# *Microbiological Studies on Respiratory Affection in Chickens*

AThesis presented  
by

**Hanan Mohamed Anwer Sedhom**

B.V.Sc. (1993), Cairo University

for the Master degree

in

Veterinary Medical Science Microbiology

(Bacteriology, Immunology, Mycology)

Under Supervision of

*Prof. Dr. Mamdouh Abd El-Ghani*

Prof. of Microbiology

Faculty Veterinary Medicine,

Cairo University

**Dr. Ali Hamed Azzam**

Prof. of Poultry Diseases,

Animal Health Research Institute,

Dokki, Giza

{2000}

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

سُبْحَانَكَ لَا عِلْمَ لَنَا إِلَّا مَا عَلَّمْتَنَا إِنَّكَ

أَنْتَ الْعَلِيمُ الْحَكِيمُ

صَدَقَ اللَّهُ الْعَظِيمُ

(البقرة آية ٣٢)

## APPROVAL SHEET

This is to approve that the dissertation presented by Hanan Mohamed Anwer Sedhom to Cairo University for Master Degree of Veterinary Science (Bacteriology – Mycology- Immunology), has been approved by the examining committee :

1. Prof. Dr. Fawzy Riyad. El- Seedy  
Professor and Head of Microbiology Dept .  
Faculty of Veterinary Medicine,  
Cairo University, Beni – suef Branch

2. Prof. Dr. Salah El – Dien Abd El – Karim Selim  
Emeritus Professor of Microbiology  
Faculty of Veterinary Medicine,  
Cairo University

3. Prof . Dr. Mamdouh Abd El – Ghani Abd El- Aziz  
Professor of Microbiology  
Faculty of Veterinary Medicine,  
Cairo University  
( Supervisor )

Date : 8/8/2000

*To my Husband*

*Daughter*

*And Family*

## ACKNOWLEDGEMENT

*First of all, I would like to thank my "Allah" who gave me the ability to finish this work.*

*I wish to express my gratitude and appreciation to **Prof. Dr. Mamdouh Abd El-Ghani Abd El-Aziz**, Professor of Microbiology, Faculty of Veterinary Medicine, Cairo university, for his supervising, encouragement, great help and valuable advice during the course of this work. Indeed, the completion of this work was impossible without his fruitful efforts.*

***Prof. Dr. Ali Hamed Azzam**, Professor of Poultry Diseases, Animal Health Research Institute, Dokki, Giza, for suggesting the theme of this thesis and under his supervision and directions this study was undertaken and thereafter fulfilled.*

*I'd like to express my deepest gratitude to **Prof. Dr. Ahmed Mahmoud Hamouda**, who spared no effort in helping.*

---

*I wish to express my gratitude to **Dr. Emad Mokhtar**, for his help and advice.*

*Indeed, I feel thankful to all **Staff Members** of both Microbiology Dept., Faculty of Veterinary Medicine, Cairo University and Poultry Diseases Dept., Animal Health Research Institute, Dokki, Giza for their cooperation and help.*

# LIST OF CONTENTS

|                                                                                                                           | Page |
|---------------------------------------------------------------------------------------------------------------------------|------|
| 1. INTRODUCTION.....                                                                                                      | 1    |
| 2. REVIEW OF LITERATURE.....                                                                                              | 3    |
| 2.1. Microorganisms causing respiratory<br>affections in chickens.....                                                    | 3    |
| 2.2. Incidence of microorganisms in the<br>respiratory tract of chickens.....                                             | 12   |
| 2.3. Isolation and identification.....                                                                                    | 19   |
| 2.4. Serological identification of <i>E. coli</i> ,<br><i>Pasteurella multocida</i> and <i>Mycoplasma</i><br>species..... | 41   |
| 2.5. Sensitivity to antimicrobial agent.....                                                                              | 52   |
| 2.6. Experimental infection in chicks.....                                                                                | 67   |
| 3. MATERIAL AND METHODS.....                                                                                              | 85   |
| 3.1. Materials.....                                                                                                       | 85   |
| 3.1.1. Samples.....                                                                                                       | 85   |
| 3.1.2. Culture media used.....                                                                                            | 85   |
| 3.1.2.1. Media used for isolation<br>and cultivation of bacteria.....                                                     | 85   |
| 3.1.2.2. Media used for<br>biochemical reactions.....                                                                     | 87   |

|                                                                                                                                            | Page |
|--------------------------------------------------------------------------------------------------------------------------------------------|------|
| 3.1.2.3. Media used for disk diffusion methods for detection the susceptibility of isolated bacteria to various antibacterial agents ..... | 89   |
| 3.1.3. Stains .....                                                                                                                        | 89   |
| 3.1.3.1. Gram's Stain .....                                                                                                                | 89   |
| 3.1.3.2. Leishman's stain .....                                                                                                            | 89   |
| 3.1.4. Reagents and Solutions .....                                                                                                        | 89   |
| 3.1.4.1. Biochemical reagents .....                                                                                                        | 90   |
| 3.1.4.2. Biological reagents .....                                                                                                         | 91   |
| 3.1.5. Antibacterial sensitivity discs .....                                                                                               | 93   |
| 3.1.6. Laboratory animals .....                                                                                                            | 94   |
| 3.1.6.1. Swiss mice .....                                                                                                                  | 94   |
| 3.1.6.2. Chicks .....                                                                                                                      | 94   |
| <b>3.2. Methods.</b> .....                                                                                                                 | 95   |
| 3.2.1. Collection of samples .....                                                                                                         | 95   |
| 3.2.2. Bacteriological examination .....                                                                                                   | 95   |
| 3.2.2.1. Isolation of bacterial agents other than mycoplasmas .....                                                                        | 95   |
| 3.2.2.2. Identification of the isolated bacteria .....                                                                                     | 96   |
| A. Biochemical identification .....                                                                                                        | 97   |
| B. Serological identification .....                                                                                                        | 104  |
| 3.2.2.3. Pathogenicity and virulence of <i>P. multocida</i> isolates to mice .....                                                         | 108  |

|                                                                                                                                                                                             | Page |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| 3.2.2.4. Isolation and identification of mycoplasma .....                                                                                                                                   | 110  |
| 3.2.3. In-vitro susceptibility of prevalent isolates to various chemotherapeutic agents .....                                                                                               | 113  |
| 3.2.4. Experimental infection of isolated E. coli, P. multocida and M. gallisepticum to chicks .....                                                                                        | 115  |
| 4. RESULTS. ....                                                                                                                                                                            | 118  |
| 4.1. Prevalence rate of bacterial isolates obtained from both apparently normal and diseased chickens with respiratory disorders .....                                                      | 118  |
| 4.2. Prevalence rate of various bacterial isolates recovered as single form from chickens either apparently normal or diseased suffering from respiratory manifestations .....              | 118  |
| 4.3. Prevalence rate of various bacterial isolates recovered as mixed organisms from chickens either apparently normal or diseased chickens suffering from respiratory manifestations ..... | 121  |
| 4.4. Incidence of Gram negative bacteria recovered from both apparently normal and diseased chickens with respiratory disorders .....                                                       | 123  |
| 4.5. Incidence of Gram positive bacteria recovered from apparently normal and diseased chickens with respiratory manifestations .....                                                       | 158  |
| 4.6. Response of some bacterial isolates recovered from examined chickens to various chemotherapeutic agents in-vitro .....                                                                 | 167  |

|                                                                                                                                                          | Page |
