MICROBIOLOGICAL STUDIES ON CAMPYLOBACTER ORGANISMS IN CALVES

A Thesis Presented by

Amena Maher Ibrahim Hendy

(B. V. Sc., 1990; M. V. Sc. 1996)

For The Degree of Ph. D. Vet.
Bacteriology, Mycology and Immunology

Under The Supervision of

Prof. Dr. Mamdouh Abd EL- Ghani Abd EL-Aziz

Emeritus Professor of Microbiology
Department of Microbiology
Faculty of Veterinary Medicine
Cairo University

Dr. Emad Mokhtar Riad

Senior Researcher, Department of Bacteriology
Animal Health Research Institute

2002

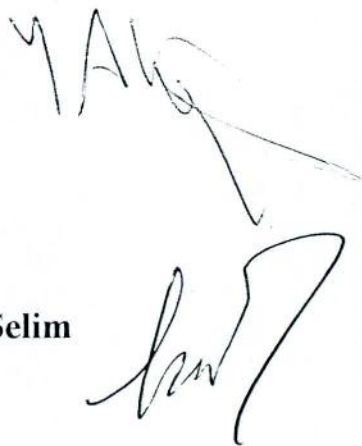

Cairo University
Faculty of Veterinary Medicine
Department of Microbiology

Approval Sheet

This is to approve that dissertation presented by "**Amena Maher Ibrahim Hendy**" for the Ph. D. of Veterinary Medical Science "**Bacteriology, immunology and Mycology**" has been approved by examining committee:

Prof. Dr. Youssif Abd EL-Gelil

Professor of Microbiology
Faculty of Vet. Medicine
EL-Zagazig University

Prof. Dr. Salah EL-Din Abd EL- Keriem Selim

Emeritus Professor of Microbiology
Faculty of Vet. Medicine
Cairo University

Prof. Dr. Mamdouh Abd EL-Ghani Abd EL-Aziz

Emeritus Professor of Microbiology
Faculty of Vet. Medicine
Cairo University

Acknowledgement

The prayerful thanks should be submitted to the most merciful GOD, whose helps I always seek, and without his willing, I will achieve nothing.

I wish to express my high appreciation and sincere thanks to **Prof. Dr. MAMDOUH ABD EL-GHANI ABD EL-AZIZ**, Professor of Microbiology, Faculty of Veterinary Medicine, Cairo University, for his continuous support, criticism and valuable assistance throughout the course of this study.

I wish to express my thanks to **Assistant Professor Dr. EMAD MOKHTAR RIAD**, Senior Researcher of Aerobic Unit, Department of Bacteriology, Animal Health Researcher Institute for supervision, advice and continuous interest allover this work.

I wish to express my thanks to **Prof. Dr. JAKEEN EL-JAKEE**, Professor of Microbiology, Faculty of Veterinary Medicine, Cairo University, for her advise guidance.

My warm thanks to **Dr. SOUMAYA EL-SHAFII**, Researcher of Aerobic Unit, Department of Bacteriology, Animal Health Researcher Institute for valuable assistance and continuous help.

I wish to express my thanks to **Dr. SAHAR ROSHDY** Researcher of Aerobic Unit, Department of Bacteriology, Animal Health Researcher Institute for help during this work.

My thanks are also due to **Dr. M. A. M. SAAD**, Senior Researcher in Reproduction Animal Research Institute, for his effort and helps during the practical work of this thesis.

	Page
1. INTRODUCTION	1
2. REVIEW OF LITERATURE	4
2.1. History and taxonomy	4
2.2. Identification and biochemical reactions.....	10
2.3. Isolation of <i>Campylobacter</i> species	17
2.4. Prevalence rate of <i>Campylobacter</i> species	30
2.5. Susceptibility of <i>Campylobacter</i> to various antimicrobial agents.....	40
2.6. Pathogenicity and cytotoxicity.....	52
2.7. Serological test for detection of antibodies.....	69
3. MATERIAL AND METHODS	82
3.1. Material.....	82
3.1.1: Samples.....	82
3.1.2. Culture Media used.....	84
3.1.2.1. <i>Campylobacter</i> Transport medium.....	84
3.1.2.2. Media used for the isolation and cultivation of <i>Campylobacter</i> species.....	84
3.1.2.3. Media used for biochemical identification of <i>Campylobacter</i> species.....	87
3.1.2.4. Media used for preservation and maintenance of culture.....	88
3.1.2.5. Media used for Verocytotoxicity test.....	88
3.1.2.6. Media used for determining the susceptibility of isolates to various antibacterial agents.....	89

	Page
3.1.3. Reagents and solutions.....	91
3.1.3.1. Reagents and solutions used in biochemical tests.....	91
3.1.3.2. Chemicals used in the preparation of antigens.....	91
3.1.3.3. Reagents and solutions for haemagglutination test.....	92
3.1.4. Stains.....	92
3.1.5. Cells used.....	92
3.1.6. Millipore filter.....	92
3.1.7. <i>Campylobacter jejuni</i> strains.....	92
3.1.8. Lab. Animals.....	92
3.1.9. Other materials.....	92
3.1.10. Chemical and reagents for ELISA.....	93
3.2: Methods.....	94
3.2.1. Sampling.....	94
3.2.1.1. Intestinal contents, bile and faecal samples.....	94
3.2.1.2. Blood samples.....	94
3.2.2. Bacteriological examination.....	94
3.2.2.1. Isolation of <i>Campylobacter</i> species.....	94
3.2.2.2. Purification of suspected isolates.....	94
3.2.3. Identification of the isolates.....	95
3.2.3.1. Morphological identification.....	95
3.2.3.2. Motility test.....	95
3.2.3.3. Biochemical identifications.....	95
3.2.3.4. Detection of <i>Campylobacter jejuni</i> by means of specific antibody.....	98
3.2.4. Anti-microbial susceptibility test.....	99
3.2.5. Pathogenicity test of isolated <i>Campylobacter</i> strains.....	103
3.2.6. <i>Campylobacter</i> cytotoxin.....	103
3.2.6.1. Cytotoxin production.....	103

	Page
3.2.6.2. Cytotoxin assay.....	104
3.2.7. Serodiagnosis.....	104
3.2.7.1. Antisera preparation.....	104
3.2.7.2. Serological examination of the serum.....	106
3.2.7.2.1. Enzyme Linked Immuno Sorbent Assay.....	106
3.2.7.2.2. Passive Haemagglutination Test.....	108
3.2.7.2.3. Slide Agglutination Test.....	110
4. RESULTS.....	111
4.1. Incidence of <i>Campylobacter</i> microorganisms recovered from apparently normal and diarrhoeic calves.....	111
4.2. Distribution and incidence of <i>Campylobacter</i> species isolated from apparently normal calves.....	114
4.3. Distribution and incidence of <i>Campylobacter</i> species and subspecies isolated from diarrhoeic calves.....	117
4.4. Identification of <i>Campylobacter</i> isolates recovered from diarrhoeic and normal calves.....	120
4.5. Serological detection of isolated <i>C. jejuni</i> by using slide agglutination test.....	122
4.6. Comparative studies on the effect of selective culture media and filtration method on the isolation rate of <i>Campylobacter</i> species.....	124
4.7. Response of <i>Campylobacter</i> species to various chemotherapeutic agents in vitro.....	127
4.8. Pathogenicity of <i>Campylobacter</i> isolates in adult mice.....	134
4.9. Cytotoxicity of <i>Campylobacter</i> species recovered from apparently normal and diarrhoeic calves in Vero cells.....	139
4.10. Serodiagnosis.....	146
4.10.1. Titration of prepared hyperimmune sera in rabbits.....	146

	Page
4.10.2. Serological studies on blood samples for detection of <i>Campylobacter</i> antibodies.....	147
4.10.2.1. Detection of <i>Campylobacter</i> antibodies in sera by using slide agglutination.....	147
4.10.2.2. Detection of <i>Campylobacter</i> antibodies in sera by passive haemagglutination test.....	147
4.10.2.3. Detection of <i>Campylobacter</i> antibodies in sera by ELISA.....	148
4.10.2.4. Comparative studies between different serological test used for detection of <i>Campylobacter</i> antibodies in the sera of apparently normal and diarrhoeic calves.....	148
4.10.2.5. Relative sensitivity between ELISA, passive haemagglutination and slide agglutination.....	152
5. DISCUSSION.....	155
6. SUMMARY.....	176
7. REFERENCES.....	180
8. ARABIC SUMMARY.....	

List of Tables

	Page
1. Type and number of examined samples.....	83
2. Biochemical characteristics of <i>Campylobacter</i> isolates revealed from apparent normal and diarrhoeic calves.....	101
3. Interpretation of zones of inhibition.....	102
4. Incidence of <i>Campylobacter</i> microorganisms recovered from apparently healthy and diseased calves.....	112
5. Distribution and incidence of <i>Campylobacter</i> species and subspecies isolated from apparently normal calves.....	115
6. Distribution and incidence of <i>Campylobacter</i> species and subspecies isolated from diseased calves.....	118
7. Biochemical characteristics of <i>Campylobacter</i> isolates collected from both apparently normal and diarrhoeic calves.....	123
8. Comparison between various selective media and filtration method for the isolation of <i>Campylobacter</i> species.....	125
9. Antimicrobial susceptibility patterns of <i>Campylobacter jejuni</i>	129
10. Antimicrobial susceptibility patterns of <i>Campylobacter coli</i>	130
11. Antimicrobial susceptibility patterns of <i>Campylobacter laridis</i>	131
12. Antimicrobial susceptibility patterns of <i>Campylobacter fetus</i>	132.

13. Antimicrobial susceptibility patterns of <i>Campylobacter sputorum</i> ..	133
14. Results of injection of various <i>Campylobacter</i> species in adult mice.....	137
15. Reisolation of <i>Campylobacter</i> microorganisms from experimentally dead infected mice.....	138
16. Detection of <i>Campylobacter</i> species cytotoxin in Vero cells.....	142
17. Degree of cytotoxic activity of <i>Campylobacter</i> after 48 hours.....	143
18. Titration of hyperimmune sera prepared in rabbits.....	146
19. Detection of <i>Campylobacter</i> antibodies in sera by Slide agglutination.....	149
20. Detection of <i>Campylobacter</i> antibodies in sera by passive haemagglutination.....	149
21. Detection of <i>Campylobacter</i> antibodies in sera by ELISA.....	150
22. Comparative studies between different serological tests.....	150
23. Relative sensitivity of ELISA, Passive haemagglutination and Slide agglutination in detection of <i>Campylobacter</i> antibodies from sera recovered from apparently normal calves	153
24. Relative sensitivity of ELISA, Passive haemagglutination and Slide agglutination in detection of <i>Campylobacter</i> antibodies from sera recovered from diarrhoeic calves.....	153
