PHYTOCHEMICAL AND BIOLOGICAL STUDY ON CERTAIN PLANTS BELONGING TO FAMILY ROSACEAE

Thesis submitted to
Faculty of Pharmacy
Ain Shams University
In Partial Fulfillment of the Requirements
for the Degree of
Doctor of Philosophy in Pharmaceutical Sciences
(Pharmacognosy)

By

Esraa Ashraf Ahmed ElHawary

B. Pharm. Sci.
Faculty of Pharmacy, Ain Shams University, 2010
M. Pharm. Sci.
Faculty of Pharmacy, Ain Shams University, 2015

Under Supervision of

Prof. Abdel Nasser Badawi Singab, PhD

Professor of Pharmacognosy,
Chairman of Center for Drug Discovery, Research and Development,
Faculty of Pharmacy, Ain Shams University

Prof. Rola Milad Labib, PhD

Professor of Pharmacognosy,
Vice Dean of Community Services and Environmental Development,
Faculty of Pharmacy,
Ain Shams University

Assoc. Prof. Nada Mohamed Mostafa, PhD

Associate Professor of Pharmacognosy,
Faculty of Pharmacy,
Ain Shams University

Department of Pharmacognosy
Faculty of Pharmacy
Ain Shams University
Abbasia, Cairo, Egypt
2022

To the soul of my beloved Father
Dr. Ashraf Ahmed ElHawary

First, I thank "**Allah**" for granting me the power to accomplish this work.

I would like to express my deepest gratitude, sincere and profound appreciation to the following people who significantly contributed to the work done in this thesis:

I would like to express my deepest thanks to **Prof. Abdel Nasser Badawi Singab**, Professor of Pharmacognosy, Head of Center of Drug Discovery, Research and Development, Faculty of Pharmacy, Ain Shams University for suggesting the thesis idea, plants, and work scheme. I am greatly indebted for his valuable scientific supervision, constructive advice and continuous guidance throughout the work. For being a true role model by all means and for being a second father and mentor. He guided me immensely throughout the work and during the revision of the thesis. His valuable time and big effort are greatly appreciated. I would like to thank him for his continued support by providing all the scientific equipments from the Center of Drug Discovery, Research and Development for our benefit.

My deepest gratitude and appreciation are expressed to **Prof. Rola Milad Labib**, Professor of Pharmacognosy, Vice Dean for Community Services and Environmental Development, Faculty of Pharmacy, Ain Shams University, for her divine support, constructive criticism, scientific supervision and follow up throughout the work. I would like to thank and appreciate all her efforts and guidance.

I am also greatly indebted to **Assoc. Prof. Nada Mohamed Mostafa**, Associate Professor of Pharmacognosy, Faculty of Pharmacy, Ain Shams University, for providing continuous scientific supervision and follow up throughout the work and for her support and constructive criticism.

I am also greatly indebted to **Assoc. Prof. Ahmed Zeinhom Shehata**, Associate Professor of Medical Entomology, Faculty of Science (Boys), Al-Azhar University, for his guidance and hard work through the insecticidal part of this thesis and for providing continuous scientific supervision and follow up. I would like also to thank **Dr. Mostafa Mokhtar**, Lecturer of Medical Entomology, Faculty of Science (Boys), Al-Azhar University for his support during the insecticidal part.

I would also like to thank my dear **Professors, Associate professors, Lecturers, colleagues** and to all the **workers** at the Faculty of Pharmacy, Ain Shams University for their help and support during this work.

Finally, my deepest everlasting thanks and appreciation are for my beloved **parents, Dr Ashraf ElHawary** (may Allah bless his soul) and **Dr Nagwa Mohamed** for their continuous support and encouragement throughout my life. I would like to thank my beloved husband **Eng. Mohamed Essa** and my little angel **Laila** and my sweet niece **Mariam** for their continuous love, support and encouragement. I would like also to thank **my siblings; Eng. Ahmed ElHawary, Ms Aya ElHawary and Ms Asmaa ElHawary.** Especial thanks goes to my second sister **Yousra ElKhodary**, my brother's wife, for being always my beloved and supporting sister.

والحمد لله رب العالمين.....

Esraa Ashraf Ahmed ElHawary

List of abbreviations.....	vii
Introduction.....	1
Review of literature.....	4
Family Rosaceae.....	4
1. Phytochemical constituents.....	4
2. Folk medicinal uses	25
3. Biological activities.....	26
Taxonomy.....	36
Material, apparatus and methods.....	42
1. Material.....	42
2. Apparatus.....	47
3. Methods	48
Part I: Cultivation and genetic characteristics of selected Rosa species family Rosaceae	
Chapter 1: Cultivation of selected Rosa species family Rosaceae	59
Chapter 2: Genetic characteristics of selected Rosa species family Rosaceae.....	63
Part II: Phytochemical investigation of selected Rosa species family Rosaceae	
Chapter 1: Phytochemical screening of selected Rosa species and determination of their total phenolic and total flavonoid contents	
Results.....	66
1. Phytochemical screening of <i>R. banksiae</i> var. <i>banksiae</i> Ait. (RBW), <i>R. polyantha</i> Thunb. ‘orange fairy’ (RPO) and <i>R. polyantha</i> Thunb. ‘white fairy’ (RPW) aerial parts.....	66
2. Determination of total phenolic and total flavonoid contents of RBW, RPO and RPW (aerial parts and flowers) 70% methanol extracts	67
Chapter 2: Extraction and isolation of phytoconstituents from <i>R. banksiae</i> var. <i>banksiae</i> Ait. (RBW) 70% methanol extract	
1. Extraction and isolation of phytoconstituents from <i>R. banksiae</i> var. <i>banksiae</i> Ait. (RBW) 70% methanol extract.....	70
2. Identification of the isolated compounds.....	73
2.1. Compounds isolated from the dichloromethane (DCM) fraction of RBW aerial parts.....	73
2.1.1. Compound 1 [28- <i>O</i> -(<i>E</i>)-Feruloyl-betulinic acid	73
2.1.2. Compound 2 (Ursolic acid).....	82
2.2. Compounds isolated from the ethyl acetate (Eth. Ac.) fraction of RBW aerial parts.....	87
2.2.1. Compound 3 (Tormentic acid).....	87
2.3. Compounds isolated from the butanol fraction of RBW aerial parts.....	92
2.3.1. Compound 4 (Quercetin-3- <i>O</i> - β -D-glucuronide).....	92
Chapter 3: UPLC/MS profiling of secondary metabolites	
1. UPLC/ESI/MS ⁿ analysis of RBW, RPO and RPW aerial parts and flowers 70% methanol extracts (collected samples, CS).....	98
2. Multivariate data analysis for the six collected <i>Rosa</i> samples (CS) using PCA, HCA and clustered heat map.....	109

3. UPLC/ESI/MS ⁿ analysis of RBW, RPO and RPW aerial parts and flowers 70 % methanol extracts (PS).....	111
4. Multivariate data analysis for the six <i>Rosa</i> samples from the plant station (PS) using PCA, HCA and clustered heat map.....	123
5. UPLC/ESI/MS ⁿ analysis of the polar fractions of RBW.....	125
Chapter 4: Study of the essential oils and <i>n</i>-hexane extracts of selected <i>Rosa</i> species family Rosaceae	
1. Chemical composition and multivariate data analysis of the essential oils of selected <i>Rosa</i> species (aerial parts and flowers) (collected samples, CS).....	134
2. Chemical composition and multivariate data analysis of the essential oils of selected <i>Rosa</i> species (aerial parts and flowers) (Medicinal Plants Research Station, ASU) (PS).....	150
3. Determination of the <i>n</i> -hexane extracts of the aerial parts (A) and flowers (F) of selected <i>Rosa</i> species family Rosaceae.....	166
Part III: Biological study of different extracts of selected <i>Rosa</i> species family Rosaceae	
Chapter 1: Antimicrobial activity of the essential oils of selected <i>Rosa</i> species family Rosaceae	
	171
Chapter 2: Investigation of the insecticidal activity of selected <i>Rosa</i> species (aerial parts and flowers) 70 % methanol and <i>n</i>-hexane extracts against <i>Culex pipiens</i> L. mosquito	
Introduction.....	174
Results.....	179
1. Effect of tested plant extracts on different stages of <i>Culex pipiens</i>	180
2. Effect of tested plant extracts on the reproductive potential of resulted females.....	200
3. Repellent activity of tested plant extracts against <i>Culex pipiens</i> starved females.....	213
General summary.....	221
Conclusions and recommendations.....	232
