Expression of Interleukin-23 in Ulcerative Colitis &
Colorectal Carcinoma: An Immunohistochemical
Study with
Clinico-Pathologic Correlation

Thesis
Submitted for Partial Fulfillment
of M.D Degree in Pathology

By
Mona Mohamed Refaat Abd El Ghany Hassan
M.B.B.Ch, M.Sc

Supervised by
Prof. Dr. Nahed Samy Khamis
Professor of Pathology
Faculty of Medicine - Ain Shams University

Prof. Dr. Hamed Mohamed Ahmed
Professor of Pathology
Faculty of Medicine - Ain Shams University

Prof. Dr. Manal Fawzy Rizk
Professor of Pathology
Faculty of Medicine - Ain Shams University

Ass. Prof. Dr. Marwa Mosaad Shakweer
Assistant Professor of Pathology
Faculty of Medicine - Ain Shams University

Faculty of Medicine
Ain-Shams University
2022

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

وَقُلْ رَبِّ
زِدْنِي عِلْمًا

سورة طه
الاية (114)

صَدَقَ اللَّهُ الْعَظِيمُ

Acknowledgment

*First and foremost, I feel always indebted to **ALLAH**, the Most Kind and Most Merciful.*

*I'd like to express my respectful thanks and profound gratitude to **Prof. Dr. Nahed Samy Khamis**, Professor of Pathology - Faculty of Medicine- Ain Shams University for her keen guidance, kind supervision, valuable advice and continuous encouragement, which made possible the completion of this work.*

*I am also delighted to express my deepest gratitude and thanks to **Prof. Dr. Hamed Mohamed Ahmed**, Professor of Pathology, Faculty of Medicine, Ain Shams University, for his kind care, continuous supervision, valuable instructions, constant help and great assistance throughout this work.*

*I am deeply thankful to **Prof. Dr. Manal Fawzy Rizk**, Professor of Pathology, Faculty of Medicine, Ain Shams University, for her great help, active participation and guidance.*

*I wish to introduce my deep respect and thanks to **Ass. Prof. Dr. Marwa Mosaad Shakweer**, Assistant Professor of Pathology, Faculty of Medicine, Ain Shams University, for her kindness, supervision and cooperation in this work.*

Last but not least, I would like to express my hearty thanks to all my family for their support till this work was completed.

Mona Mohamed Refaat Abd El Ghany Hassan

List of Tables

Table No.	Title	Page No.
Table (1):	Microbiota changes associated with UC.....	12
Table (2):	Modified Riley Score	27
Table (3):	The Geboes score	28
Table (4):	Gramlich Score	29
Table (5):	The Montreal classification of extent of UC allows disease extent to be defined into three subgroups	32
Table (6):	The Montreal classification of severity/ activity of UC allows disease severity/ activity to be defined into four categories	33
Table (7):	Most common differential diagnosis in UC	34
Table (8):	Mayo Scoring system for assessment of UC activity.....	37
Table (9):	Common hereditary syndromes associated with CRC, genes involved, and inheritance pattern.....	41
Table (10):	Criteria for histological grading of colorectal adenocarcinoma	61
Table (11):	Staging of colorectal carcinoma	69
Table (12):	Immunohistochemical features of usual CRC and subtypes.....	83
Table (13):	Description of personal data among chronic non-specific colitis cases group	100
Table (14):	Description of medical characteristics among chronic non-specific colitis cases group	101
Table (15):	Description of personal data among Ulcerative colitis cases group.....	102
Table (16):	Description of medical characteristics among ulcerative colitis cases group.....	103
Table (17):	Description of personal data among colorectal carcinoma cases group.....	104

List of Tables (Cont...)

Table No.	Title	Page No.
Table (18):	Description of clinical characteristics among colorectal carcinoma cases group.....	105
Table (19):	Description of IL23p19 proportion, intensity and total score among colorectal carcinoma cases group	106
Table (20):	ROC curve using IL23p19 proportion score to differentiate ulcerative colitis from chronic cases from controls	107
Table (21):	Comparison between chronic non-specific colitis and ulcerative colitis cases as regard IL23p19 proportion score	108
Table (22):	Comparison between chronic non-specific colitis and Ulcerative colitis cases as regard IL23p19 results	109
Table (23):	Relation between Inflammatory activity and IL23p19 proportion score among chronic non-specific colitis cases	110
Table (24):	Relation between Inflammatory activity and IL23p19 results among chronic non-specific colitis cases	111
Table (25):	Correlations between Inflammatory activity and IL23p19 proportion score among chronic non-specific colitis cases.....	112
Table (26):	Relation between Gramlich index and IL23p19 proportion score among ulcerative colitis cases	113
Table (27):	Correlation between Gramlich index and IL23p19 proportion score among ulcerative colitis cases	114
Table (28):	Relation between dysplasia and IL23p19 proportion score among ulcerative colitis cases	116

List of Tables (Cont...)

Table No.	Title	Page No.
Table (29):	Relation between tumor characteristics (stage and grade) and IL23p19 result among colorectal cancer cases.....	117
Table (30):	Relation between tumor characteristics (stage and grade) and IL23p19 total score among colorectal cancer cases.....	118
Table (31):	Correlation between tumor characteristics (stage and grade) and IL23p19 total score among colorectal cancer cases.....	119
Table (32):	Relation between tumor severity (invasion and metastasis) and IL23p19 result among colorectal cancer cases	121
Table (33):	Relation between tumor severity (invasion and metastasis) and IL23p19 total score among colorectal cancer cases.....	122

List of Figures

Fig. No.	Title	Page No.
Figure (1):	Surgical resection specimen from UC patient in the active phase	25
Figure (2):	Histological view of UC showing mild activity characterized by the presence of rare neutrophils infiltrating crypt epithelial cells	30
Figure (3):	Histological view of UC showing moderate activity characterized by crypt abscesses	30
Figure (4):	Histological view of UC showing severe activity resulting in ulcers	31
Figure (5):	Polypoid colorectal cancer	52
Figure (6):	Ulcerating colorectal cancer	52
Figure (7):	Medullary carcinomas are composed of syncytia of medium-sized cells with large, vesicular nuclei and numerous intraepithelial lymphocytes.....	56
Figure (8):	Micropapillary carcinomas contain clustered tumor cells located within lacunar spaces.....	58
Figure (9):	Mucinous variant of colorectal adenocarcinoma consists of irregular, branching or anastomosing glands lined by tall columnar epithelium surrounded by pools of mucin.....	59
Figure (10):	Signet ring cell carcinoma.....	60
Figure (11):	Well differentiated adenocarcinoma	61
Figure (12):	Moderately differentiated adenocarcinoma	62
Figure (13):	Poorly differentiated adenocarcinoma.....	62
Figure (14):	Tumor budding.....	65
Figure (15):	A: EMVI in a large vein. B: Higher magnification of figure 15A highlighting the vein wall.....	73
