Structure and Properties of Some Bio-Glasses

B18339

Presented by

Ghada Elamir Ismail Shehab Elfalaky

A Thesis Submitted

To

Faculty of Science

For the Degree of Doctor of Philosophy of Science

Biophysics Department

Faculty of Science

Cairo University

(2010)

Approval Sheet for Submission

Thesis Title: Structure and Properties of Some Bio-Glasses

Name of candidate: Ghada Elamir Ismail Shohab Elfalaky

This Thesis has been approved for submission by the supervisors:

1- Prof. Dr. Osiris W. Guirguis

Professor of Biophysics

Biophysics Department

Faculty of Science

Cairo University

Signature:

Osiris W. Guirguis

2- Dr. Mohamed El-Sayed Awad Ali Gaafar

Researcher

Ultrasonic Department

National Institute for Standards

Signature:

M. Gaafar

Osiris W. Guirguis
6/12/2010

Prof. Dr. Osiris W. Guirguis

Chairman of Biophysics Department

Faculty of Science - Cairo University

List of Examiners

Thesis Title: Structure and Properties of Some Bio-Glasses

Name of candidate: Ghada Elattir Ismail Shehab Elfalaky

This Thesis has been approved for submission and Examine by the Examiners:

1- Prof. Dr. V. Rajendran

The Director

R&D and Center for Nano Science and Technology

K. S. Rangasamy College of Technology (Autonomous)

Tamilnadu, INDIA

2- Prof. Fabrettin Yakuphanoglu

Firat University, Faculty of Arts and Sciences

Physics, Department

Elazığ, TURKEY

3- Prof. Dr. Osiris W. Guirguis

Professor of Biophysics

Biophysics Department

Faculty of Science

Cairo University

Osiris W. Guirguis
6/12/2010

Prof. Dr. Osiris W. Guirguis

Chairman of Biophysics Department

Faculty of Science – Cairo University

To my wonderful husband **Hanafy**, all I can say is it would take another thesis to express my deep love for you. Your patience, supportive and encouragement have upheld me at ever stage of this thesis.

ACKNOWLEDGMENT

I wish to express my sincere thanks to **Prof. Dr. Osiris W. Guirguis** Professor of Biophysics, Biophysics Department, Faculty of Science, Cairo University, for his supervision and sincere help during this work.

I would like to express my deep gratitude to **Dr. Mohamed El-Sayed Awad Ali Gaafar**, Researcher, Ultrasonic Department of National Institute for Standards, for suggesting the point of research, his close supervision, fruitful discussion and guidance throughout this thesis.

I wish to express my sincere thanks to **Prof. Dr. Nadia S. Abd-El-Aal**, Professor, Ultrasonic Department of National Institute for Standards, for her encouragement and sincere help during this work.

Many thanks are also due to all member of Ultrasonic Department in National Institute for Standards, and Biophysics Department, Faculty of Science, Cairo University for their encouragement.

Grateful thanks are due to my Mum for her hard efforts in help and support all over my life, also to my sisters and brothers.

<u>ABSTRACT</u>	
-----------------	--

<u>LIST of FIGURES</u>	
------------------------	--

<u>LIST of TABLES</u>	
-----------------------	--

CHAPTER 1 INTRODUCTION

1.1. Structure Theories of Glass Formation.....	2
1.2. Fundamental Law of Structural Models.....	7
1.2.1. Coordination of the Network Cations.....	7
1.2.2. Bond Angle Distribution.....	8
1.2.3. Network Connectivity.....	8
1.2.4. Dimensionality of the Network.....	8
1.2.5. Nature of Any Intermediate Range Order.....	9
1.2.6. Properties of Specific Ions.....	9
1.2.7. Interstitial Free Volume.....	9
1.3. Structure Models for Borate Glasses.....	10
1.3.1. Borate Anomaly.....	10
Aim of the Work.....	12

CHAPTER 2 Review of Literature

2.1. Ultrasonic Velocity, Attenuation and Mechanical Properties.....	15
2.2. X-Ray, Infrared Absorption, Thermal and Dielectrically Studies	22

CONTENTS

CHAPTER 3 THEORETICAL MODELS

3.1. Mackishima - Mackenzie Model.....	37
3.2. Bond Compression Model.....	42
3.3. Ultrasonic Relaxation in Glasses.....	47
3.4. Ultrasonic Absorption.....	49
3.5. Dielectric Properties.....	57
3.5.1. Electric Conductivity.....	57
3.5.1.a. Activation Energy for Electric Conductivity.....	58
3.5.1.b. Effect of Frequency on Electrical Conductivity.....	59
3.5.1.c. Effect of Thermal History on Electrical Conductivity.....	60
3.5.2. Dielectric behavior.....	60
3.5.2.1. Polarization.....	61
3.5.2.2. Dielectric Constant (ϵ').....	62
3.5.2.3. Dielectric Loss ($\tan\delta$).....	63

CHAPTER 4 EXPERIMENTAL TECHNIQUE

4.1. Glass Preparation.....	65
4.2. Differential Thermal Analysis.....	67
4.3. X-Ray Diffraction.....	67
4.4. Density and Molar Volume Measurements.....	72
4.5. Infrared Spectral Analysis (IR).....	73
4.6. Ultrasonic Waves Measurements.....	74

CONTENTS

4.6.1. Ultrasonic Velocity Measurements.....	76
4.6.2 Ultrasonic Attenuation Measurements.....	78
4.7. Dielectric Measurement.....	81

CHAPTER 5 RESULTS AND DISCUSSION

5.1. Differential Thermal Analysis.....	84
5.2. Density and Molar Volume.....	86
5.3. Infrared Spectral Studies.....	90
5.4. X-Ray Spectra.....	102
5.4.1. Analysis of X-Ray Diffraction Intensities.....	102
5.5. Ultrasonic Velocities and Elastic Moduli at Room Temperature.....	114
5.6. Debye and Soften Temperatures.....	126
5.7. Elastic Moduli According to Bond Compression Model.....	130
5.8. Elastic Moduli According to Makishima-MacKenzie Model.....	141
5.9. Ultrasonic Attenuation in borate glasses at low temperatures.....	149
5.10. Dielectric Measurements.....	165
5.10.1. Dielectric Constant(ϵ').....	165
5.10.2. Dielectric Loss Tangent ($\tan\delta$).....	169
5.10.3. Imaginary part of dielectric (Loss factor).....	172
5.10.4. A.C. Conductivity.....	175
5.10.5. Activation Energy.....	180
