GENETIC DIVERSITY OF ECOLOGICAL POPULATIONS OF SOME *TRIGONELLA* L. SPECIES (FAMILY: LEGUMINOSAE) IN EGYPT

Thesis

Submitted to the Faculty of Science,
University of Alexandria

In Fulfillment of the Requirements
For the **Ph.D.** Degree

By

Ream Ibrahim Marzouk Ibrahim
B.Sc. In Botany 1990
M.Sc. In Botany 1995

Under the supervision of

Prof. Dr. Laila M. El-Sadek
Prof. of Genetics and Cytology
Botany Department
Faculty of Science
University of Alexandria

Prof. Dr. M.A Ayyad
Prof. of Plant Ecology
Environmental Science Department
Faculty of Science
University of Alexandria

Prof. Dr. Laila A. Sadek
Prof. of Plant Ecology
Botany Department
Faculty of Science
University of Alexandria

2001

Dedicated to the soul of my father with love and profound gratitude

This thesis has not been previously submitted for a degree at this or any other university, and is the original work of the author

Ream Ibrahim Marzouk

R. Ibrahim

Acknowledgment

I would like to express my deepest gratitude to Prof. Dr. Laila M. El-Sadek for her keen supervision, the interesting suggestions and revision of the manuscript. I am also greatly indebted to Prof. Dr. Mohamed A. Ayyad for his kind supervision, critical discussions and revision of the manuscript. I would like to thank Prof. Dr. Laila A. Sadek for helping in field trips, collection of specimens and revising the manuscript.

My gratitude is extended to Dr. M. F. Ahmed, Assistant Prof. of Taxonomy of Flowering Plants, Environmental Science Dept., Faculty of Science, Alexandria University for suggesting the problem and supervising the morphological characters. I wish to thank Dr. H. R. Dief Lecturer in Genetics and Cytology, Botany Dept., Faculty of Science, Alexandria University for supervising the molecular techniques. Thanks to Mr. K. Hashim, researcher in Agricultural Genetics, Engineering Research Institute for his valuable help in DNA analysis, and to herbarium curator of the Agricultural Museum for providing the herbarium specimens.

Thanks are also due to my colleagues of Genetics and Cytology Laboratory for their support and encouragement.

Finally, I would like to express my sincere thanks to my mother, sister, and brother, my husband and son for sacrificing their own interests for the success of this work.

List of Tables

		Page
2.1.	Sections of the genus *Trigonella sensu* Širjaev (1928-1934).	13
2.2.	Sections of the genus *Trigonella* according to Small (1989).	16
4.1.	Stem macromorphological characters of the *Trigonella* taxa.	31
4.2.	Leaf macromorphological characters of the *Trigonella* taxa.	41
4.3.	Leaf micromorphological characters of the *Trigonella* taxa.	54
4.4.	Inflorescence and flower morphological characters of the *Trigonella* taxa.	69
	4.4.1. Inflorescence characters of the *Trigonella* taxa.	69
	4.4.2. Flowers and calyx characters of the *Trigonella* taxa.	72
	4.4.2. (cont.) Corolla characters of the *Trigonella* taxa.	75
	4.4.2. (cont.) Androœcium and gynæcium characters of the *Trigonella* taxa.	84
	4.4.3. Fruit characters of the *Trigonella* taxa.	87
4.5.	Seed morphological characters of the *Trigonella* taxa.	97
4.6.	Pollen morphological characters of the *Trigonella* taxa.	103
4.7.	Details of the seed protein patterns of the seven *Trigonella* taxa.	116
4.8.	Details of the DNA pattern obtained from Operon 10-Mer primers of the different populations of *T.maritima*.	120
4.9.	Details of the DNA pattern obtained from Operon 10-Mer primers of the different populations of *T.stellata*.	121

List of Figure

Page

3.1. Map of Egypt indicating the localities of sampling sites. 27

4.1. Growth forms by Camera Lucida drawings of the different *Trigonella* species. 33

4.2.A Diagram by Camera Lucida representing the shape and structure of the transverse section in the uppermost internode of *Trigonella* stem. 34

B: Detailed sector by Camera Lucida representing the structure of the transverse section in the uppermost internode of *Trigonella* stem. 34

4.3.A: Diagram by Camera Lucida representing the shape and structure of the transverse section in the lowermost internode of *Trigonella* stem. 35

B: Detailed sector by Camera Lucida representing the structure of the transverse section in the lowermost internode of *Trigonella* stem. 35

4.4. Camera Lucida drawings representing the shape, margin and apex of the stipules of *Trigonella*. 49

4.5. Camera Lucida drawings representing the shape, venation pattern, degree of dentation (incision), apex level and type of the central leaflets of *Trigonella*. 50

4.6a. Diagram by Camera Lucida representing the shape and structure of the transverse section in *Trigonella* petiole. 56

b. Detailed sector by Camera Lucida representing structure of the transverse section in *Trigonella* petiole. 57

4.7. Diagramatic surface view by Camera Lucida of *Trigonella* central leaflet showing epidremal cells and stomatal type of *Trigonella*. 58

4.8. Inflorescence and some floral features by Camera Lucida of *Trigonella*. 91

4.9. Corolla characters by Camera Lucida of *Trigonella*. 92

4.10. Androœcium and Gynæcium by Camera Lucida of the studied *Trigonella* taxa. 93

4.11. Pod shape and ornamentation by Camera Lucida of the *Trigonella*. 94

4.12. Dendrogram resulting from UPGMA method of sorting of 267 OTU's of "10" *Trigonella* species collected from Egypt. 109

Page

4.13. Dendrogram resulting from UPGMA method of sorting of 105 OTU's of *Trigonella maritima* collected from the western Mediterranean region. 110

4.14. Dendrogram resulting from UPGMA method of sorting of 124 OTU's of *Trigonella stellata* collected from the western Mediterranean region, Nile Delta and Sinai regions. 111

4.15. Electrophenograms resulting from seed protein electrophoresis of the *Trigonella*. 114

4.16. Dendrogram resulting from UPGMA method of sorting of 7 *Trigonella* taxa by using seed protein electrophoresis. 115

4.17. Dendrogram for different populations of *T. maritima* and *T. stellata* based on the genetic distance calculated from the RAPD pattern obtained from bulked DNA samples and 13 Operon 10-mer primers. 123

List of Plates

Page

4.1. Wax deposits on leaflet surface (leaflet surface ornamentation) by SEM of the studied *Trigonella* taxa. 59

4.2. Seed shape, surface and position of hilum by SEM of the studied *Trigonella* taxa. 99

4.3. Seed testa cell relief and surface by SEM of the studied *Trigonella* taxa. 99

4.4. Pollen grain shape and ornamentation by SEM of the studied *Trigonella* taxa. 105

4.5. RAPD pattern obtained from genomic DNA for different populations of *T. maritima* and *T. stellata* primed with Operon A-14 primer. 122

Introduction
