ACKNOWLEDGMENT

It is great pleasure for me to express my sincere appreciation to Prof. Dr. Amin M. Nassar for his supervision and continuous encouragement throughout the whole course of this work.

I want also to express my thanks also to Prof. Salah Ali for his supervision and support during hard times of the thesis.

Great thanks to my first teacher Dr. Samir Koriem for his interest, full supervision and valuable guidance. He was the man who has introduced me to the interesting world of Petri nets.
