MOLECULAR MECHANISMS OF CELLULAR RESISTANCE TO DOXORUBICIN IN TUMOURS

Thesis

Submitted for the partial fulfillment of the Master degree in Pharmaceutical
Sciences

(Pharmacology and Toxicology)

By

Marwa Wagih Kamel

Demonstrator of Pharmacology,
Pharmacology Unit, National Cancer Institute, Cairo University

Under the supervision of

Dr. Samira S. Mostafa

Professor of
Pharmacology and Toxicology,
Faculty of Pharmacy,
Cairo University

Dr. Afaf A. Ain Shoka

Professor of
Pharmacology and Toxicology,
Faculty of Pharmacy,
Cairo University

Dr. Abdel-Moneim M. Osman

Professor of
Pharmacology and Experimental Oncology,
National Cancer Institute,
Cairo University

Dr. Mohamed M. Sayed-Ahmed

Asst. Prof. of
Pharmacology and Experimental Oncology,
National Cancer Institute,
Cairo University

Faculty of Pharmacy
Cairo University
2006

بسم الله الرحمن الرحيم

إنك أنت العظيم "

صدق الله العظيم

البقرة (٣٢)

Examination Board Approval Sheet

Dr. Samira Saleh Mostafa

Prof. of Pharmacology and Toxicology,
Faculty of Pharmacy, Cairo University.

Samira Saleh

Dr. Afaf Ain Shoka..

Prof. of Pharmacology and Toxicology,
Faculty of Pharmacy, Cairo University.

Afaf A. Shoka

Dr. Mahmoud Mohamed Mahmoud El-Merzebani

Prof. of Experimental Oncology,
National Cancer Institute, Cairo University.

M. El-Merzebani

Dr. Mohamed Mohey Elmazar

Prof. of Pharmacology,
The British University in Egypt

Mohamed Mohey Elmazar

Prerequisite Postgraduate Courses

Beside the work presented in this thesis, the candidate has attended the following courses for one year:

General courses:

- 1-Computer and its applications
- 2-Literature search and Scientific English Language
- 3- Basic statistics

Department courses:

- 1-Pharmacometrics and screening of drugs and biostatistics
- 2- Toxicometrics
- 3-Immunopharmacology
- 4- Pathophysiology

She had successfully passed examination in these courses with general grade "very good"

Prof. Dr. Amina Salem

Amina Salem

Head of Pharmacology and Toxicology Department

Acknowledgements

First and foremost, thanks are to Allah.

I wish to express my thanks to **Professor Dr. Samira S. Moustafa**, Professor of Pharmacology and Toxicology, Faculty of Pharmacy, Cairo University, for her constructive supervision, helpful discussion, fruitful directions, valuable comments and guidance during the course of this work.

I wish to record my deepest debt and gratitude to **Professor Dr. Afaf Ain Shoka** Professor of Pharmacology and Toxicology, Faculty of Pharmacy, Cairo University, for her sincere assistance, valuable instructions, and for devoting much of her time and effort for the completion of this work.

It gives me a great pleasure to express my appreciation and great indebtedness to **Professor Dr. Abdel-Moneim M. Osman**, Professor of Pharmacology and Experimental Oncology, National Cancer Institute, Cairo University, for his supervision, expert advice, generous support, valuable directions and guidance.

I am also very grateful to **Dr. Mohamed M. Sayed-Ahmed**, Assistant Professor of Pharmacology and Experimental Oncology, National Cancer Institute, Cairo University, for his supervision of the work. Also for his kind help, valuable advice and encouragement which assisted in completing this work.

The practical part of the present study was carried out at the University of Texas, Medical Branch at Galveston (UTMB), USA.

Most sincere thanks to **Professor Dr. William Au**, Department of Preventive Medicine and Community health, UTMB for his assistance, continuous follow up and unrelenting support.

Profound thanks to **Dr. Ayman Al-Hendy**, Assistant Professor, Division of Gynecology, Department of Obstetrics and Gynecology, UTMB, for kindly accepting me to conduct this work, placing the investigation materials and laboratory facilities at my disposal and for his constant encouragement and worthy scientific advice.

I also acknowledge the contribution of **Dr. Salama A. Salama**, Instructor at division of Gynecology, department of Obstetrics and gynecology, UTM, Lecturer at Faculty of Pharmacy, Al-Azhar University, for his assistance with the study design, valuable technical help and contribution throughout the entire work. Also thanks for his extreme patience and encouragement during the course of the work.

I would like to extend my deepest gratitude to all my professors and colleagues in the National Cancer Institute, Cairo University who gave me help and support for the fulfillment of this work.

Finally, special thanks to my family for their continuous encouragement, patience and support.

List of contents

	Page
Aim of the work	1
Introduction	
• Doxorubicin	3
• Drug resistance	8
• RNA interference	25
• Cyclooxygenase-2 antisense strategy	29
• Cell cycle regulation	31
• Apoptosis	34
Materials	39
Experimental design	42
Methods	
• Cell culture and cell lines	47
• Maintenance of cell line	47
• Cell count	48
• siRNA experiments	49
• Ad-COX-2 antisense experiments	81
• Statistical analysis	86
Results	
• Verification of cloned sequences	87
• Transfection efficiency of MCF-7/Dox using calcium phosphate and fugene-6	93
• Effect of transfection with siRNA expression vectors on MDR1 mRNA expression in MCF-7/Dox cells.....	94
• Effect of transfection with siRNA expression vectors on cellular P-gp expression in MCF-7/Dox cells.....	98

• Effect of different siRNA constructs on sensitivity of MCF-7/Dox cells to Dox.....	102
• Transfection efficiency of adenovirus vector in MCF-7/Dox cells.....	105
• Effect of Ad-COX-2 antisense on MDR1 mRNA expression in MCF-7/Dox cell.....	107
• Effect of Ad-COX-2 antisense on P-gp expression in MCF-7/Dox cell.....	111
• Effect of Ad-COX-2 on sensitivity of MCF7/Dox cells to Dox.....	115
• Effect of Ad-COX-2 antisense on cyclin D1 expression in MCF-7/Dox cells.....	120
• Effect of Ad-COX-2 antisense on bcl-2 expression in MCF-7/Dox cells.....	124
Discussion.....	128
Summary and conclusions.....	142
References.....	145
Arabic summary	

List of Tables

Table	Page
(1): List of compounds tested in clinics for MDR reversal	19
(2): Sequence of siRNA oligos design to knockdown P-gp	52
(3): Nucleotide sequences of inserts cloned in pSuppressor vector plasmids retrieved from electropherogram blasted against synthesized oligonucleotides	88
(4): Effect of transfection with siRNA expression vectors on MDR1 mRNA expression in MCF-7/Dox cells	96
(5): Effect of transfection with siRNA expression vectors on cellular P-gp expression in MCF-7/Dox cells	100
(6): Effect of different siRNA constructs on sensitivity of MCF-7/Dox cells to Dox	103
(7): Transfection efficiency of adenovirus vector in MCF-7/Dox cells	106
(8): Effect of Ad-COX-2 antisense on MDR1 mRNA expression in MCF-7/Dox cell.1	109
(9): Effect of Ad-COX-2 antisense on P-gp expression in MCF-7/Dox cell	113
(10): Effect of Ad-lacZ on sensitivity of MCF7/Dox cells to Dox	116
(11): Effect of Ad-COX-2 on sensitivity of MCF7/Dox cells to Dox	118
(12): Effect of Ad-COX-2 antisense on cyclin D1 expression in MCF-7/Dox cells	122
(13): Effect of Ad-COX-2 antisense on bcl-2 expression in MCF-7/Dox cells	126

List of Figures

Figure	Page
(1) : Structure of Dox	3
(2) : Intercalation of Dox into DNA	4
(3) : Dox free radical reaction	6
(4) : Configuration of P-gp and mechanism of action of P-gp.....	16
(5) : Mechanism of action of MDR reverters	18
(6) : Mechanism of action of RNAi	26
(7) : Role of cyclin D1 in regulating cell cycle	34
(8) : Apoptosis and role of bcl-2	38
(9) : Full mRNA of human MDR1	51
(10) : Schematic map of pSuppressor Adeno shuttle vector	53
(11) : Oligonucleotide primer sequences used to prepare the double stranded oligonucleotides encoding for siRNA	54
(12) : Sequences of double stranded oligonucleotides after annealing of the forward and reverse strand of each siRNA construct	56
(13) : Standard curve of BCA assay.....	74
(14) : A representative electropherogram of the cloned sequence encoding hairpin siRNA	92
(15) : MCF-7/Dox cells transfected with plasmid expressing the GFP protein using fugene 6 reagent	93
(16) : Effect of transfection with different siRNA constructs on MDR1 mRNA expression in MCF-7/Dox cells	95
(17) : Effect of transfection with siRNA expression vectors on MDR1 mRNA expression in MCF-7/Dox cells	97
(18) : Effect of transfection with siRNA expression vectors on cellular P-gp expression in MCF-7/Dox cells	99
