**Ecological and physiological studies on some
Orius species with their associated preys on
different host plants**

**Thesis
Submitted in Fulfillment of The
Degree of M.Sc. in Ecology and physiology**

**By
Sabry Mahrous Ahmed
(B.Sc.)**

**Zoology Department Faculty of Science
Cairo University
2001**

APPROVAL SHEET

Title of the M.Sc. Thesis

Ecological and Physiological Studies on Some *Orius*
Species With Their Associated Preys on
Different Host Plants.

Name of Candidate

Sabry Mahrous Ahmed

Submitted to the

Faculty of Science. Cairo University

Supervision Committee:

1 - Prof .Dr. Nagwa E. El Mossallamy

(Prof.of Physiology) Nagwa E. El Mossallamy

3 - Prof. Dr.Aziza M. El Gantiry

(Prof.of Biology) Aziza M. El-Gantiry

Head of Zoology Department

Prof. Dr. MOHAMMED ISMAEEL MOHAMMED

ACKNOWLEDGEMENT

Thanks to our God for helping us to complete this work

I am greatly honoured to **Prof. Dr. NAGWA EL MOSSALLAMY**, Professor of Physiology and Toxicology, Zoology Department Faculty of Science, and Director of Research Center of Poisons and Narcotics, Cairo university, for her suggestion and planning of the point of this research and providing me with her valuable instruction in practical and reading the manuscript.

Sincere thanks to **Prof. Dr. AZIZA M. EL GANTIRY**, Senior Researcher at the Piercing and Sucking Insect Res. Dept. Plant protection Research Inst. (PPRI), Agricultural Research Center (ARC), for her close and sincere supervision.

I am also thankful to **Prof. Dr. M.M. Abou Setta**, Senior Researcher at the scale Insects and Mealy bugs Res. Dept., PPRI, ARC, for his sincere help in statistical analysis.

Thanks to **Dr. Tarek Raies Amin**, Researcher at the Insect Physiology Res. Dept. PPRI .ARC, for his kind help in enzyme assessment.

To my family

List of Figures	I
List of Tables	VII
• Introduction and Aim of work	1
• Historical Review	4
• Material and Methods	
<i>Materials</i>	
•Experimental predators and preys	15
•Area of survey	15
•Sampling	15
•Sampling preparation for biochemical assay	17
•Statistical analysis	17
<i>Methods</i>	
•Sampling	18
•Determination of amylase activity	18
•Protease assay	20
•Lipase assay	20
<i>Results</i>	
a- Ecological results	23
I. Seasonal fluctuation of <i>Orius</i> species and their preys on summer crops	24
II. Seasonal fluctuation of <i>Orius</i> species and their preys on winter crops	40
III. Seasonal fluctuation of <i>Orius</i> species and their preys on the permanent host plant water mint.	53

b- Physiological results	
• Effect of preys on <i>Orius</i> species reproductivity	59
• Effect of prey on digestive enzymes level for <i>Orius</i> species	61
• Discussion	62
• Summary	67
• References	69
• Arabic summary	83

List of Figures

- Fig. (1) : Seasonal abundance of *Orius* species and their preys on maize at Shalakan locality, Qaluobia Governorate from July to the beginning of November 1998.
- Fig. (2) : Seasonal abundance of *Orius* species and their preys on maize at Shalakan locality, Qaluobia Governorate from July to the end October 1999.
- Fig. (3) : Seasonal abundance of *Orius* species and their preys on cotton at Shalakan locality, Qaluobia Governorate from July to December 1998.
- Fig. (4) : Seasonal abundance of *Orius* species and their preys on cotton at Shalakan locality, Qaluobia Governorate from July to the end of October 1999.
- Fig. (5) : Seasonal abundance of *Orius* species and their preys on maize at Qaha locality, , Qaluobia Governorate from July to October 1998.
- Fig. (6) : Seasonal abundance of *Orius* species and their preys on maize at Qaha locality, Qaluobia Governorate from July to the beginning of November 1999.
- Fig. (7) : Seasonal abundance of *Orius* species and their preys on

cotton at Qaha locality, Qaluobia Governorate from July to October 1998.

Fig. (8) : Seasonal abundance of *Orius* species and their preys on cotton at Qaha locality, Qaluobia Governorate from July to the beginning of November 1999.

Fig. (9) : Seasonal abundance of *Orius* species and their preys on maize at Giza locality, Giza Governorate from July to the end of September 1998.

Fig. (10) : Seasonal abundance of *Orius* species and their preys on maize at Giza locality, Giza Governorate from July to November 1999.

Fig. (11) : Seasonal abundance of *Orius* species and their preys on cotton at Giza Governorate from July to the end of December 1998.

Fig. (12) : Seasonal abundance of *Orius* species and their preys on cotton at Giza locality, Giza Governorate from July to November 1999.

Fig. (13) : Seasonal abundance of *Orius* species and their preys on maize at Dokki locality, Giza Governorate from July to October 1998.

Fig. (14) : Seasonal abundance of *Orius* species and their preys on

maize at Dokki locality, Giza Governorate from July to the beginning of November 1999.

Fig. (15) : Seasonal abundance of *Orius* species and their preys on cotton at Dokki locality, Giza Governorate from July to the end of October 1998.

Fig. (16) : Seasonal abundance of *Orius* species and their preys on cotton at Dokki locality, Giza Governorate from July to November 1999.

Fig. (17) : Seasonal abundance of *Orius* species and their preys on bean at Shalakan locality, Qaluobia Governorate from February to the beginning of April 1999.

Fig. (18) : Seasonal abundance of *Orius* species and their preys on clover at Shalakan locality, Qaluobia Governorate from February to June 1998.

Fig. (19) : Seasonal abundance of *Orius* species and their preys on clover at Shalakan locality, Qaluobia Governorate from February to June 1999.

Fig. (20) : Seasonal abundance of *Orius* species and their preys on bean at Qaha locality, Qaluobia Governorate from February to April 1998.

Fig. (21) : Seasonal abundance of *Orius* species and their preys on
