**A Pharmacognostical Study of *Pyrus Calleryana*
Family Rosaceae Cultivated in Egypt**

A thesis presented by

Riham Salah El-Din El-Sayed

For the Degree of Master in Pharmaceutical Sciences (Pharmacognosy)

Under the supervision of

Professor Dr. Seham S. El-Hawary

Professor of Pharmacognosy

Faculty of Pharmacy

Cairo University

Dr. Hamida M. A. El-Gohary

Assist. Prof. of Pharmacognosy

Faculty of Pharmacy

Cairo University

Dr. Mariam H. Gonaïd

Assist. Prof. of Pharmacognosy

Faculty of Pharmacy

Cairo University

Pharmacognosy Department
Faculty of Pharmacy
Cairo University

وَفِيهِ

To My Family

APPROVAL SHEET

**A pharmacognostical study of *Pyrus calleryana* Family
Rosaceae cultivated in Egypt.**

Approved by:

M. Y. Haggag.....

Moshera EL-Sheresi

Seham El-Hawary

~~Hani El-Gohar~~

Mariam Gomaid

Date: 27/12/2003

Acknowledgement

Praise is to allah, the most gracious, merciful and the source of all knowledge by whose abundant grace this work has come to completion.

Neither words nor the available space can describe my greatest appreciation, sincere thanks and gratitude to all the members of the kind and helpful team, I have got the honor to work with. I am forever indebted to them and hope that their good deeds return to them many folds.

My deepest thanks and sincere gratitude were owed to Prof.Dr. Siham.S.El-Hawary, Prof.of Pharmacognosy, Faculty of Pharmacy, Cairo University for supporting the work in this thesis, her continuous, valuable supervision and constructive comments throughout the experimental investigations as well as writing and revising the thesis.

I am profoundly grateful to Dr.Hamida M.El-Gohary Assistant Prof.of Pharmacognosy, Faculty of Pharmacy, Cairo University for her conscientious and fruitful supervision, unlimited advice and continous guidance during the development of this work.

My great thanks to Dr.Mariam H.Gonaid, Assistant Prof.of Pharmacognosy, Faculty of Pharmacy, Cairo University for pushing me forward by her excellent supervision, continuous encouragement, support and backup, kind relation, assistance and restful smile.

I wish to express my deepest appreciation to Dr. Amany Sleem, Prof. of Pharmacology, National Research Centre for her kind and unlimited help in carrying out the pharmacological study of the thesis.

I am profoundly indebted to Dr. Aly Ahmedy, Assistant Professor, Microbiology Department, Faculty of Pharmacy, Cairo University for performing the antimicrobial screening.

I am grateful to all members of Pharmacognosy Department, Faculty of Pharmacy, Cairo University, who gave me the benefit of their experience and encouragement. Special thanks are owed to Dr. Meselhy Ragab Meselhy, for carrying most of the NMR spectra of the thesis, Prof. Dr. Essam Abdel Sattar and Dr. Hesham El-Askary for their help during carrying out the HPLC analysis in the thesis.

My deep appreciation is extended to all my colleagues in the Pharmacognosy Research laboratory specially Zeinab A. Kandil and Maha M. Salama, Assistant lecturers in Pharmacognosy Department, Faculty of Pharmacy, Cairo University for their kind, unlimited help, encouragement and moral support during the work of the thesis.

I am profoundly grateful to my dear and beloved father and mother to whom words are not enough to describe their care, tenderness and support. They provided me with the suitable atmosphere to work and supplied me with adequate financial support so my deep appreciation and sincere love is devoted to them. I owe them my success. I am deeply thankful to my dear sisters who spared no efforts to give me all the assistance, encouragement and love, which were capable to push me forward. Finally, I would like to extend my heartfelt gratitude to my husband for his continuous support.

RIHAM SALAH EL DIN
