STUDIES ON SOME MICROORGANISMS CAUSING URINARY TRACT INFECTION IN DIABETICS

Presented by

DALIA ABD ELMONEM AHMED EBRAHIM
B.Sc. (2000)

Thesis

*Submitted in Partial Fulfillment for the Master Degree of
Science In Microbiology*

Under supervision of

Prof. Dr.

ZAHIRA MOHAMED FATHY

Professor of Microbiology & Immunology
Faculty of Medicine
Zagazig University

Dr.

MOHAMED FAROUK GHALY

Assist. Professor of Microbiology
Faculty of Science
Zagazig University

Dr.

MOHAMED HESHAM ELSAYED

Assist. Professor of Microbiology
Faculty of Science
Zagazig University (Banha branch)

Dr.

NAHID MOHAMED ALI

Lecturer of Microbiology
Faculty of Science
Zagazig University (Banha Branch)

**Zagazig University –Banha Branch
Faculty of Science - Botany Department**

2005

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

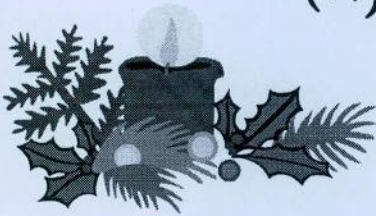

قَالُوا

سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا

إِنَّكَ أَنْتَ الْعَلِيمُ الْحَكِيمُ

صدق الله العظيم

سورة البقرة آية (٣٢)

ACKNOWLEDGEMENT

Firstly, I wish to express my profound gratitude to "**ALLAH**" who gave me the ability and patience to finish this work.

I would like to express my deep appreciation and profound gratitude to **Prof. Dr. Zahira Mohamed Fathy, Professor of Microbiology & Immunology, Faculty of Medicine, Zagazig University**, for giving me the honor of working under her supervision, for her distinctive orientation and effective help. She offered me her great enthusiastic support and enriched me with her vast experience. So, thanks means nothing to what she had done to me.

Words fail to express my sincere gratitude to **Dr. Mohamed Farouk Ghaly, Assistant Professor of Microbiology, Faculty of Science, Zagazig University**, who sacrificed a great deal of his valuable time and experience to guide me throughout the whole work by his precious instructions and effective co-operation, for his excellent guidance.

I am also deeply indebted to the great endless help and sincere cooperation offered by **Dr. Mohamed Hesham Elsayed, Assist. Professor of Microbiology, Faculty of Science, Zagazig University**, to whom I owe many valuable remarks, meticulous supervision and a lot of precious time and effort.

My greatest sincere gratitude and deep appreciation to **Dr. Nahid Mohamed Ali, Lecturer of Microbiology, Faculty of Science, Zagazig University**, for being highly caring, helpful and supportive for me. Her paternal advices were kindly given to me that helped to bring this work into light.

DALIA ABD ELMONEM

2005

Dedication

Dedicated with all affection to :

- *My Parents,*
- *My Husband and*
- *My dear Son*

*Whom their kindness and support is
appreciated more than words can say.*

DALIA ABD ELMONEM
2005

CONTENTS

	Page
LIST OF TABLES -----	I
LIST OF FIGURES -----	III
INTRODUCTION -----	1
AIM OF THE WORK -----	3
REVIEW OF LITERATURE -----	4
The normal flora of urinary tract -----	4
General description of urinary tract infections-----	5
Asymptomatic urinary tract infection (Bacteriuria): -----	8
Clinical manifestation of diabetic renal diseases -----	14
Pathological organisms causing urinary tract infection: -----	16
Routes of infection -----	23
Host factors predisposing to urinary tract infection-----	25
MATERIALS AND METHODS -----	29
RESULTS -----	50
1- Isolation of selected organisms-----	50
2- Identification of bacterial isolates -----	54
3- The distribution of pathogenic isolate from positive urine samples-----	57
4- The effect of different antibiotics on pathogenic isolates-----	60
5- Sensitivity test of pathogenic isolates against different tested antibiotics-----	63

6- Statistical analysis of sensitive and resistance pathogenic isolates against different antibiotics -----	66
7- Minimum inhibitory concentration (MIC) and minimum bactericidal concentrations (MBC) of some antibiotics -----	69
8- The effect of different plant extracts (water and alcohol extract) on <i>E. coli</i> -----	72
9- The effect of different plant extracts (water, alcohol) on <i>K. aerogenese</i> -----	77
10- The effect of different plant extracts (water, alcohol) against both isolates of <i>P. aeruginosae</i> (isolate no. 12 & 30) -----	82
11- The effect of different volatile oils (10 μ l) against different isolates of <i>E. coli</i> , <i>K. aerogenes</i> , <i>P. aeruginosae</i> -----	87
12- The effect of different volatile oils (20 μ l) against pathogenic bacterial isolates -----	92
13- The effect of different volatile oils (30 μ l) on microorganisms --	97
DISCUSSION -----	102
SUMMARY -----	113
REFERENCES -----	117
ARABIC SUMMARY -----	

LIST OF TABLES

No.	Page
1 Diabetic urine sample collected from different ages of male and female (positive samples contaminated with <i>E. coli</i> or <i>K. aerogenes</i> , <i>P. aeruginosae</i>).-----	51
2 Statistical analysis and characteristics of the studied groups ---	53
3 Biochemical reaction of <i>E. coli</i> , <i>K. aerogenes</i> and <i>P. aeruginosae</i> .-----	56
4 The distribution number of pathogenic bacterial isolate from positive collected samples. -----	58
5 Inhibition zone (mm) of different pathogenic bacterial isolates against different tested antibiotics -----	61
6 Sensitivity test of pathogenic isolates against different antibiotics.-----	64
7 Statistic analysis of sensitive and resistance pathogenic bacterial isolates against different antibiotics. -----	67
8 Minimum inhibitory concentration (MICs) ($\mu\text{g/ml}$) and minimum bacterial concentration (MBCs) of different antibiotics-----	70
9 Diameter of inhibition zone (mm) of different plant extract (water and alcohol) on <i>E. coli</i> (isolate number 36, 47). -----	73
10 Sensitivity of <i>E. coli</i> to water and alcoholic plant extracts (diluted and concentrated).-----	76

11	Diameter of inhibition zone (mm) of different plant extract (water and alcohol) on <i>K. aerogenes</i> (isolate 8, 50) and after treatment -----	78
12	Sensitivity of <i>K. aerogenese</i> to water and alcoholic plant extracts (diluted and concentrated). -----	81
13	Diameter of inhibition zone (mm) of different plant extract (water and alcohol) on <i>P. aeroginosae</i> (isolate number 12, 30). -----	83
14	Sensitivity of <i>P. aeroginosae</i> to water and alcoholic plant extracts (diluted and concentrated). -----	86
15	Diameter of inhibition zone (mm) of different volatile oils (10 μ l) against pathogenic bacterial isolates -----	88
16	Diameter of inhibition zone (mm) of different volatile oils (20 μ l) against different isolates of <i>E. coli</i> , <i>K. aerogenes</i> and <i>P. aeroginosae</i> . -----	93
17	Diameter of inhibition zone (mm) of different volatile oils (30 μ l) against different isolates of <i>E. coli</i> , <i>K. aerogenes</i> and <i>P. aeroginosae</i> . -----	98
