figure 14	Cervical cord syndromes	47
Figure 15	The Torg's ratio	49
Figure 16	Lateral radiograph with four imaginary lordotic lines	49
Figure 17	Non-locking plate bicortical screw system	63
Figure 18	Locking plate systems	63
Figure 19	Age distribution of the patients with subaxial cervical spine injuries.	88

Figure 20	Sex distribution of the patients	89
Figure 21	Causes of subaxial cervical spine injuries.	90
Figure 22	Main Clinical presentation of subaxial cervical spine injuries	92
Figure 23	Frankle classification of cases of subaxial cervical spine injuries at the time of presentation	93
Figure 24	Main Bone Pathology.	94
