Study on the Hepatoprotection Effect of Oxothiazolidine Against the Toxicity of Chlorpyrifos Insecticide in *S. mansoni* Infected Mice Liver

Thesis

*Submitted to The Medical Research Institute, Alexandria University
in partial fulfillment of the requirements for the*

Master Degree

In

Applied Medical Chemistry

By

Fatima Amabd Ahmed

B.Sc. of Chemistry/Biology

Acknowledgment

Praise to **Allah**, The Most Gracious
and the Most Merciful.

Thanks first and last to **Allah**, as we are owed to him for his great care, support and guidance in every step in our life. Without his help, nothing could be reached.

I would like to express my deepest gratitude and appreciation to **Prof. Dr. Shehata M. El Sewedy**, Professor of Applied Medical chemistry, Medical Research Institute, Alexandria University. I am greatly indebted for his unlimited help, valuable instructions, devoted time and continuous encouragement. Without his great efforts and continuous support, this work would have never been accomplished.

My deepest thanks to **Dr. Mohamed A. Abdel Mohsen**, Lecturer of Applied Medical Chemistry Department, Medical Research Institute, Alexandria University. I am greatly indebted for his continuous help, his encouragements and the efforts he payed for improvement the whole work for this study.

My deepest appreciation and profound gratitude to **Dr. Manal Ibrahim Mohamed Shehata**, Lecturer of Pathology ,Pathology Department, Medical Research Institute, Alexandria University, for her precious advice, guidance, valuable help and support throughout the whole work.

I would like to thank all members of Applied Medical Chemistry.

Dedicated to

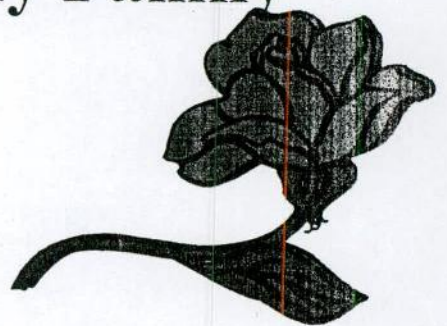

My Father & Mother

My Brothers & Sisters

My Supervisors

My Lovely Freind

& all my Family
