BINCA

***EFFECT OF VITAMIN E ADMINISTRATION
ON ENDOTOXIN OR RADIATION INDUCED
PLATELET ACTIVATION
IN EXPERIMENTAL RATS.***

THESIS FOR

Partial Fulfillment of Master Degree of Science.
Biochemistry Department
Faculty of Science.
Ain Shams University.

SUBMITTED BY

Sousou Mohamed Abd-El-Fattah Hassan
B.Sc. of Biochemistry
1992

SUPERVISED BY

Prof. Dr. Nadia M. Abdallah
Professor and Head of
Biochemistry Department.
Faculty of Science .
Ain Shams University.

Nadia

Prof. Dr. Zahera S. Tawfik
Professor of Microbiology
and Head of Central Lab.
NCRRT

Zahera

Prof. Dr. Noura M. Elkholy
Professor of Biochemistry.
Faculty of Medicine.
Ain Shams University.

Noura

***FACULTY OF SCIENCE
AIN SHAMS UNIVERSITY
1999***

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

قَالُوا سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا

إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ

صَدَقَ اللَّهُ الْعَظِيمُ

آية ٣٢ - سورة البقرة

I declare that this thesis has been composed by myself and that the work of which it is a record has been done by myself. It has not been submitted for a degree at this or any other university.

Sousou M. Abd-El-Fattah

Biography

Name : Sousou Mohamed Abd-el-Fattah Hassan.

Degree Awarded : B. Sc. Biochemistry.

Faculty : Science.

University : Ain Shams.

Date of Graduation : May, 1992.

Occupation : Chemical specialist, NCRRT.

Date of registration : 8 July, 1996
for M. Sc. Award

Contents

Abstract-----	i-ii
Acknowledgement-----	iii-iv
List of figures-----	v-viii
List of tables-----	ix-xi
Abbreviations-----	xii -xv

Introduction & Aim of the Work:

Introduction -----	1
Aim of the Work-----	4

Chapter 1.

Review of Literature.

1.1 Endotoxin-----	5
1.1.1.Cell Wall of gram-positive and gram- negative bacteria-----	5
a- Gram-positive bacteria-----	5
b- Gram-negative bacteria-----	6
c- Lipopolysaccharide-----	8
1.1.2.Effect of Endotoxin-----	10
1.1.3.Host responses to endotoxin-----	12
a- Cytokines-----	12
b- Phospholipid derived mediators-----	13
c- Complement-----	14
d- Activation of vascular endothelium--	14
e- Thrombopoiesis and platelet aggregation-----	15
f- Coagulation factors-----	17
g- Disseminated intravascular coagulation-----	18
h- Blood cell counts-----	20
1.1.4.Nuclear factor- κ B (NF- κ B)-----	20

1.1.4.1. Activation of NF- κ B-----	21
1.1.4.2. I κ B family -----	22
1.1.5. Trials to prevent septic shock induced by endotoxin-----	22
1.2. Radiation-----	26
1.2.1. Types of radiation-----	26
1. Non ionizing Radiation-----	26
2. Ionizing Radiation-----	26
1.2.2. Radiation dose units-----	28
1.2.3. Radiation effect in animals -----	30
1.2.4. Mechanisms of radiation effects-----	31
1.2.5. Biological effects of radiation-----	32
1.2.6. Grouping according to radiosensitivity	34
1.2.7. Effect of radiation on hemopoietic tissue-----	35
1.2.8. Radiation effect on platelet aggregation and coagulation-----	38
1.2.9. Radiation and kidney function-----	43
1.3. Free radicals-----	45
1.3.1. Types of radicals-----	45
1.3.2. Reaction of free radicals-----	46
1.3.3. Free radicals <i>In vivo</i> -----	47
1.3.4. Lipid peroxidation as a source of free radicals-----	48
1.3.5. Reactive oxygen species and human disease-----	50
1.4. Antioxidants-----	51
1.4.1. Differential effect of antioxidants-----	52
1.4.2. Protecting role of antioxidants can be shown in the following Examples-----	53
1.5. Vitamin E-----	57
1.5.1. Distribution in food and dietary sources of vitamin E-----	58
1.5.2. Absorption of vitamin E-----	59
1.5.3. Cellular uptake of vitamin E-----	60

1.5.4. Tocopherol binding proteins-----	61
1.5.5. Storage of vitamin E-----	61
1.5.6. Metabolism of vitamin E-----	62
1.5.7. Recycling of vitamin E-----	63
1.5.8. Vitamin E and selenium-----	66
1.5.9. Metabolic functions of vitamin E-----	67
1.5.10. Vitamin E and platelet aggregation----	70
1.5.11. Vitamin E and radiation injury-----	72
1.5.12. Defeciciency of vitamin E-----	73
1.5.13. Other forms of vitamin E-----	74
1.5.14. Hypervitaminosis of vitamin E-----	75
 1.6. Platelets and hemostasis-----	 76
1.6.1. Vascular function-----	76
1.6.2. Platelets-----	78
1.6.2.1. Platelet structure-----	78
1.6.2.2. Platelet function-----	81
1.6.2.3. Interaction of platelets and leukocytes-----	88
1.6.2.4. Platelet and inflammation-----	89
1.6.3. Coagulation system-----	91
1.6.4. Fibrinolytic system-----	97
1.6.5. Kinin system-----	99
1.6.6. Anticoagulant -----	99
1.6.7. Complement system-----	102
1.7. Cytokines-----	103
1.7.1. Immune regulation by cytokines-----	104
1.7.2. Cytokines and host response -----	105
1.7.3. Tumor necrosis factors-----	106
1.7.4. TNF- α gene and molecule-----	107
1.7.5. Relationship between TNF- α and TNF- β -----	109
1.7.6. TNF receptor-----	109
1.7.7. Stimuli for the production of TNF- α -----	110
1.7.8. Biological activity of TNF- α -----	110

1.8. Kidney-----	112
1.8.1. Renal physiology-----	112
A-Threshold substances-----	114
B- Nitrogenous waste excretion-----	115
1- BUN.-----	115
2- Uric acid-----	115
3- Creatinine-----	116
1.8.2. Metabolism of creatine and creatinine---	118
1.8.3. The use of spectrophotometer and X-ray diffraction in biological system-----	118
1.8.3.1. Spectrophotometer in biological systems-----	119
1.8.3.2. X-ray diffraction in biological system-----	120

Chapter 2:

Material and Methods:

2.1. Animals and groups-----	124
2.2. Experimental design.-----	125
2.2.1. Vitamin E-----	125
2.2.2. Endotoxin-----	125
2.2.3. Experimental endotoxemia-----	125
2.2.4. Radiation exposure-----	125
2.3. Blood collection-----	126
2.4. Methodology-----	126
2.4.1. Platelet aggregation test-----	126
2.4.2. TNF- α -----	130
2.5. Blood counts-----	136
2.6. Pathology methods-----	139
2.7. Creatinine-----	140
Statistical Analysis-----	145

Chapter 3:

Results.

	147
3.1. Endotoxin -----	166
3.2. Radiation -----	

Chapter 4:

Discussion.

	236
	252
4.1. Endotoxin infusion-----	
4.2. Radiation-----	271

Chapter 5:

Summary, Conclusion and Recommendation.
